New Jersey American Water Investing \$4.4 Million in Monmouth County

VOORHEES, N.J.--(BUSINESS WIRE)-- New Jersey American Water began work this month on a number of water infrastructure improvements, investing over \$4.4 million within its Monmouth County service areas. The approximate 30,130 feet of new pipe replaces water main that was installed as far back as the 1900s. The existing pipe has reached the end of its useful life and will be replaced with new ductile iron and PVC pipes.

"These projects demonstrate our commitment to provide high quality, reliable water service to our customers and represent just a few of the \$350 million in system-wide upgrades we are making in 2017," stated Jeff Bowlby, manager of field operations. "We encourage customers to use our new, user-friendly Infrastructure Upgrade Map located on the company's website to details about its pipeline renewal projects, including these projects located in Monmouth County."

Visit www.newjerseyamwater.com to learn more about New Jersey American Water's multimillion dollar program to accelerate the [renewal of water infrastructure](#) that is reaching the end of its useful life in more than 100 communities across the state and to use the newly added infrastructure upgrade map located under Water Quality, [System Updates](#).

New Jersey American Water contracted crews are currently working along the following streets:

In Howell:
