## American Water Announces Environmental Grant Winner in Michigan

Calumet, Mi., (July 28, 2009) – American Water announced today recipients of the company's 2009 Environmental Grant Program awards. Established in 2005, American Water's Environmental Grant Program offers funds for innovative, community-based environmental projects that improve, restore or protect the watersheds, surface water and/or groundwater supplies in the communities it serves.

A total of 25 projects will be supported by American Water environmental grants totaling more than \$114,000. A grant of \$3,000 will be awarded in Michigan to Cranbrook Institute of Science. Through its established outreach program, "Water on the Go," the institute will provide in-classroom watershed education and hands-on instruction for middle school students throughout Houghton County Michigan.

David Baker, president of Michigan American Water, said, "Through our environmental grant program, American Water is able to partner with many organizations to improve, restore and protect water resources in the communities we serve."

All grant recipients will submit a report at the end of the year to American Water regarding how their grant was used to achieve their specific environmental goals.

### **About Michigan American Water**
