SUPPLEMENTAL NON-GAAP FINANCIAL MEASURES
(Unaudited)

Adjusted EBITDA and distributable cash flow are non-GAAP financial measures. The GAAP liquidity measure most directly comparable to Adjusted EBITDA and distributable cash flow is net cash provided by operating activities. Adjusted EBITDA and distributable cash flow should not be considered alternatives to net income, operating income, cash flows from operations or any other measure of financial performance or liquidity presented in accordance with GAAP.

Adjusted EBITDA and distributable cash flow have important limitations as analytical tools because they exclude some but not all items that affect net income and net cash provided by operating activities. Additionally, because Adjusted EBITDA and distributable cash flow may be defined differently by other companies in our industry, our definition of Adjusted EBITDA and distributable cash flow may not be comparable to similarly titled measures of other companies, thereby diminishing their utility. You should not consider Adjusted EBITDA or distributable cash flow in isolation or as substitutes for analysis of results as reported under GAAP.

Adjusted EBITDA is defined as net income (loss), plus interest expense, income taxes, depreciation and amortization, changes in deferred revenues, equity-based compensation expense, non-cash general and administrative expense, non-cash loss (income) related to derivative instruments and impairments on long-term assets. Distributable cash flow is defined as Adjusted EBITDA, less cash interest expense related to operating activities, net of interest income, income taxes paid and maintenance capital expenditures, and distribution equivalents paid in cash.

The following table reconciles Adjusted EBITDA to the most directly comparable GAAP financial and liquidity measures for the periods presented, and further reconciles Adjusted EBITDA to distributable cash flow attributable to the Partnership:

	Three months ended March 31,	
	2017	2016
	(in thousands)	
Reconciliation to Net Cash Provided by Operating Activities:		
Net cash provided by operating activities	\$ 19,558	\$ 11,742

Changes in working capital	(372)	1,877

Less:		
Cash interest expense related to operating activities	1,280	1,481
Maintenance capital expenditures	—	158
Distribution equivalents paid in cash ⁽¹⁾	—	174
Distributable cash flow	<u>\$ 19,186</u>	<u>\$ 13,287</u>

(1) Represents distribution equivalents paid in cash in respect of the applicable period to the extent reflected as changes in equity.

The following table provides the calculation of Adjusted EBITDA as defined above:
