About Amphastar:

Amphastar is a specialty pharmaceutical company established in 1996 that primarily develops, manufactures, markets, and sells generic and proprietary injectable and inhalation products, including products with high technical barriers to market entry. Most of the Company's products are used in hospital or urgent care clinical settings and are primarily contracted and distributed through group purchasing organizations and drug wholesalers. We currently produce approximately 16 injectable products while we continue to develop a portfolio of generic and branded products that target large markets with high technical barriers to entry. Amphastar's long-standing relationship with the major group purchasing organizations and drug wholesalers in the U.S. enables it to establish significant market share upon the introduction of its new products.
