Regions Bank Named 2018 Gallup Great Workplace Award Winner for the Fourth Consecutive Year

BIRMINGHAM, Ala.--(BUSINESS WIRE)-- [Regions Bank](#) has received the 2018 [Gallup Great Workplace Award](#), Gallup's highest honor that was created to recognize organizations for their ability to create an engaged workplace that drives business results. This is the fourth year in a row Regions has received the award.

"At Regions, we believe that engaged associates are crucial to the success of our customers and our business, and that is why we continue to focus on building a culture of engagement among our associates in line with our strategic priorities," said Dave Keenan, head of Human Resources for Regions. "We are honored that Gallup has recognized Regions Bank for the fourth consecutive year among the top companies globally for our efforts to create a highly engaged workforce."

Having studied millions of employees around the world, Gallup has found that, regardless of a company's size, location or industry, the best workplaces share one trait - they have an unwavering and purposeful focus on creating a culture where employees can perform at their best. Gallup's research indicates that increasing engagement in the workplace leads to higher productivity, profitability and customer ratings, along with lower turnover and absenteeism and fewer safety incidents.

Gallup clients that participate in the Gallup survey process and meet certain criteria are eligible to apply for the Gallup Great Workplace Award. In applying, Regions had to demonstrate how engagement positively influences performance and is linked to strategy and leadership, accountability and performance, communication and knowledge management, and development and ongoing learning.

A panel of workplace consultants and experts evaluate applicants to select the winners. The top organizations selected are part of an elite group of companies to receive the award. Regions is one of 39 companies selected for 2018. These companies average 14 engaged employees for every one actively disengaged employee, which is nearly seven times the rate in the U.S. and more than 15 times the rate for workforces globally.
