Agile Therapeutics to Present at the Rodman & Renshaw 19th Annual Global Investment Conference

Presentation Scheduled on Tuesday, September 12th, 2017 at 9:10 AM ET

PRINCETON, N.J., Aug. 22, 2017 (GLOBE NEWSWIRE) -- Agile Therapeutics, Inc. (Nasdaq:AGRX) a women's health specialty pharmaceutical company, announced today that Al Altomari, Chairman and CEO will present at the Rodman & Renshaw 19th Annual Global Investment Conference on Tuesday, September 12, 2017 at 9:10 AM ET in New York.

To access the live and archived webcasts of the presentation, visit the Investor Relations section of Agile Therapeutics website at www.agiletherapeutics.com. The webcast will be archived on Agile Therapeutics website for 60 days following the event.

About Agile Therapeutics

Agile Therapeutics is a forward-thinking women's healthcare company dedicated to fulfilling the unmet health needs of today's women. Our product candidates are designed to provide women with contraceptive options that offer freedom from taking a daily pill, without committing to a longer-acting method. Our lead product candidate, Twirla[®], (ethinyl estradiol and levonorgestrel transdermal system), also known as AG200-15, is a once-weekly prescription contraceptive patch that recently completed Phase 3 trials. Twirla is based on our proprietary transdermal patch technology, called Skinfusion[®], which is designed to provide advantages over currently available patches and is intended to optimize patch adhesion and patient wearability. For more information, please visit the company website at www.agiletherapeutics.com. Follow Agile on social media: [@agilether](https://twitter.com/agilether). The company may occasionally disseminate material, nonpublic information on the company website.

About Twirla[®]

Twirla (ethinyl estradiol and levonorgestrel transdermal system) or AG200-15 is an investigational once-weekly prescription contraceptive patch. AG200-15 is a combined hormonal contraceptive (CHC) patch that contains the active ingredients ethinyl estradiol (EE), a synthetic estrogen, and levonorgestrel (LNG), a type of progestin, a synthetic steroid hormone. Twirla is designed to be applied once weekly for three weeks, followed by a week without a patch.
