### **About ZELTIQ® Aesthetics**

ZELTIQ is a medical technology company focused on developing and commercializing products utilizing its proprietary controlled-cooling technology platform. ZELTIQ's first commercial product, the CoolSculpting System, is designed to selectively reduce stubborn fat bulges. CoolSculpting is based on the scientific principle that fat cells are more sensitive to cold than the overlying skin and surrounding tissues. It utilizes patented technology of precisely controlled cooling to reduce the temperature of fat cells in the treated area, which is intended to cause fat cell elimination through a natural biological process known as apoptosis. ZELTIQ developed CoolSculpting to safely, noticeably, and measurably reduce the fat layer.
