Where the conversion factor mentioned above results in a fractional share, the number of Common shares issued is rounded down.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ Each post conversion share of Proofpoint Common has 160% of the tax basis of a pre conversion share of Proofpoint Series D Preferred.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ As a result of the automatic conversion, the tax basis in each post-conversion share of Proofpoint Common was 160% of the basis of each pre-conversion share of series D Preferred. For example, a U.S. taxpayer who had tax basis of \$1,000 in 1,000 shares of Series D Preferred (\$1/share) prior to the automatic conversion, has tax basis of \$1,000 in 625 shares of Proofpoint Common (\$1.60/share) subsequent to the automatic conversion.
