

ManTech Named One of FORTUNE'S "100 Fastest-Growing Companies"

FAIRFAX, Va., Aug 24, 2010 (BUSINESS WIRE) -- ManTech International Corporation (NASDAQ:MANT) (<http://www.mantech.com>), a leading provider of technical and engineering services and solutions vital to the nation's interest and security, announced that it was ranked on the 2010 "100 Fastest-Growing Companies" list by *FORTUNE* magazine. One of only a handful of companies based in the D.C. metro area to receive this recognition, ManTech achieved a three-year annual growth rate of 23 percent to rank 97 on this year's list.

The full list and related stories appear in the September 6, 2010, issue of *FORTUNE*, and at <http://money.cnn.com/magazines/fortune/fortunefastestgrowing/2010/index.html>.

ManTech is a true entrepreneurial success story. From its modest beginnings as a two-person start-up entity in 1968, the company has become an established leader supporting the federal government by providing mission-critical technology and technical services. Traded on the NASDAQ since 2002, ManTech has grown both organically and through more than a dozen major strategic acquisitions.

"It is truly an honor to be acknowledged as one of the nation's top-growing companies," said ManTech Chairman and Chief Executive Officer George J. Pedersen. "ManTech's growth and success serve as a reflection of the hard work and dedication of more than 9,000 extremely talented employees around the world. Their achievements and innovations not only contribute to ManTech's success, but more importantly, play a vital role in protecting our nation's security."

To qualify for 100 Fastest-Growing Companies, foreign or domestic companies had to meet the following criteria: Be trading on a major U.S. stock exchange; file quarterly reports with the Securities and Exchange Commission (SEC); have a minimum market capitalization of \$250 million and a stock price of at least \$5 on June 30, 2010; and have been trading continuously since June 30, 2007. The company must also have revenue and net income of at least \$50 million and \$10 million, respectively, for the four quarters ended on or before April 30, 2010. Finally, the company must have posted an annualized growth in revenue and earnings per share of at least 15 percent annually over the three years ended on or before April 30, 2010.

Companies that met the above criteria were ranked by revenue growth rate, earnings per share (EPS) growth rate, and three-year annualized total return for the period ended June 30, 2010. (To compute the revenue and EPS growth rates, *FORTUNE* uses a trailing four quarters log linear least square regression fit.) The overall rank was based on the sum of the three ranks. Once the 100 companies were identified, they were then re-ranked within the 100, using the three equally weighted variables. If there is a tie, the company with the larger four-quarter revenue receives the higher rank.
