MACOM Announces SMT Packaged Millimeterwave Switch for 5G Wireless Demonstration Systems

High power, thermally optimized switch leverages advanced AlGaAs technology to target 28GHz, 37GHz and 39GHz 5G wireless systems

LOWELL, Mass--(BUSINESS WIRE)-- [MACOM Technology Solutions Inc.](#) (NASDAQ: MTSI) ("MACOM"), today announced the newest entry in its portfolio of components and integrated modules for 5G wireless infrastructure. Ideally suited for 28GHz, 37GHz and 39GHz frequency bands, the new SMT packaged [MASW-011098](#) millimeterwave (mmW) switch is designed to meet the demanding bandwidth and link margin requirements of next-generation 5G demonstration systems.

Leveraging decades of expertise in Active Antennas and Monolithic Microwave Integrated Circuits (MMICs), MACOM is utilizing its experience in beamforming radar design and applying it to 5G applications. MACOM's product portfolio supports both sub-6 GHz wireless infrastructure utilizing massive MIMO (Massive In Massive Out) architectures, and high-frequency mmW technologies supporting a multitude of power and integration requirements. This legacy of innovation in phased array technology is a valuable asset for customers developing advanced antennae arrays supporting 5G beamforming capabilities. (Photo: Business Wire)

ensure superior mmW switch performance, maintaining low insertion loss and high isolation while enabling higher power-per-element ratios for 5G demonstration systems. Low insertion loss reduces the power requirement from the power amplifier (PA), alleviating thermal challenges and extending the link range while simultaneously enabling improved receiver sensitivity. The MASW-011098 also provides flexible biasing options to ensure greater overall ease of use.

"MACOM's established expertise in high-bandwidth wireless infrastructure and millimeterwave technology is helping customers around the world accelerate the evolution to 5G," said Preet Virk, Senior Vice President and General Manager, Networks, MACOM. "The patented switch technology within the MASW-011098 today underpins tens of thousands of transmit/receive channels in advanced 5G demonstration systems, enabling customers to speed their time to market with differentiated, cost-effective 5G system architectures that deliver breakthrough gains in wireless throughput and capacity."

Mobile World Congress (MWC 2017) attendees are invited to visit MACOM at Hall 8.1, Room CC8.15 from February 27 - March 2 in Barcelona, Spain, to speak with our wireless infrastructure experts about MACOM's enabling technologies for 5G. MACOM's MASW-011098 millimeterwave switches are available to qualified customers today. For more information about MACOM's solutions for 5G wireless infrastructure, visit: www.macom.com/5G.

ABOUT MACOM:

MACOM is a new breed of analog semiconductor company—one that delivers a unique combination of high growth, diversification and high profitability. We are enabling a better-connected and safer world by delivering breakthrough semiconductor technologies for optical, wireless and satellite networks that satisfy society's insatiable demand for

Leveraging decades of expertise in Active Antennas and Monolithic Microwave Integrated Circuits (MMICs), MACOM is utilizing its experience in beamforming radar design and applying it to 5G applications. The [MASW-011098](#) leverages MACOM's patented AlGaAs technology process to

information.

Today, MACOM powers the infrastructure that millions of lives and livelihoods depend on every minute to communicate, transact business, travel, stay informed and be entertained. Our technology increases the speed and coverage of the mobile Internet and enables fiber optic networks to carry previously unimaginable volumes of traffic to businesses, homes and data centers.

Keeping us all safe, MACOM technology enables next-generation radars for air traffic control and weather forecasting, as well as mission success on the modern networked battlefield.

MACOM is the partner of choice to the world's leading communications infrastructure and aerospace and defense companies, helping solve their most complex challenges in areas including network capacity, signal coverage, energy efficiency, and field reliability, through its best-in-class team and broad portfolio of RF, microwave, millimeterwave and lightwave semiconductor products.

MACOM is a pillar of the semiconductor industry, thriving for more than 60 years of daring to change the world for the better through bold technological strokes that deliver true competitive advantage to customers and superior value to investors.

Headquartered in Lowell, Massachusetts, MACOM is certified to the ISO9001 international quality standard and ISO14001 environmental management standard. MACOM has design centers and sales offices throughout North America, Europe, Asia and Australia.

MACOM, M/A-COM, M/A-COM Technology Solutions, M/A-COM Tech, Partners in RF & Microwave, The First Name in Microwave and related logos are trademarks of MACOM. All other trademarks are the property of their respective owners.
