EnergySolutions Hires Experienced Federal Government Relations Executive

SALT LAKE CITY, UT -- (Marketwire) -- 02/22/13 -- EnergySolutions, Inc. (NYSE: ES) announced today the hiring of Victoria Napier as Senior Vice President of Federal Government Relations. Victoria will be responsible for managing Federal government relations and working with the executive team on corporate strategies.

Ms. Napier's distinguished career includes positions at the White House and state agencies. Victoria also spent three years with the U.S. Department of Energy, originally as a senior policy adviser to the Assistant Secretary for Environmental Management, and later as chief of staff, overseeing a \$7.1 billion budget and 42 active DOE sites across the country.

"We are very pleased that Victoria Napier has joined EnergySolutions," said David Lockwood, President and CEO of EnergySolutions. "She has extensive experience, industry knowledge, leadership skills and strategic vision. Victoria will play a key role in driving the growth of our Federal business."

Ms. Napier's work experience includes the Office of Presidential Personnel at the White House as a liaison with the Office of Homeland Security, Department of Agriculture (USDA), Environmental Protection Agency (EPA), Defense Nuclear Facilities Safety Board (DNFSB), and Office of Science and Technology Policy (OSTP). She also served as White House special assistant to the Secretary for the Department of the Interior.

On the state level, she served as deputy chief of staff for Nevada Governor Kenny Guinn. She also served as the lead representative to such federal agencies including FEMA, DOE, DOI, DOD, DOJ and the EPA.

Ms. Napier has previously served as a mentor for the American University in Washington, D.C. and earned a dual Bachelor of Arts degree in political science and international affairs from the University of Nevada/Reno.

EnergySolutions offers customers a full range of integrated services and solutions, including nuclear operations, characterization, decommissioning, decontamination, site closure, transportation, nuclear materials management, processing, recycling, and disposition of nuclear waste, and research and engineering services across the nuclear fuel cycle.
