Quantenna and AirTies Partner to Deliver Smart Wi-Fi Mesh Solutions to Service Providers

Combination of Quantenna's Wi-Fi Performance Leading Solutions and Diagnostic Systems with AirTies Mesh Software Provide Operators Ways to Optimize In-Home Wi-Fi

FREMONT, Calif., and SUNNYVALE, Calif., July 11, 2017 (GLOBE NEWSWIRE) -- [Quantenna Communications](#), Inc. (Nasdaq:QTNA), a leading provider of high performance Wi-Fi solutions, and [AirTies](#), a leading international provider of premium in-home wireless systems, today announced a strategic partnership to provide a complete Wi-Fi solution for total home connectivity for service providers worldwide.

The partnership between Quantenna and AirTies offers Internet Service Providers (ISPs) with a complete Wi-Fi hardware and software solution, performance monitoring and improvement capabilities to provide a managed Wi-Fi mesh solution for their subscribers and the ability to differentiate with new classes of premium Wi-Fi services. This combination enables AirTies mesh software to run on Quantenna's Wi-Fi access point and client solutions. Today's in-home Wi-Fi connectivity requirements are more important than ever and this partnership enables service providers to manage and optimize home Wi-Fi networks and provide maximum quality of experience for the super-connected home.

"Quantenna and AirTies recognize the rapidly increasing demands of future whole-home Wi-Fi connectivity and higher expectations of their customers," said Lionel Bonnot Senior Vice President of Marketing and Business Development at Quantenna. "With this partnership that leverages our hardware and software platforms, we can help our service provider customers future-proof their solutions and deliver unprecedented total home Wi-Fi performance and continuously raise the Wi-Fi performance bar."

"AirTies and Quantenna have been successfully working together to deliver best in class video and mesh solutions for years. This partnership is the next step in our business relationship," said Philippe Alcaras, AirTies CEO. "AirTies mesh software can leverage Quantenna's large footprint in high performance Wi-Fi deployments with service providers around the globe."

AirTies' Wi-Fi mesh software support will be integrated into Quantenna's range of Wi-Fi access point and client solutions from QSR1000/2000 4x4, QSR10G 8x8+4x4 to, 2x4 and 2x2 MiMO providing operators with a clear and complete roadmap for now and the future. AirTies' versatile software can also turn residential gateways and wireless set-top boxes into an additional Mesh Wi-Fi access point for enhanced in-home coverage.

The software provides coordinated channel changes across the mesh network, client steering to the most optimum band and access point, and dynamic packet routing to improve whole-home coverage and performance. Home networks can also be monitored, providing valuable Wi-Fi performance insights for service providers that are optimized through the cloud.

About Quantenna Communications

[Quantenna](#) (NASDAQ:QTNA) is a global leader and innovator of leading-edge performance Wi-Fi solutions. Quantenna introduced the world's first 10G Wi-Fi technology for a new generation of access points in home, enterprise and public spaces and continues to innovate. Quantenna's Wi-Fi solutions offer superior performance, and establish benchmarks for speed, range, efficiency and reliability. With MAUI, Quantenna's cloud-based Wi-Fi analytics platform that complement its chipset solutions, service providers can deliver real-time, automated Wi-Fi monitoring, optimization, and self-healing to their customers around the clock to help achieve the best Wi-Fi experience. Quantenna is Wi-Fi perfected. For more information, visit www.quantenna.com.

About AirTies

Founded in 2004, AirTies is the most widely deployed provider of Wi-Fi Mesh solutions to operators around the globe. AirTies designs and develops software and hardware that wirelessly streams Internet connections and high definition video to multiple rooms and screens. The comprehensive product portfolio includes broadband Internet devices and Internet-based television set-top boxes. Its award winning technology enables seamless wireless integration at the touch of a button, increased wireless speeds, and coverage throughout subscribers' entire homes. AirTies has an installed base of over 15 million devices worldwide. AirTies' customers include: Atlantic Broadband, Frontier, Midco, Singtel, Sky (SKY Q in the UK; Germany; Italy; and New Zealand), Swisscom, Vodafone, Wao, and many other operators.
