Frontier Communications Expands Broadband to 8,500 Additional Arizona and New Mexico Households

Residents Gain Access to Leading-Edge Services

SHOW LOW, Ariz.--(BUSINESS WIRE)-- Frontier Communications (NASDAQ: FTR) announced that it has made enhanced broadband service available to an additional 8,500 households in Arizona and New Mexico. Frontier is leveraging the FCC's Connect America Fund (CAF) program to bring broadband to approximately 4,200 households in CAF-eligible census blocks while expanding its overall service and reach to approximately 4,300 more households.

"Through ongoing network investments, Frontier is providing broadband and faster speeds to residents in service areas," Mark Jeffries, Frontier Director of Operations said. "We have been aggressively deploying and upgrading our broadband service and look forward to serving more residents."

The deployments are made possible through a combination of Frontier's capital investment and the CAF. The FCC established the CAF in 2011 to facilitate broadband deployment to the millions of Americans living in rural areas without access to broadband infrastructure. As of 2016, Frontier began receiving approximately \$17 million a year from the CAF to expand and upgrade the company's network to 29,000 locations in Arizona and New Mexico by the end of 2020.

The CAF program and investments by Frontier are enabling broadband access to previously unserved households, as well as improvements in speeds and services. Frontier offers simplified broadband offerings and bundled service packages that provide customers with choice and affordable options.

Broadband availability allows businesses and consumers to stay connected and take full advantage of online education, healthcare, and entertainment options. "Broadband connectivity is critical today, especially in more rural areas," said Jeffries. "Through investment and ongoing enhancements, Frontier is helping to close America's digital divide."
