

Commodity and Interest Rate Hedging Overview

March 5, 2014

The following information is current as of March 5, 2014.

Memorial Production Partners LP (MEMP) intends to update this information quarterly to the extent there are changes within the quarter. MEMP may update more or less frequently at its discretion.

Forward-Looking Statements

This document contains “forward-looking statements.” MEMP believes that its expectations are based on reasonable assumptions. No assurance, however, can be given that such expectations will prove to have been correct. A number of factors could cause actual results to differ materially from the projections, anticipated results or other expectations expressed in this document. These factors include, but are not limited to, the following risks and uncertainties: the uncertainty inherent in the development and production of oil and natural gas and in estimating reserves; potential difficulties in the marketing of, and volatility in the prices for, oil and natural gas; counterparty credit risk; uncertainties surrounding the success of secondary and tertiary recovery efforts; competition in the oil and natural gas industry; general political and economic conditions, globally and in the jurisdictions in which MEMP operates; risks related to potential acquisitions; and the risk that MEMP’s hedging strategy may be ineffective or may reduce its income. Other factors that could impact forward-looking statements are described in the “Risk Factors” section of MEMP’s most recent Form 10-K filed with the Securities and Exchange Commission and other public filings and press releases by MEMP. MEMP undertakes no obligation to publicly update or revise any forward-looking statements.

MEMP Hedging Overview: 2014 through 2019

- MEMP's commodity risk management policy provides for hedging approximately 65-85% of estimated production from total proved reserves on a rolling three to six year period
 - Policy reduces MEMP's exposure to movements in commodity prices and provides stability to distributable cash flow
 - All of MEMP's trading counterparties have credit ratings of A- (S&P) or A3 (Moody's) or higher
 - All of MEMP's current hedges are costless, fixed price swaps and collars
- MEMP's targeted average net production estimate represents the production required to reach the lower boundary of the annual production range in the 2014 full year guidance

Hedge Summary						
	Year Ending December 31,					
	2014	2015	2016	2017	2018	2019
Natural Gas Derivative Contracts:						
Total weighted-average fixed/floor price	\$4.41	\$4.33	\$4.41	\$4.31	\$4.52	\$4.77
Percent of 2014 production hedged	92%	87%	78%	72%	65%	57%
Crude Oil Derivative Contracts:						
Total weighted-average fixed/floor price	\$93.95	\$92.23	\$86.47	\$85.69	\$85.62	\$85.00
Percent of 2014 production hedged	91%	93%	85%	78%	69%	23%
Natural Gas Liquids Derivative Contracts:						
Total weighted-average fixed/floor price	\$36.39	\$35.04	–	–	–	–
Percent of 2014 production hedged	84%	72%	–	–	–	–
Total Derivative Contracts:						
Total weighted-average fixed/floor price	\$7.00	\$7.01	\$7.07	\$6.93	\$7.08	\$5.87
Percent of 2014 production hedged	90%	85%	66%	60%	54%	40%

Natural Gas Hedging 2014 through 2019

- MEMP's existing natural gas hedges cover approximately 92% of targeted natural gas production volumes for 2014 at a weighted average price of \$4.41
- 100% of MEMP's natural gas hedges are to the appropriate basis differential through 2014
 - 89% of MEMP's natural gas hedges are hedged via separate NYMEX and basis hedges, with the remaining 11% hedged directly to the appropriate basis (see basis hedges summary for additional details)

Crude Oil Hedging 2014 through 2019

- MEMP has hedged approximately 91% of targeted crude oil production volumes for 2014 at a weighted average price of \$93.95
- MEMP's California production is hedged using Brent swaps, whereas MEMP's East Texas, South Texas and Permian Basin oil production is hedged with WTI swaps and collars
 - MEMP's California hedges include a basis trade through 2015 from Brent to Midway-Sunset (see basis hedges summary for additional details)
 - 100% of MEMP's oil hedges are to the appropriate basis differential through 2015

NGL Hedging 2014 through 2019

- Hedging NGLs by product protects MEMP from fluctuations in the NGL to crude oil price relationship
 - Due to a lack of market liquidity, direct hedging of NGLs is typically limited to 12 to 24 months
- MEMP has hedged approximately 84% of targeted NGL production volumes for 2014 at a weighted average floor of \$36.39

Natural Gas and NGL Hedges: 2014 through 2019

Natural Gas / NGLs Hedge Summary						
	Year Ending December 31,					
	2014	2015	2016	2017	2018	2019
Natural Gas Derivative Contracts:						
Swap contracts:						
Volume (MMBtu)	32,345,500	29,823,340	29,909,300	27,600,800	24,720,000	21,775,000

Interest Rate Hedging Overview: 2014 through 2016

- As of March 1, 2014, MEMP has entered into the following interest rate derivative hedging transactions as it relates to the debt outstanding under its revolving credit facility
- MEMP had interest rate hedges on 50% of the \$103 MM outstanding as of January 1, 2014
