## **Argos Therapeutics to Hold Conference Call to Discuss Update on the Phase 3 ADAPT Trial Presented at the ESMO 2017 Congress**

DURHAM, N.C., Sept. 19, 2017 (GLOBE NEWSWIRE) -- Argos Therapeutics Inc. (NASDAQ:ARGS), an immuno-oncology company focused on the development and commercialization of individualized immunotherapies based on the Arcelis<sup>®</sup> precision immunotherapy technology platform, will hold a conference call to discuss an update on the ongoing Phase 3 ADAPT clinical trial evaluating Rocapuldencel-T for the treatment of metastatic renal cell carcinoma (mRCC) that was recently presented at the European Society for Medical Oncology (ESMO) 2017 Congress. Robert Figlin, MD, Professor and Chairman, Division of Hematology and Oncology at Cedars Sinai Medical Center and co-principal investigator for the ADAPT trial, delivered the oral presentation at the ESMO Conference and will participate in the call.

### **Conference Call and Webcast Details**

Argos executive management will host the conference call beginning at 4:30 p.m. Eastern Time on Wednesday, September 20<sup>th</sup>. To participate by telephone, please dial the following numbers:

Domestic: (855) 433-0930

International: (484) 756-4271

The conference ID number is 88556647.

A live and archived audio webcast with the accompanying slide and video presentations will be accessible through the Investors section of the Company's website at [www.argostherapeutics.com](http://www.argostherapeutics.com), and will remain available on the Company's website for twelve (12) months following the call.

In addition, the slides presented by Dr. Figlin at the ESMO Conference and a video in which Dr. Figlin discusses the trial will be posted to Argos' website at the time of the call.

### **About Argos Therapeutics**

Argos Therapeutics is an immuno-oncology company focused on the development and commercialization of individualized immunotherapies for the treatment of cancer and infectious diseases using its Arcelis<sup>®</sup> technology platform. Argos' most advanced product candidate, Rocapuldencel-T, is being evaluated in the pivotal ADAPT Phase 3 clinical trial for the treatment of metastatic renal cell carcinoma (mRCC). In addition, Rocapuldencel-T is being studied in a Phase 2 investigator-initiated clinical trial as neoadjuvant therapy for renal cell carcinoma (RCC). Argos is also developing a separate Arcelis<sup>®</sup>-based product candidate, AGS-004, for the treatment of human immunodeficiency virus (HIV), which is currently being evaluated in combination with vorinostat, a latency-reversing drug, in an investigator-initiated Phase 2 clinical trial aimed at HIV eradication in adult patients. Funding for the development of AGS-004 has been provided by the National Institutes of Health, the National Institute of Allergy and Infectious Diseases, and the Collaboratory of Research for AIDS Eradication.

### **Forward Looking Statements**

Any statements in this press release about Argos' future expectations, plans and prospects, including statements about the ADAPT trial and the interim data from the trial, the clinical development of Argos' product candidates and future expectations and plans and prospects for Argos and other statements containing the words "believes," "anticipates," "estimates," "expects," "intends," "plans," "predicts," "projects," "targets," "may," "potential," "will," "would," "could," "should," "continue," and similar expressions, constitute forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including whether Argos' cash resources will be sufficient to fund its continuing operations for the period anticipated; whether preliminary or interim clinical data will be indicative of the final data from a clinical trial; whether results obtained in clinical trials will be indicative of results obtained in future clinical trials; whether Argos' product candidates will advance through the clinical trial process on a timely basis; whether the results of such trials

will warrant submission for approval from the United States Food and Drug Administration or equivalent foreign regulatory agencies; whether Argos' product candidates will receive approval from regulatory agencies on a timely basis or at all; whether, if product candidates obtain approval, they will be successfully distributed and marketed; whether Argos can successfully establish commercial manufacturing operations on a timely basis or at all; and other factors discussed in the "Risk Factors" section of Argos' Form 10-Q for the quarter ended June 30, 2017, which is on file with the SEC, and in other filings Argos makes with the SEC from time to time. In addition, the forward-looking statements included in this press release represent Argos' views as of the date hereof. Argos anticipates that subsequent events and developments will cause Argos' views to change. However, while Argos may elect to update these forward-looking statements at some point in the future, Argos specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing Argos' views as of any date subsequent to the date hereof.
