#### ***Results of Operations***

##### *Three Months Ended September 30, 2016*

The Company reported a net loss of \$10.2 million for the quarter ended September 30, 2016, which compared with a net loss of \$12.3 million for the same prior year period. This resulted in a net loss attributable to common stockholders of \$0.32 per share for the three months ended September 30, 2016, as compared to a net loss of \$0.51 per share for the corresponding period in 2015, on both a basic and diluted basis. These per share figures are based on weighted-average common shares outstanding of 31,645,838 shares and 24,025,481 shares, respectively, with the increase in common shares outstanding at September 30, 2016 primarily resulting from the Company's follow-on offering in the fourth quarter of 2015 and from shares issued under the Company's ATM sales agreement.

Research and development expenses decreased to \$7.5 million during the three months ended September 30, 2016 as compared to \$9.6 million in the three months ended September 30, 2015.
