Frontier Communications Statement Regarding Accelerating Wireline Broadband Deployment

WASHINGTON – Nov. 16, 2017—*The following can be attributed to Ken Mason, Group Vice President, Regulatory Affairs, Frontier Communications:*

“Frontier applauds the FCC’s decision today to streamline its copper retirement process and clarify its discontinuance test – common sense steps to promote investment and unleash fiber deployment. Chairman Pai and the Commission rightly recognize that fiber and IP investment offer enhanced broadband speeds and improved network reliability. Instead of fearing our connected future, the Commission today welcomes these investments with open arms, taking yet another step to level the regulatory playing field and ensure that America has the best possible broadband infrastructure.”

About Frontier Communications

Frontier Communications Corporation (NASDAQ: FTR) is a leader in providing communications services to urban, suburban, and rural communities in 29 states. Frontier offers a variety of services to residential customers over its fiber-optic and copper networks, including video, high-speed internet, advanced voice, and Frontier Secure[®] digital protection solutions. Frontier Business offers communications solutions to small, medium, and enterprise businesses. More information about Frontier is available at www.frontier.com.
