New Jersey American Water Investing \$275,000 in Middlesex Borough

VOORHEES, N.J. (March 16, 2018) – [New Jersey American Water](#) is replacing approximately 1,300 feet of aging water main in its Middlesex Borough service area. The company is replacing main that was installed in the 1950s with new ductile iron main along **Chestnut Street**, from Raritan Avenue to C Street. The project also includes replacing three fire hydrants and approximately 27 utility-owned service lines along the pipeline route.

This investment will continue to improve water service reliability and increase water flows for household consumption and fire protection in this community. This improvement is part of New Jersey American Water's multimillion dollar program to accelerate the [renewal of water infrastructure](#) that is reaching the end of its useful life in more than 100 communities across the state.

New Jersey American Water's local qualified contractor CRJ Contracting began work last week and is expected to be finished by the end of March. Work hours will be from 7 a.m. to 4 p.m., Monday through Friday. Work outside these hours is not expected unless required to maintain project schedule. Final street restoration will be completed in the fall of 2018.

For the public's and workers' safety, traffic restrictions and/or alternating traffic patterns are likely to occur during work hours. All emergency vehicles and local traffic will be allowed access during construction. New Jersey American Water values the safety of its workers and advises drivers and pedestrians to take caution in the vicinity of work sites.

###
