## **ManTech Awarded Five-Year Contract with a \$2.85 Billion Ceiling to Continue Sustainment of U.S. Military's Mine Resistant Ambush Protected (MRAP) Family of Vehicles (FoV)**

FAIRFAX, Va.--(BUSINESS WIRE)-- ManTech International Corporation (NASDAQ:MANT) has been awarded the MRAP Contractor Logistics Sustainment and Support (CLSS) Services contract by the U.S. Army's TACOM Contracting Center to continue providing logistics sustainment and support for the U.S. Military's MRAP FoV. The award has a total value of \$2.85 billion and a period of performance of five years if all options are exercised.

"As one of the very first contractors on the battlefield, we have built a strong working relationship with the U.S. Army over many years. This relationship is an essential part of who we are at ManTech, and winning this contract is a statement about the quality and professionalism of our people," said ManTech Chairman and CEO George J. Pedersen. "We are fully committed to the critical mission of the Army's TACOM Life Cycle Management Command and our other Army customers, even as we expand into new business areas such as healthcare IT and cyber security. This win, coupled with our recent awards to support the FBI's Criminal Justice Information Services and the NIH's Health IT Acquisition and Assessment Center, affirms our strategic investments to grow in traditional and emerging markets."

Under this contract ManTech will continue to provide services to rapidly assess and repair battle-damaged MRAP FoV systems and mechanical failures, insert technology, integrate systems, and perform upgrades and modifications to enhance and sustain fleet operational readiness. ManTech will also continue to manage supply and transportation support for route-clearance vehicle fleet, including demand analysis, warehouse operations, logistics data reporting, and material management to ensure optimum distribution of parts at all repair locations. Work is being performed in Afghanistan, Kuwait and at locations throughout the U.S. and the world.

The U.S. Army TACOM Life Cycle Management Command, in partnership with the Army's Program Executive Offices, is one of the Army's largest research, development and sustainment organizations for weapon systems. Its mission is to develop, acquire, field and sustain soldier and ground systems for the warfighter by integrating effective and timely acquisition, logistics and cutting-edge technology.

"MRAP vehicles provide significant protection for our servicemen and women, so it is imperative we maintain them at a high operational readiness level," said Louis M. Addeo, president and chief operating officer of ManTech's Technical Services Group. "ManTech has built a reputation for efficient, reliable logistics sustainment and we are honored to be selected to continue this important support."

"We are proud to continue our support to the MRAP program," added Kevin C. Cody, president of ManTech's Systems Sustainment and Integrated Logistics business unit. "We value the significance the MRAP and RCV FoV programs have had to the safety of our nation's warfighters since 2003."

### **About ManTech International Corporation**

ManTech is a leading provider of innovative technologies and solutions for mission-critical national security programs for the intelligence community; the Department of Defense, including health organizations; the departments of State, Homeland Security, Energy and Justice, including the Federal Bureau of Investigation (FBI); the space community; the National Oceanic and Atmospheric Administration; and other U.S. federal government customers. We provide support to critical national security programs for approximately 60 federal agencies through 1,000 current contracts. ManTech's expertise includes command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR) lifecycle support; cyber security; global logistics support; intelligence/counter-intelligence support; information technology (IT) modernization and sustainment; systems engineering; test and evaluation; and health IT. ManTech supports major national missions, such as military readiness, terrorist threat detection, information security and border protection. Additional information on ManTech can be found at [www.mantech.com](http://www.mantech.com).

### **Forward-Looking Information**

Statements and assumptions made in this press release, which do not address historical facts, constitute "forward-looking" statements that ManTech believes to be within the definition in the Private Securities Litigation Reform Act of 1995 and involve risks and uncertainties, many of which are outside of our control. These forward-looking statements are inherently subject to risks and uncertainties, and actual results and outcomes may differ materially from the results and outcomes we anticipate.

Factors that could cause actual results to differ materially from those we anticipate include, but are not limited to, adverse changes in U.S. government spending and mission priorities; government contract procurement (such as a bid protest) risks; the failure to obtain option awards, task orders or funding under the contract; risk of contract performance, modification, or termination; and competition. These and other risk factors are more fully discussed in the section entitled "Risks Factors" in ManTech's Annual Report on Form 10-K, filed with the Securities and Exchange Commission on Feb. 24, 2012, and from time to time in ManTech's other filings. The forward-looking statements included in this news release are only made as of the date of this press release, and ManTech undertakes no obligation to publicly update any of the forward-looking statements made herein, whether as a result of new information, subsequent events or circumstances, changes in expectations or otherwise.
