## INTRODUCTION

This document comprises the annual report and accounts of Amarin Corporation plc (NASDAQ: AMRN) for the year ended 31 December 2015, in accordance with UK requirements.

As used in this annual report, unless the context otherwise indicates, the terms “Group”, “Amarin”, “we”, “us” and “our” refer to Amarin Corporation plc and its wholly-owned subsidiary companies. Also, as used in this annual report, unless the context otherwise indicates the term “Company” refers to Amarin Corporation plc, the parent company of the Group; Amarin Neuroscience Limited may be referred to herein as “Amarin Neuroscience”; and Ester Neurosciences Limited may be referred to herein as “Ester Neurosciences” or “Ester”.

In this annual report, references to “pounds sterling,” “£” or “GBP£” are to UK currency; references to “US Dollars”, “\$” or “US\$” are to U.S. currency; references to “euro” or “€” are to Euro currency and references to “New Israeli Shekel”, “NIS” or “shekel” are to Israeli currency.

## STRATEGIC REPORT

### Principal activities

Amarin Corporation plc is a public limited company with its primary stock market listing in the United States on the NASDAQ Global Market. Amarin was originally incorporated in England and Wales as a private limited company on 1 March 1989 under the Companies Act 1985, and re-registered in England as a public limited company on 19 March 1993.

We are a biopharmaceutical company with expertise in lipid science focused on the commercialisation and development of therapeutics to improve cardiovascular health.

Our registered office is One New Change, London, EC4M 9AF, England. Our principal executive offices are located at 2 Pembroke House, Upper Pembroke Street 28-32, Dublin 2, Ireland. Our primary office in the United States is located at 1430 Route 206, Bedminster, NJ 07921.

### Review of business

Our lead product, Vascepa® (icosapent ethyl) capsules, is approved by the U.S. Food and Drug Administration, or FDA, for use as an adjunct to diet to reduce triglyceride levels in adult patients with severe (TG  $\geq$ 500 mg/dL) hypertriglyceridemia. This FDA-approved indication for Vascepa, known as the MARINE indication, is based primarily on the successful results from the MARINE study of Vascepa in this approved patient population. In considering this approval, FDA also reviewed our successful study of Vascepa in patients with high triglyceride levels (TG  $\geq$ 200 mg/dL and  $<$ 500 mg/dL) who are also on statin therapy for elevated low-density lipoprotein cholesterol, or LDL-C, levels which condition we refer to as mixed dyslipidemia. This study is known as the ANCHOR study. Safety data from both the MARINE and ANCHOR studies are reflected in FDA-approved labeling for Vascepa. In January 2013, we began selling and marketing Vascepa in the United States based on the FDA-approved MARINE indication. In August 2015, we also began marketing Vascepa in the United States for the treatment of patients studied in the ANCHOR study based on the federal court declaration described below. Vascepa is available in the United States by prescription only.

We sell Vascepa principally to a limited number of major wholesalers, as well as selected regional wholesalers and specialty pharmacy providers, or collectively, its Distributors, that in turn resell Vascepa to retail pharmacies for subsequent resale to patients and healthcare providers. We market Vascepa in the United States through our sales force of approximately 150 sales professionals, including sales representatives and their managers. In March 2014, we entered into a co-promotion agreement in the United States with Kowa Pharmaceuticals America, Inc. under which approximately 250 Kowa Pharmaceuticals America, Inc. sales representatives began to devote a substantial portion of their time to promoting Vascepa starting in May 2014.

In February 2015, we announced an exclusive agreement with Eddingpharm (Asia) Macao Commercial Offshore Limited, or Eddingpharm, to develop and commercialize Vascepa capsules in Mainland China, Hong Kong, Macau and Taiwan, or the China Territory. We are also assessing other partnership opportunities for licensing Vascepa in other territories outside of the United States.

Triglycerides are fats in the blood. Hypertriglyceridemia refers to a condition in which patients have high levels of triglycerides in the bloodstream. It is estimated that over 70 million adults in the United States have elevated triglyceride levels (TG  $\geq$ 150 mg/dL), approximately 40 million adults in the United States have high triglyceride levels (TG  $\geq$ 200 mg/dL), and approximately 4.0 million people in the United States have severely high triglyceride levels (TG  $\geq$ 500 mg/dL), commonly known as very high triglyceride levels. Many patients with high triglyceride levels also have diabetes and other lipid level abnormalities such as high cholesterol. The patient condition of having more than one lipid level abnormality is referred to as mixed dyslipidemia. According to *The American Heart Association Scientific Statement on Triglycerides and Cardiovascular Disease* (2011), triglycerides provide important information as a marker associated with the risk for heart disease and stroke, especially when an individual also has low high-density lipoprotein cholesterol, or HDL-C (often referred to as “good” cholesterol), and elevated levels of LDL-C (often referred to as “bad” cholesterol). Guidelines for the management of very high triglyceride levels suggest that reducing triglyceride levels is the primary goal in patients to reduce the risk of acute pancreatitis. The effect of Vascepa on cardiovascular mortality and morbidity, or the risk for pancreatitis, in patients with hypertriglyceridemia has not been determined.

We are currently focused on completing the ongoing REDUCE-IT (Reduction of Cardiovascular Events with EPA—Intervention Trial) cardiovascular outcomes study of Vascepa, which we started in December 2011. REDUCE-IT, a multinational, prospective, randomized, double-blind, placebo-controlled study, is the first prospective cardiovascular outcomes study of any drug in a population of patients who, despite stable statin therapy, have elevated triglyceride levels. Based on the results of REDUCE-IT, we plan to seek additional indicated uses for Vascepa. In

## STRATEGIC REPORT (continued)

### Review of business (continued)

REDUCE-IT, cardiovascular event rates for patients on stable statin therapy plus four grams per day of Vascepa will be compared to cardiovascular event rates for patients on stable statin therapy plus placebo. The REDUCE-IT study is designed to be completed after reaching 1,612 aggregate cardiovascular events. Based on projected event rates, we estimate the onset of the target aggregate number of cardiovascular events to be reached in or about 2017 with study results then expected to be available and published in 2018. An interim review of the efficacy and safety results of the trial is scheduled to occur upon reaching 60% of the target aggregate number of cardiovascular events. We currently expect this interim review by the independent data monitoring committee (DMC) to occur during 2016 and it is our expectation that the trial will run to completion. The DMC has been more frequently examining interim reviews of the safety data from the study. Following each of these reviews, the DMC has communicated to us that we should continue the study as planned. We remain blinded to all data from the study. We reached the enrollment target of approximately 8,000 patients in March 2016 and have since begun to wind down patient enrollment on a country by country basis. Since patient enrollment commenced in 2011, approximately 20,000 patient years of study experience have been accumulated in REDUCE-IT.

In the successful Phase 3 MARINE and ANCHOR clinical trials, Vascepa was studied at a daily dose of 2 grams and 4 grams. We sought approval of Vascepa at the more efficacious 4-gram dose for use in each patient population. These trials demonstrated favorable results in their respective patient populations, particularly with the 4-gram dose of Vascepa, in reducing triglyceride levels without increasing LDL-C levels in the MARINE trial and with a statistically significant decrease in LDL-C levels in the ANCHOR trial, in each case, relative to placebo. These trials also showed favorable results, particularly with the 4-gram dose of Vascepa, in other important lipid and inflammation biomarkers, including apolipoprotein B (apo B), non-high-density lipoprotein cholesterol (non-HDL-C), total-cholesterol (TC), very low-density lipoprotein cholesterol (VLDL-C), lipoprotein-associated phospholipase A2 (Lp-PLA2), and high sensitivity C-reactive protein (hs-CRP). In these trials, the most commonly reported adverse reaction (incidence >2% and greater than placebo) in Vascepa-treated patients was arthralgia (joint pain) (2.3% for Vascepa vs. 1.0% for placebo).

In April 2015, we received a Complete Response Letter, or CRL, from the FDA in response to our supplemental new drug application, or sNDA, that sought approval of Vascepa for use in patients with mixed dyslipidemia, based on the successful ANCHOR study. The CRL followed an October 2013 rescission by the FDA of a special protocol assessment, or SPA, agreement and three failed attempts by us to appeal that rescission at FDA. The FDA has acknowledged the success of the ANCHOR study, which met all primary and secondary endpoints. However, FDA determined that there were insufficient data to conclude that drug-induced changes in serum triglycerides could be recognized by the FDA as a valid surrogate for reducing cardiovascular risk in the ANCHOR population for the purpose of regulatory approval of a drug targeted at a triglyceride-lowering indication in this population. The FDA has acknowledged that the standard of proof required by the FDA for approval of a new drug indication is higher than that generally used to inform patient treatment guidelines and that used by physicians in clinical practice. The FDA did not determine that the drug-induced effects of Vascepa, which go beyond triglyceride-lowering, would not actually reduce cardiovascular risk in this population and the FDA has encouraged us to complete the REDUCE-IT outcomes study. Based on our communications with the FDA, we expect that final positive results from the REDUCE-IT outcomes study will be required for label expansion for Vascepa.

In May 2015, we and a group of independent physicians filed a lawsuit in federal court to permit us to promote to healthcare professionals the use of Vascepa in patients with mixed dyslipidemia so long as the promotion is truthful and non-misleading. This use reflects recognized medical practice but is not covered by current FDA-approved labeling for the drug. Historically, FDA has considered promotion of drug uses not covered by FDA-approved labelling to be illegal off-label promotion, even if such promotion is truthful and non-misleading. In August 2015, we were granted preliminary relief in the form of a declaratory judgment in this lawsuit. The court declaration permitted us to promote to healthcare professionals the FDA-reviewed and agreed effects of Vascepa demonstrated in the ANCHOR clinical trial and presentation of the current state of scientific research related to the potential of Vascepa to reduce the risk of cardiovascular disease including through use of peer-reviewed scientific publications of available data. In August 2015, we began to promote Vascepa to healthcare professionals as permitted by this court declaration and in March 2016, the parties obtained court approval of negotiated settlement terms under which the FDA and the U.S. government agreed to be bound by the court's conclusions from the August 2015 declaration that we may engage in truthful and non-misleading speech promoting the off-label use of Vascepa and that certain statements and disclosures that we proposed to make to healthcare professionals were truthful and non-misleading. While we believe we are now permitted under applicable law to more broadly promote Vascepa, the FDA-approved labeling for Vascepa did not change as a result of this litigation and settlement, and neither government nor other third-party coverage or reimbursement to pay for the off-label use of Vascepa promoted under the court declaration was required.

## STRATEGIC REPORT (continued)

### Commercialisation strategy

We commenced the commercial launch of Vascepa in the United States in January 2013. We commenced sales and shipments of Vascepa at that time to our network of U.S.-based wholesalers. We now market Vascepa in the United States through our sales force of approximately 150 sales professionals, including sales representatives and their managers. Commencing in May 2014, in addition to promotion by our sales representatives, approximately 250 Kowa Pharmaceuticals America, Inc. sales representatives began promoting Vascepa. We also employ various marketing personnel to support our commercialisation of Vascepa.

Under our co-promotion agreement with Kowa Pharmaceuticals America, Inc., both parties have agreed to use commercially reasonable efforts to promote, detail and optimize sales of Vascepa in the United States and have agreed to specific performance requirements detailed in the related agreement. The performance requirements include a negotiated minimum number of sales details to be delivered by each party in the first and second position, the use of a negotiated number of minimum sales representatives from each party, including no less than 250 Kowa Pharmaceuticals America, Inc. sales representatives and the achievement of minimum levels of Vascepa revenue in 2015 and beyond. First position refers to when a sales representative's primary purpose in detailing is related to Vascepa, while second position refers to when a sales representative's primary purpose in detailing is to promote another product, but they also devote time in the same sales call to promote Vascepa. Kowa Pharmaceuticals America, Inc. has also agreed to continue to bear the costs incurred for its sales force associated with the commercialisation of Vascepa and to pay for certain incremental costs associated with the use of its sales force, such as sample costs and costs for promotional and marketing materials. We will continue to recognize all revenue from sales of Vascepa. In exchange for Kowa Pharmaceuticals America, Inc.'s co-promotional services, Kowa Pharmaceuticals America, Inc. is entitled to a quarterly co-promotion fee based on a percentage of aggregate Vascepa gross margins that increases during the term. The percentage of aggregate Vascepa gross margins earned by Kowa Pharmaceuticals America, Inc. increased from the high single digits in 2014, to fifteen percent (15%) in 2015, to nineteen percent (19%) in 2016, and is scheduled to increase to low twenty percent levels in 2017 and 2018, subject to certain adjustments. The term of this co-promotion agreement expires on 31 December, 2018, following which Kowa Pharmaceuticals America, Inc. will be entitled to earn tail royalties equal to declining fractions of the co-promotion fee in effect prior to such expiration for periods ranging from one to three years following such expiration.

Based on monthly compilations of data provided by a third party, Symphony Health Solutions, the estimated number of normalized total Vascepa prescriptions for the three months ended 31 December, 2015 was approximately 192,000 compared to 169,000, 148,000, 130,000, and 126,000 in the three months ended 30 September, 2015, 30 June, 2015, 31 March, 2015, and 31 December, 2014, respectively. According to data from another third party, IMS Health, the estimated number of normalized total Vascepa prescriptions for the three months ended 31 December, 2015 was approximately 203,000 compared to 176,000, 157,000, 137,000, and 131,000 in the three months ended 30 September, 2015, 30 June, 2015, 31 March, 2015, and 31 December, 2014, respectively. Normalized total prescriptions represent the estimated total number of Vascepa prescriptions shipped to patients, calculated on a normalized basis (i.e., total capsules shipped divided by 120 capsules, or one month's supply). The data reported above is based on information made available to us from third-party resources and may be subject to adjustment and may overstate or understate actual prescriptions. Timing of shipments to wholesalers, as used for revenue recognition purposes, and timing of prescriptions as estimated by these third parties may differ from period to period. Although we believe these data are prepared on a period-to-period basis in a manner that is generally consistent and that such results are generally indicative of current prescription trends, these data are based on estimates and should not be relied upon as definitive. While we expect to be able to grow Vascepa revenues over time, no such guidance should be inferred from the operating metrics described above. We also anticipate that such sales growth may be inconsistent from period to period. We believe that investors should view the above-referenced operating metrics with caution, as data for this limited period may not be representative of a trend consistent with the results presented or otherwise predictive of future results. Seasonal fluctuations in pharmaceutical sales, for example, may affect future prescription trends of Vascepa, as could changes in prescriber sentiment and other factors. We believe investors should consider our results over several quarters, or longer, before making an assessment about potential future performance.

The commercialisation of pharmaceutical products is a complex undertaking, and our ability to effectively and profitably commercialize Vascepa will depend in part on our ability to generate market demand for Vascepa through education, marketing and sales activities, our ability to achieve market acceptance of Vascepa, our ability to generate product revenue and our ability to receive adequate levels of reimbursement from third-party payers. See "*Risk Factors—Risks Related to the Commercialisation and Development of Vascepa.*"

In August 2015, we and our co-promotion partner began communicating ANCHOR clinical trial data to targeted healthcare professionals. Such qualified communications are being made pursuant to the 7 August, 2015 federal district

## STRATEGIC REPORT (continued)

### Commercialisation strategy (continued)

court declaration and subsequent March 2016 negotiated settlement with FDA and the U.S. government, allowing truthful and non-misleading promotion of the FDA-reviewed and agreed effects of Vascepa demonstrated in the ANCHOR clinical trial and presentation of the current state of scientific research related to the potential of Vascepa to reduce the risk of cardiovascular disease including through use of peer-reviewed scientific publications of available data.

#### *Commercialisation—Outside the United States*

In February 2015, we announced an exclusive agreement with Eddingpharm to develop and commercialize Vascepa capsules in what we refer to as the China Territory, consisting of the territories of Mainland China, Hong Kong, Macau and Taiwan, for uses that are currently commercialized and under development by us in the United States based on the MARINE, ANCHOR and ongoing REDUCE-IT clinical trials of Vascepa.

Under the agreement, Eddingpharm is responsible for development and commercialisation activities in the China Territory and associated expenses. We will provide development assistance and be responsible for supplying the product. Terms of the agreement include up-front and milestone payments to us of up to \$169.0 million, including a non-refundable \$15.0 million up-front payment received at closing, and development, regulatory and sales-based milestone payments of up to an additional \$154.0 million. Eddingpharm will also pay us tiered double-digit percentage royalties on net sales of Vascepa in the China Territory escalating to the high teens. We will supply finished product to Eddingpharm under negotiated terms.

We continue to assess other partnership opportunities for licensing Vascepa in other territories outside of the United States.

### Financial review

The Company views cash management and revenues as two of its most significant key performance indicators. For the year ended 31 December 2015, the Company increased revenues to \$84.8 million from \$54.2 million in the year ended 31 December 2014. Cash outflows from operations increased from \$65.9 million in the year ended 31 December 2014 to \$71.7 million in the year ended 31 December 2015.

For the fiscal years ended 31 December 2015 and 2014, we reported loss before tax of \$152.1 million and \$96.6 million, respectively. Substantially all of our loss before tax resulted from costs incurred in connection with the commercialisation of Vascepa, our research and development programmes, finance charges and from general and administrative costs associated with our operations. The increase in our loss before tax was substantially due to gains recorded in 2014 on the valuation of our debt and derivative liabilities whereas in 2015 we recorded losses.

The loss before tax for the year ended 31 December 2015 includes a gain on the change in carrying value of debt of \$0.4 million with a loss on extinguishment of debt of \$1.8 million, and a loss on the change in fair value of derivatives of \$20.5 million. The loss before tax for the year ended 31 December 2014 includes a gain on the change in carrying value of debt of \$9.4 million, a loss on extinguishment of debt of \$1.1 million and a gain on the change in fair value of derivatives of \$13.8 million.

Research and development expenses for the year ended 31 December 2015 totalled \$51.2 million versus \$48.4 million in the prior year. The share-based payment expense included within research and development totalled \$3.7 million and \$0.8 million for the years ended 31 December 2015 and 2014, respectively. Research and development expense, excluding non-cash charges for share-based compensation expense for the year ended 31 December 2015, decreased \$0.1 million. The decrease in research and development expense excluding non-cash charges for share-based compensation expense was primarily due to quarterly variability in costs related to the REDUCE-IT study.

General and administrative expenses for the year ended 31 December 2015 totalled \$103.4 million versus \$77.1 million in the prior year. General and administrative expenses include share-based payment expense of \$13.0 million for the year ended 31 December 2015, versus \$3.5 million in the prior year. General and administrative expense, excluding non-cash compensation charges for stock compensation, for the year ended 31 December 2015 increased by \$16.9 million, primarily due to increased sales and marketing spend in support of expanded Vascepa promotion following the federal court declaration on 7 August, 2015, allowing communication of truthful and non-misleading ANCHOR clinical trial data to be communicated to healthcare professionals, as well as higher legal costs associated with various legal matters, which costs vary from period to period. Additionally, co-promotion fees payable to Kowa Pharmaceuticals America, Inc. were \$8.0 million and \$1.7 million in the years ended 31 December, 2015 and 2014,

## STRATEGIC REPORT (continued)

### Financial review (continued)

respectively, an increase of \$6.3 million, or 371%. Kowa Pharmaceuticals America, Inc. commenced its co-promotion efforts in May 2014.

The Company had cash and cash equivalents of \$107.6 million as of 31 December 2015, representing a decrease of \$12.5 million from the cash and cash equivalents as of 31 December 2014 of \$120.1 million. The cash and cash equivalents are sufficient to fund the Company's operations for at least the next twelve months. Inventories on-hand as of 31 December 2015 of \$19.3 million are sufficient to cover the Company's near term supply requirements. Long-term debt as of 31 December 2015 of \$239.3 million includes the carrying value of the Company's senior exchangeable notes issued in January 2012 (as modified in May 2014 and November 2015) of \$89.0 million and long-term debt issued in December 2012 of \$74.0 million as well as derivative liabilities associated with these debt instruments totalling \$76.3 million. As of 31 December 2015, the Company had a retained deficit of \$820.5 million.

### Principal risks and uncertainties

#### Risks Related to the Commercialisation and Development of Vascepa

*We are substantially dependent upon sales of Vascepa in the United States.*

As a result of our reliance on a single product, Vascepa (icosapent ethyl) capsules, and our primary focus on the U.S. market in the near-term, much of our near-term results and value as a company depends on our ability to execute our commercial strategy for Vascepa in the United States. If commercialisation efforts for Vascepa are not successful, our business will be materially and adversely affected.

Even if we are able to develop Vascepa outside the United States or develop additional products from our research and development efforts, the development time cycle for products typically takes several years. This restricts our ability to respond to adverse business conditions for Vascepa. If we are not successful with development, or if there is not adequate demand for Vascepa or the market for such product develops less rapidly than we anticipate, we may not have the ability to effectively shift our resources to the development of alternative products or do so in a timely manner without suffering material adverse effects on our business. As a result, the lack of alternative markets and products we develop could constrain our ability to generate revenues and achieve profitability.

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to the Commercialisation and Development of Vascepa (continued)

*The uncertain effect of Vascepa on its ultimate targeted clinical benefit makes it more difficult to achieve a level of market acceptance by physicians, patients, healthcare payors and others in the medical community necessary for commercial success.*

In January 2013, we launched Vascepa based on FDA approval of our MARINE indication, for use as an adjunct to diet to reduce triglyceride levels in adult patients with severe (TG  $\geq$ 500 mg/dL) hypertriglyceridemia. Approximately 4.0 million people in the United States have severely high triglyceride levels (TG  $\geq$ 500 mg/dL), commonly known as very high triglyceride levels. Guidelines for the management of very high triglyceride levels suggest that reducing triglyceride levels is the primary goal in patients to reduce the risk of acute pancreatitis. A secondary goal for this patient population is to reduce cardiovascular risk. The effect of Vascepa on cardiovascular mortality and morbidity, or the risk for pancreatitis, in patients with hypertriglyceridemia has not been determined and our FDA-approved labeling and promotional efforts state these facts.

In August 2015, based on a federal court order, we also began marketing Vascepa in the United States to healthcare professionals for the treatment of patients with high (TG  $\geq$ 200 mg/dL and  $<$ 500 mg/dL) triglyceride levels who are also on statin therapy for elevated low-density lipoprotein cholesterol, or LDL-C, levels, based on results from the ANCHOR study of Vascepa. It is estimated that approximately 40 million adults in the United States have high triglyceride levels (TG  $\geq$ 200 mg/dL), and many patients with high triglycerides also have other lipid level abnormalities such as high cholesterol and are on statin therapy. FDA did not approve Vascepa for use in this population due to the uncertain effect of pharmaceutically induced triglyceride reduction in this patient population on cardiovascular risk reduction, the ultimate targeted clinical benefit. Our promotional efforts disclose this fact and what we view as truthful and non-misleading information on the current state of research on both triglyceride reduction and the active pharmaceutical ingredient in Vascepa, EPA, as each relate to the potential of Vascepa to reduce cardiovascular risk.

The uncertainties around the ultimate clinical benefit of Vascepa make it more difficult for Vascepa to gain market acceptance by physicians, patients, healthcare payors and others in the medical community. If Vascepa does not achieve an adequate level of acceptance, we may not generate significant product revenues and we may not become profitable. The degree of market acceptance of Vascepa for the MARINE indication and in ANCHOR patients and any future approved indications will depend on a number of factors, including:

- the perceived efficacy, safety and potential advantages of Vascepa, as compared to alternative treatments;
- our ability to offer Vascepa for sale at competitive prices;
- convenience and ease of administration compared to alternative treatments;
- the willingness of the target patient population to try new therapies and of physicians to prescribe these therapies;
- the scope, effectiveness and strength of product education, marketing and distribution support, including our sales and marketing team;
- publicity concerning Vascepa or competing products;
- the ultimate outcome or settlement terms of our pending litigation to expand our ability to promote Vascepa in the United States outside of FDA-approved labeling and the related perception thereof;
- sufficient third-party coverage or reimbursement for on-label use, and for permitted off-label use the third-party coverage or reimbursement for which was not addressed in the scope of the August 2015 court declaration; and
- the actual efficacy of the product and the prevalence and severity of any side effects, including any limitations or warnings contained in Vascepa's approved labeling.

*Our current and planned commercialisation efforts may not be successful in increasing sales of Vascepa.*

In January 2013, we began selling and marketing Vascepa in the United States through our own, newly established sales and marketing teams and through a newly established third-party commercial distribution infrastructure. We hired key personnel in these areas over the last several years and hired and trained a professional sales force in early January 2013. In October 2013, following an FDA advisory committee recommendation against approval for the ANCHOR indication, we implemented a plan to reduce our workforce and our team of sales professionals in half.

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to the Commercialisation and Development of Vascepa (continued)

In May 2014 we began co-promoting Vascepa in the United States with Kowa Pharmaceuticals America, Inc. under a co-promotion agreement we entered into in March 2014. Under the agreement, approximately 250 Kowa Pharmaceuticals America, Inc. sales representatives devote a substantial portion of their time to promoting Vascepa with Amarin's approximately 130 sales representatives based on a plan designed to increase both the number of sales targets reached and the frequency of sales calls on existing sales targets. However, the commercialisation of pharmaceutical products is a complex undertaking for a company to manage, and we have very limited experience as a company operating in this area and co-promoting a pharmaceutical product with a partner.

We are also expanding our commercialisation activities to markets outside of the United States through partnering arrangements. On 26 February, 2015, we entered into a Development, Commercialisation and Supply Agreement (the "DCS Agreement") with Eddingpharm (Asia) Macao Commercial Offshore Limited ("Eddingpharm") related to the development and commercialisation of Vascepa in Mainland China, Hong Kong, Macau and Taiwan, or the China Territory. Under the DCS Agreement, Eddingpharm will be solely responsible for development and commercialisation activities in the China Territory and associated expenses. Additionally, Eddingpharm may be required to conduct clinical trials in the China Territory to secure regulatory approval. Significant commercialisation of Vascepa in the China Territory is several years away. If Eddingpharm is not able to effectively develop and commercialize Vascepa in the China Territory, we may not be able to generate revenue from the DCS Agreement resulting from the sale of Vascepa in the China Territory.

We have limited experience working with ex-U.S. partners such as Eddingpharm to develop and market our products in foreign countries. In order for Eddingpharm, or us, to market and sell Vascepa in any country outside of the United States for any indication, it will be necessary to obtain regulatory approval from the appropriate regulatory authorities. The requirements and timing for regulatory approval, which may include conducting clinical trials, vary widely from country to country and may in some cases be different than or more rigorous than requirements in the United States. Any failure by us or Eddingpharm to obtain approval for Vascepa in any countries outside of the United States in a timely manner may limit the commercial success of Vascepa and our ability to grow our revenues.

Factors related to building and managing a sales and marketing organisation that can inhibit our efforts to successfully commercialize Vascepa include:

- our inability to attract and retain adequate numbers of effective sales and marketing personnel;
- our inability to adequately train our sales and marketing personnel, in particular as it relates to various healthcare regulatory requirements applicable to the marketing and sale of pharmaceutical products and the court declaration that we believe enables us to expand marketing efforts for Vascepa, and our inability to adequately monitor compliance with these requirements;
- the inability of our new sales personnel, working for us as a new market entrant, to obtain access to or persuade adequate numbers of physicians to prescribe Vascepa;
- the lack of complementary products to be offered by sales personnel, which may put us at a competitive disadvantage relative to companies with more extensive product lines;
- an inability by us or our partners to obtain regulatory and marketing approval or establish marketing channels in foreign jurisdictions; and
- unforeseen costs and expenses associated with operating a new independent sales and marketing organisation.

If we are not successful in our efforts to market and sell Vascepa, our anticipated revenues will be materially and negatively affected, and we may not obtain profitability, may need to cut back on research and development activities or need to raise additional funding that could result in substantial dilution.

*We expect final positive results from the REDUCE-IT outcomes study will be required for FDA-approved label expansion for Vascepa.*

Since January 2013 we have marketed Vascepa for use in the FDA-approved MARINE indication in the United States.

In April 2015, we received a CRL from the FDA on our Supplemental New Drug Application ("sNDA") that sought approval for the use of Vascepa in patients with high triglyceride levels (TG  $\geq$ 200 mg/dL and  $<$ 500 mg/dL) who

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to the Commercialisation and Development of Vascepa (continued)

are also on statin therapy, which we refer to as the ANCHOR indication. In regulatory dialogue, the FDA acknowledged that the results of the ANCHOR trial as we presented them to FDA were valid and truthful in that, for example, Vascepa reduced triglyceride levels compared to placebo in patients treated in the ANCHOR study. The clinical rationale for reducing serum triglycerides with Vascepa and modifying other lipid/lipoprotein parameters shown in ANCHOR among statin-treated patients with triglycerides 200-499 mg/dL is to reduce cardiovascular risk. In not approving our ANCHOR sNDA, the FDA concluded that, for regulatory approval purposes, there are insufficient data at this time to support a drug-induced change in serum triglycerides as a surrogate for reducing cardiovascular risk in the ANCHOR population. The FDA did not determine that the drug-induced effects of Vascepa, which go beyond triglyceride-lowering, would not actually reduce cardiovascular risk in this population.

In August 2015, based on a federal court order, we began marketing Vascepa in the United States to healthcare professionals for the treatment of patients in the ANCHOR population through use of a set of qualified statements that reflect the current state of research related to this use. An FDA-approved indication for this patient population was not granted. Our ability to reach full potential in the commercialisation of Vascepa in the United States is dependent upon marketing claims associated with Vascepa that are granted with the approval of an indication statement by the FDA.

Based on our communications with the FDA, we expect that final positive results from the REDUCE-IT outcomes study will be required for FDA approval of a new indication or other label expansion for Vascepa. Any delay in obtaining, or an inability to obtain, further expansion of our marketing approval rights with an FDA approval could prevent us from growing revenue at greater than our current pace and could therefore have a material adverse effect on our operations and financial condition, including our ability to reach profitability. Even if we obtain additional regulatory approvals for Vascepa, the timing or scope of any approvals may prohibit or reduce our ability to commercialize the product successfully. For example, if the approval process for any expanded indication takes too long, we may miss market opportunities and give other companies the ability to develop competing products or establish market dominance. If the FDA does not approve any expanded indication at all, it could have a material impact on our future results of operations and financial condition. Additionally, the terms of any approvals beyond the approval received from the FDA in July 2012 for the MARINE indication may prove to not have the scope or breadth needed for us to successfully commercialize Vascepa or become profitable.

#### ***Our off-label promotion of Vascepa could subject us to additional regulatory scrutiny and present unforeseen risks.***

The Federal Food, Drug, and Cosmetic Act, or FDCA, has been interpreted by the FDA to make it illegal for pharmaceutical companies to promote their products for uses that have not been approved by the FDA. Companies that market drugs for so called off-label uses or indications have been subject to related costly litigation, criminal penalties and civil liability under the False Claims Act.

In May 2015, we and a group of independent physicians filed a lawsuit against the FDA seeking a federal court declaration that would permit us and our agents to promote to healthcare professionals the use of Vascepa in patients with mixed dyslipidemia and promote on the potential of Vascepa to reduce the risk of cardiovascular disease so long as the promotion is truthful and non-misleading. This use of Vascepa at issue reflects recognized medical practice but was not approved by the FDA and is thus not covered by current FDA-approved labeling for the drug. It is therefore considered by the FDA to be illegal off-label promotion. The lawsuit, captioned *Amarin Pharma, Inc., et al. v. Food & Drug Administration, et al.*, S.D.N.Y. (1:15-cv-03588-PAE), was filed in the United States District Court for the Southern District of New York. In the lawsuit, we contend principally that FDA regulations limiting off-label promotion of truthful and non-misleading information are unconstitutional under the freedom of speech clause of the First Amendment as applied in the case of our proposed promotion of Vascepa. The physicians in the suit regularly treat patients at risk of cardiovascular disease and, as the complaint contends, have First Amendment rights to receive truthful and non-misleading information from Amarin. The suit is based on the principle that better informed physicians make better treatment decisions for their patients. The FDA opposed this lawsuit but did not dispute the veracity of the subject ANCHOR clinical trial data, the safety data from which is already in FDA-approved labeling of Vascepa, or the peer-reviewed research related to Vascepa and the potential for cardiovascular risk reduction.

In connection with this litigation, the FDA sent a detailed letter to us on 5 June, 2015 that confirmed the validity of the ANCHOR trial results. The letter also sought to clarify how, in the FDA's view, applicable law and FDA policies apply to the communications proposed in Amarin's complaint. FDA stated in this letter that it did not have concerns with much of the information Amarin proposed to communicate and provided Amarin with guidance on the FDA's

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to the Commercialisation and Development of Vascepa (continued)

view of lawful, but limited paths for the dissemination and communication to healthcare professionals of the effects of Vascepa demonstrated in the ANCHOR clinical trial and use of peer-reviewed scientific publications in the context of appropriate disclaimers.

In August 2015, we were granted preliminary relief in the form of a declaratory judgment in this lawsuit through the court's declaratory judgment that confirmed we may engage in truthful and non-misleading speech promoting the off-label use of Vascepa to healthcare professionals, i.e., to treat patients with persistently high triglycerides, and that such speech may not form the basis of a misbranding action under the Federal Food and Drug Cosmetic Act. In August 2015, we began to promote Vascepa to healthcare professionals as permitted by this court declaration. The FDA did not appeal the court's ruling. In March 2016, we settled this litigation under terms by which the FDA and the U.S. government agreed to be bound by the conclusions from the federal court order that we may engage in truthful and non-misleading speech promoting the off-label use of Vascepa and that certain statements and disclosures that we proposed to make to healthcare professionals were truthful and non-misleading.

While we believe we are now permitted under applicable law to more broadly promote Vascepa, the FDA-approved labeling for Vascepa did not change as a result of this litigation and settlement, and neither government nor other third-party coverage or reimbursement to pay for the off-label use of Vascepa promoted under the court declaration was required. Based on our communications with the FDA, we expect that final positive results from the REDUCE-IT outcomes study will be required for label expansion for Vascepa.

Even though we have the benefit of a final settlement in this litigation, our promotion is still subject to a high, perhaps abnormally high, degree of scrutiny to ensure that our promotion remains within the scope covered by the settlement. For example, under the settlement, we remain responsible for ensuring our speech is truthful and non-misleading. Federal and state governments may also seek to find other means to prevent our promotion of unapproved truthful and non-misleading information about Vascepa. If our operations are found to be in violation of any law or governmental regulation through existing or new interpretations, we may be subject to prolonged litigation, penalties, including civil and criminal penalties, damages, fines and the curtailment or restructuring of our operations, any of which could adversely affect our ability to operate our business and our results of operations.

#### *Generic company competitors are expected to again seek approval of generic versions of Vascepa.*

The Food Drug and Cosmetic Act, or FDCA, as amended by the Drug Price Competition and Patent Term Restoration Act of 1984, as amended, or the Hatch-Waxman Amendments, permit the FDA to approve ANDAs for generic versions of brand name drugs like Vascepa. We refer to the process of generic drug applications as the "ANDA process." The ANDA process permits competitor companies to obtain marketing approval for a drug product with the same active ingredient, dosage form, strength, route of administration, and labeling as the approved brand name drug, but without having to conduct and submit clinical studies to establish the safety and efficacy of the proposed generic product. In place of such clinical studies, an ANDA applicant needs to submit data demonstrating that its product is bioequivalent to the brand name product, usually based on pharmacokinetic studies.

The Hatch-Waxman Amendments require an applicant for a drug product that relies, in whole or in part, on the FDA's prior approval of Vascepa, to notify us of its application, a paragraph IV notice, if the applicant is seeking to market its product prior to the expiration of the patents that claim Vascepa. A bona fide paragraph IV notice may not be given under the Hatch-Waxman Amendments until after the generic company receives from the FDA an acknowledgement letter stating that its ANDA is sufficiently complete to permit a substantive review.

The paragraph IV notice is required to contain a detailed factual and legal statement explaining the basis for the applicant's opinion that the proposed product does not infringe our patents, that our patents are invalid, or both. After

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to the Commercialisation and Development of Vascepa (continued)

receipt of a valid notice, we would have the option of bringing a patent infringement suit in federal district court against any generic company seeking approval for its product within 45 days from the date of receipt of each notice. If such a suit is commenced within this 45 day period, we will be entitled to receive a 30 month stay on FDA's ability to give final approval to any of the proposed products that reference Vascepa that begins on the date we receive the paragraph IV notice. The stay may be shortened or lengthened if either party fails to cooperate in the litigation and it may be terminated if the court decides the case in less than 30 months. If the litigation is resolved in favor of the applicant before the expiration of the 30 month period, the stay will be immediately lifted and the FDA's review of the application may be completed. Such litigation is often time-consuming and costly, and may result in generic competition if such patents are not upheld or if the generic competitor is found not to infringe such patents.

In the first half of 2014, we received six paragraph IV notices notifying us of accepted ANDAs to Vascepa under the Hatch-Waxman Amendments. These ANDAs were submitted and accepted by FDA under the regulatory scheme adopted under the Hatch-Waxman Amendments based on the FDA's determination that we were entitled to three, and not five-year exclusivity. As a result from the first half of 2014 until June 2015, we were engaged in costly litigation with the ANDA applicants to protect our patent rights.

Based on the 28 May, 2015, District of Columbia court order granting our motion for summary judgment in the NCE litigation, on 26 June, 2015, the parties to the related Vascepa patent litigation that followed acceptance by FDA of ANDAs to Vascepa based on a three-year regulatory exclusivity determination, agreed to a full stay of proceeding in that patent litigation.

On 22 July, 2015, Watson Laboratories Inc., the purported first Vascepa ANDA filer, sought to intervene and appeal the Court's decision. We and FDA opposed this intervention effort. The applicable courts denied Watson the relief sought and appeal periods have expired.

Following the 28 May, 2015 District of Columbia court order setting aside FDA's denial of NCE exclusivity for Vascepa, FDA notified the ANDA filers that FDA had changed the status of their ANDAs to submitted, but no longer accepted, and notified ANDA filers that FDA had ceased review of the pending ANDAs. In rescinding acceptance of the ANDAs, the statutory basis for the patent litigation (accepted ANDAs) no longer existed. Thus, on 24 July, 2015, we moved to dismiss the pending patent infringement lawsuits against each of the Vascepa ANDA applicants in the U.S. District Court for the District of New Jersey.

On 22 January, 2016, the U.S. District Court for the District of New Jersey granted Amarin's motion to dismiss all patent infringement litigation related to the 2014 acceptance by the FDA of ANDAs to Vascepa. With this dismissal, there is no pending patent litigation related to Vascepa. A notice of appeal of the court's dismissal was filed by one ANDA filer in this case and we intend to continue to litigate vigorously in support of the court's dismissal. We cannot predict the outcome of this litigation. A new exclusivity determination by FDA has been pending since the May 28, 2015 District of Columbia court order setting aside FDA's denial of NCE exclusivity for Vascepa. We believe Vascepa is entitled to NCE exclusivity, but cannot predict the outcome of FDA's determination. We also cannot predict the outcome of this ANDA litigation. The legal process can also be costly and time-consuming.

We plan to defend the exclusivity of Vascepa through patent litigation after notification that FDA has accepted an ANDA application related to Vascepa. Assuming an NCE exclusivity determination from the FDA or no exclusivity determination, we expect notification of new ANDA submissions no sooner than in late July 2016, after the expiration of four years from the 2012 approval of Vascepa.

If an ANDA filer is ultimately successful in patent litigation against us, it meets the requirements for a generic version of Vascepa to the satisfaction of the FDA under its ANDA (after any applicable regulatory exclusivity period and the litigation-related 30-month stay period expires), and is able to supply the product in significant commercial quantities, the generic company could introduce a generic version of Vascepa. Such a market entry would likely limit our U.S. sales, which would have an adverse impact on our business and results of operations. In addition, even if a competitor's effort to introduce a generic product is ultimately unsuccessful, the perception that such development is in progress and/or news related to such progress could materially affect the perceived value of our company and our stock price.

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to our Reliance on Third Parties

*Our supply of product for commercial supply and clinical trials is dependent upon relationships with third-party manufacturers and key suppliers.*

We have no in-house manufacturing capacity and rely on contract manufacturers for our clinical and commercial product supply. We cannot assure you that we will successfully manufacture any product we may develop, either independently or under manufacturing arrangements, if any, with our third-party manufacturers. Moreover, if any manufacturer should cease doing business with us or experience delays, shortages of supply or excessive demands on their capacity, we may not be able to obtain adequate quantities of product in a timely manner, or at all.

Any manufacturing problem, natural disaster affecting manufacturing facilities, or the loss of a contract manufacturer could be disruptive to our operations and result in lost sales. Additionally, we will be reliant on third parties to supply the raw materials needed to manufacture Vascepa. Any reliance on suppliers may involve several risks, including a potential inability to obtain critical materials and reduced control over production costs, delivery schedules, reliability and quality. Any unanticipated disruption to future contract manufacture caused by problems at suppliers could delay shipment of products, increase our cost of goods sold and result in lost sales. If our suppliers were unable to supply us with adequate volumes of active pharmaceutical ingredient (drug substance) or encapsulated bulk product (drug product), it would have a material adverse effect on our ability to continue to commercialize Vascepa.

We initially purchased all of our supply of the bulk compound (ethyl-EPA), which constitutes the only active pharmaceutical ingredient, or API, of Vascepa, from a single supplier, Nisshin Pharma, Inc., or Nisshin, located in Japan. Nisshin was approved by the FDA as a Vascepa API supplier as part of our FDA marketing approval for the MARINE indication in July 2012. In April 2013, we announced the approval by the FDA of Chemport, Inc. and BASF (formerly Equateq Limited) as additional Vascepa API suppliers. We terminated our agreement with BASF due to its inability to meet the agreement requirements, may enter into a new development and supply agreement with BASF, and may purchase API from BASF. In 2014, we obtained sNDA approval of a fourth supplier of API, which includes the manufacturing facility of Finorga SAS (Novasep). We currently purchase and use commercial supply from Novasep, Chemport, and Nisshin. Each of the API manufacturers obtains supply of the key raw material to manufacture API from other third-party sources of supply.

While we have contractual freedom to source the API for Vascepa and have entered into supply agreements with multiple suppliers who also rely on other third-party suppliers of the key raw material to manufacture the API for Vascepa, Novasep, Nisshin and Chemport currently supply all of our API for Vascepa. Our strategy in adding API suppliers beyond Nisshin has been to expand manufacturing capacity and to partially mitigate the risk of reliance on any single supplier.

Expanding manufacturing capacity and qualifying such capacity is difficult and subject to numerous regulations and other operational challenges. The resources of our suppliers vary and are limited; costs associated with projected expansion and qualification can be significant. For example, Chemport, which was approved as one of our API suppliers in April 2013, is a privately-held company and their commitment to Vascepa supply has required them to seek additional resources. There can be no assurance that the expansion plans of any of our suppliers will be successful. Our aggregate capacity to produce API is dependent upon the qualification of our API suppliers. Each of our API suppliers has outlined plans for potential further capacity expansion. If no additional API supplier is approved by the FDA, our API supply will be limited to the API we purchase from previously approved suppliers. If our third-party manufacturing capacity is not expanded and compliant with applicable regulatory requirements, we may not be able to supply sufficient quantities of Vascepa to meet anticipated demand. We cannot assure you that we can contract with any future manufacturer on acceptable terms or that any such alternative supplier will not require capital investment from us in order for them to meet our requirements. Alternatively, our purchase of supply may exceed actual demand for Vascepa.

We currently have encapsulation agreements with three commercial API encapsulators for the encapsulation of Vascepa: Patheon, Inc. (formerly Banner Pharmacaps), Catalent Pharma Solutions, and Capsugel Plöerme SAS. These companies have qualified their manufacturing processes and are capable of manufacturing Vascepa. There can be no guarantee that additional other suppliers with which we have contracted to encapsulate API will be qualified to manufacture the product to our specifications or that these and any future suppliers will have the manufacturing capacity to meeting anticipated demand for Vascepa. We cannot assure you that we can contract with any future manufacturer on acceptable terms or that any such alternative supplier will not require capital investment from us in order for them to meet our requirements.

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to our Reliance on Third Parties (continued)

*We may not be able to maintain our exclusivity with our certain third-party Vascepa suppliers if we do not meet minimum purchase obligations due to lower than anticipated sales of Vascepa.*

Certain of our agreements with our suppliers include minimum purchase obligations and limited exclusivity provisions based on such minimum purchase obligations. If we do not meet the respective minimum purchase obligations in our supply agreements, our suppliers, in certain cases, will be free to sell the active pharmaceutical ingredient of Vascepa to potential competitors. Similarly if we terminate certain of our supply agreements, such suppliers may be free to sell the active pharmaceutical ingredient of Vascepa to potential competitors of Vascepa. While we anticipate that intellectual property barriers and FDA regulatory exclusivity will be the primary means to protect the commercial potential of Vascepa, the availability of Vascepa active pharmaceutical ingredient from our suppliers to our potential competitors would make our competitors' entry into the market easier and more attractive.

#### Risks Related to our Intellectual Property

*We are dependent on patents, proprietary rights and confidentiality to protect the commercial potential of Vascepa.*

Our success depends in part on our ability to obtain and maintain intellectual property protection for our drug candidates, technology and know-how, and to operate without infringing the proprietary rights of others. Our ability to successfully implement our business plan and to protect our products with our intellectual property will depend in large part on our ability to:

- obtain, defend and maintain patent protection and market exclusivity for our current and future products;
- preserve any trade secrets relating to our current and future products;
- acquire patented or patentable products and technologies; and
- operate without infringing the proprietary rights of third parties.

Amarin has prosecuted, and is currently prosecuting, multiple patent applications to protect the intellectual property developed during the Vascepa cardiovascular program. As of the date of this report, we had 46 patent applications in the United States that have been either issued or allowed and more than 30 additional patent applications are pending in the United States. Such 46 allowed and issued applications include the following:

- 2 issued U.S. patents directed to a pharmaceutical composition of Vascepa in a capsule that have terms that expire in 2020 and 2030, respectively,
- 1 issued U.S. patent covering a composition containing highly pure EPA that expires in 2021,
- 36 U.S. patents covering the use of Vascepa in either the MARINE or anticipated ANCHOR indication that have terms that expire in 2030,
- 3 additional patents related to the use of a pharmaceutical composition comprised of free fatty acids to treat the ANCHOR patient population with a term that expires in 2030,
- 2 additional patents related to the use of a pharmaceutical composition comprised of free fatty acids to treat the MARINE patient population with a term that expires in 2030,
- 1 additional patent related to a pharmaceutical composition comprised of free fatty acids and uses thereof to treat both the MARINE and ANCHOR patient populations with a term that expires in 2030, and
- 1 additional patent related to a formulation of EPA/DHA and uses thereof with a term that expires in 2030.

A Notice of Allowance is issued after the USPTO makes a determination that a patent can be granted from an application. A Notice of Allowance does not afford patent protection until the underlying patent is issued by the USPTO. No assurance can be given that applications with issued notices of allowance will be issued as patents or that any of our pending patent applications will issue as patents. No assurance can be given that, if and when issued, our patents will prevent competitors from competing with Vascepa. We are also pursuing patent applications related to Vascepa in multiple jurisdictions outside the United States. We may be dependent in some cases upon third-party licensors to pursue filing, prosecution and maintenance of patent rights or applications owned or controlled by those parties. It is possible that third parties will obtain patents or other proprietary rights that might be necessary or useful to us. In cases where third parties are first to invent a particular product or technology, or first to file after various

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to our Intellectual Property (continued)

provisions of the America Invents Act of 2011 went into effect on 16 March, 2013, it is possible that those parties will obtain patents that will be sufficiently broad so as to prevent us from utilizing such technology or commercializing our current and future products.

Although we intend to make reasonable efforts to protect our current and future intellectual property rights and to ensure that any proprietary technology we acquire or develop does not infringe the rights of other parties, we may not be able to ascertain the existence of all potentially conflicting claims. Therefore, there is a risk that third parties may make claims of infringement against our current or future products or technologies. In addition, third parties may be able to obtain patents that prevent the sale of our current or future products or require us to obtain a license and pay significant fees or royalties in order to continue selling such products.

We may in the future discover the existence of products that infringe patents that we own or that have been licensed to us. If we were to initiate legal proceedings against a third party to stop such an infringement, such proceedings could be costly and time consuming, regardless of the outcome. No assurances can be given that we would prevail, and it is possible that, during such a proceeding, our patent rights could be held to be invalid, unenforceable or both. Although we intend to protect our trade secrets and proprietary know-how through confidentiality agreements with our manufacturers, employees and consultants, we may not be able to prevent parties subject to such confidentiality agreements from breaching these agreements or third parties from independently developing or learning of our trade secrets.

We anticipate that competitors may from time to time oppose our efforts to obtain patent protection for new technologies or to submit patented technologies for regulatory approvals. Competitors may seek to oppose our patent applications to delay the approval process or to challenge our granted patents, for example, by requesting a reexamination of our patent at the USPTO, or by filing an opposition in a foreign patent office, even if the opposition or challenge has little or no merit. Such proceedings are generally highly technical, expensive, and time consuming, and there can be no assurance that such a challenge would not result in the narrowing or complete revocation of any patent of ours that was so challenged.

***Our issued patents may not prevent competitors from competing with Vascepa, even if we seek to enforce our patent rights.***

We plan to vigorously defend our rights under issued patents. For example, in March 2014, we filed a patent infringement suit against Omthera Pharmaceuticals, Inc., and its parent company, AstraZeneca Pharmaceuticals LP. The suit sought injunctive relief and monetary damages for infringement of Amarin's U.S. Patent No. 8,663,662. The complaint alleged infringement of the patent arising from the expected launch of Epanova, a product that is expected to compete with Vascepa in the United States. The patent covers methods of lowering triglycerides by administering a pharmaceutical composition that includes amounts of EPA as free acid, and no more than about 30% DHA. In November 2014, based on a representation from AstraZeneca Pharmaceuticals LP that the commercial launch of Epanova was not imminent, the court dismissed our complaint, without prejudice (i.e., preserving our ability to later re-file the suit). The court required the defendant to notify us before any product launch. We intend to pursue this litigation vigorously and aggressively protect its intellectual property rights. However, patent litigation is a time-consuming and costly process. There can be no assurance that we will be successful in enforcing this patent or that it will not be successfully challenged and invalidated. Even if we are successful in enforcing this patent, the process could take years to reach conclusion.

Other drug companies may challenge the validity, enforceability, or both of our patents and seek to design its products around our issued patent claims and gain marketing approval for generic versions of Vascepa or branded competitive products based on new clinical studies. The pharmaceutical industry is highly competitive and many of our competitors have greater experience and resources than we have. Any such competition could undermine sales, marketing and collaboration efforts for Vascepa, and thus reduce, perhaps materially, the revenue potential for Vascepa.

Even if we are successful in enforcing our issued patents, we may incur substantial costs and divert management's time and attention in pursuing these proceedings, which could have a material adverse effect on us. Patent litigation is costly and time consuming, and we may not have sufficient resources to bring these actions to a successful conclusion.

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to our Business

***We and certain of our current and former executive officers have been named as defendants in a class action lawsuit that could result in substantial costs and divert management's attention.***

The market price of our American Depositary Shares, or ADSs, declined significantly after the October 2013 decision by the FDA Advisory Committee to recommend against approval of Vascepa in the ANCHOR indication. We and certain of our current and former executive officers and directors have been named as defendants in a class action lawsuit that generally alleges that we and certain of our current and former officers and directors violated Sections 10(b) and/or 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder by making allegedly false and/or misleading statements or material omissions concerning the ANCHOR sNDA and related FDA regulatory approval process in an effort to lead investors to believe that Vascepa would receive approval from the FDA in the ANCHOR indication. The complaints seek unspecified damages, interest, attorneys' fees, and other costs.

We engaged in a vigorous defense of this lawsuit. On 29 June, 2015, the Court granted our motion to dismiss the class action without prejudice. The Court held that the plaintiffs failed to state a claim upon which relief could be granted and plaintiffs were given 30 days to refile an amended complaint.

On 29 July, 2015, the plaintiffs filed an amended complaint and we again moved to dismiss. On 26 April, 2016, the court granted a second motion to dismiss, again without prejudice, with leave for plaintiffs to file an amended complaint. Should plaintiffs file another amended complaint or appeal, we plan a vigorous defense. We are unable to predict the ultimate outcome of this matter at this time. While we expect insurance to cover any financial exposure from this litigation, the conclusion of this matter in a manner adverse to us could have a material adverse effect on our financial condition and business. For example, we could incur substantial costs not covered by our directors' and officers' liability insurance, suffer a significant adverse impact on our reputation and divert management's attention and resources from other priorities, including the execution of business plans and strategies that are important to our ability to grow our business, any of which could have a material adverse effect on our business. In addition, any of these matters could require payments that are not covered by, or exceed the limits of, our available directors' and officers' liability insurance, which could have a material adverse effect on our operating results or financial condition.

***We are subject to potential product liability.***

Following the commercial launch of Vascepa, we will be subject to the potential risk of product liability claims relating to the manufacturing and marketing of Vascepa. Any person who is injured as a result of using Vascepa may have a product liability claim against us without having to prove that we were at fault.

In addition, we could be subject to product liability claims by persons who took part in clinical trials involving our current or former development stage products. A successful claim brought against us could have a material adverse effect on our business. We cannot guarantee that a product liability claim will not be asserted against us in the future.

***A change in our tax residence could have a negative effect on our future profitability.***

Under current UK legislation, a company incorporated in England and Wales, or which is centrally managed and controlled in the UK, is regarded as resident in the UK for taxation purposes. Under current Irish legislation, a company is regarded as resident for tax purposes in Ireland if it is centrally managed and controlled in Ireland, or, in certain circumstances, if it is incorporated in Ireland. Where a company is treated as tax resident under the domestic laws of both the UK and Ireland then the provisions of article 4(3) of the Double Tax Convention between the UK and Ireland provides that such enterprise shall be treated as resident only in the jurisdiction in which its place of effective management is situated. We have sought to conduct our affairs in such a way so as to be resident only in Ireland for tax purposes by virtue of having our place of effective management situated in Ireland. Trading income of an Irish company is generally taxable at the Irish corporation tax rate of 12.5%. Non-trading income of an Irish company (e.g., interest income, rental income or other passive income) is taxable at a rate of 25%.

However, we cannot assure you that we are or will continue to be resident only in Ireland for tax purposes. It is possible that in the future, whether as a result of a change in law or the practice of any relevant tax authority or as a result of any change in the conduct of our affairs, we could become, or be regarded as having become resident in a jurisdiction other than Ireland. Should we cease to be an Irish tax resident, we may be subject to a charge to Irish capital gains tax on our assets. Similarly, if the tax residency of any of our subsidiaries were to change from their current jurisdiction for any of the reasons listed above, we may be subject to a charge to local capital gains tax charge on the assets.

## STRATEGIC REPORT (continued)

### Principal risks and uncertainties (continued)

#### Risks Related to our Financial Position and Capital Requirements

*We have a history of operating losses and anticipate that we will incur continued losses for an indefinite period of time.*

We have not yet reached profitability. For the fiscal years ended 31 December, 2015 and 2014, we reported losses of approximately \$97.7 million and \$92.4 million, respectively, and we had an accumulated deficit as of 31 December, 2015 of \$820.5 million. Substantially all of our operating losses resulted from costs incurred in connection with our research and development programs, from general and administrative costs associated with our operations, costs related to the commercialisation of Vascepa, and from non-cash losses on changes in the fair value of warrant derivative liabilities. Additionally, as a result of our significant expenses relating to research and development and to commercialisation, we expect to continue to incur significant operating losses for an indefinite period. Because of the numerous risks and uncertainties associated with developing and commercializing pharmaceutical products, we are unable to predict the magnitude of these future losses. Our historic losses, combined with expected future losses, have had and will continue to have an adverse effect on our cash resources, shareholders' deficit and working capital.

*We may require substantial additional resources to fund our operations. If we cannot find additional capital resources, we will have difficulty in operating as a going concern and growing our business.*

We currently operate with limited resources. We believe that our cash and cash equivalents balance of \$107.6 million as of 31 December, 2015 will be sufficient to fund our projected operations for at least the next twelve months. Depending on the level of cash generated from operations, additional capital may be required to sustain operations.

In order to fully realize the market potential of Vascepa, we may need to enter into a new strategic collaboration or raise additional capital. We may also need additional capital to fully complete our REDUCE-IT cardiovascular outcomes trial.

Our future capital requirements will depend on many factors, including:

- revenue generated from the commercial sale of Vascepa;
- the costs associated with commercializing Vascepa in the United States and for additional indications in the United States and in jurisdictions in which we receive regulatory approval, if any, including the cost of sales and marketing capabilities with our new co-promotion partner, Kowa Pharmaceuticals America, Inc., and the cost and timing of securing commercial supply of Vascepa and the timing of entering into any new strategic collaboration with others relating to the commercialisation of Vascepa, if at all, and the terms of any such collaboration;
- the continued cost associated with our REDUCE-IT cardiovascular outcomes study;
- continued costs associated with litigation and other legal proceedings;
- the time and costs involved in obtaining additional regulatory approvals for Vascepa;
- the extent to which we continue to develop internally, acquire or in-license new products, technologies or businesses; and
- the cost of filing, prosecuting, defending and enforcing any patent claims and other intellectual property rights.

If we require additional funds and adequate funds are not available to us in amounts or on terms acceptable to us or on a timely basis, or at all, our commercialisation efforts for Vascepa may suffer materially, and we may need to delay the advancement of the REDUCE-IT cardiovascular outcomes trial.

*Continued negative economic conditions would likely have a negative effect on our ability to obtain financing on acceptable terms.*

While we may seek additional funding through public or private financings, we may not be able to obtain financing on acceptable terms, or at all. There can be no assurance that we will be able to access equity or credit markets in order to finance our current operations or expand development programs for Vascepa, or that there will not be a further deterioration in financial markets and confidence in economies. We may also have to scale back or further restructure our operations. If we are unable to obtain additional funding on a timely basis, we may be required to curtail or terminate some or all of our research or development programs or our commercialisation strategies.

# Amarin Corporation plc

## STRATEGIC REPORT (continued)

### Disabled employees

Applications for employment by disabled persons are always fully considered, bearing in mind the abilities of the applicant concerned. In the event of members of staff becoming disabled every effort is made to ensure that their employment with the Group continues and that appropriate training is arranged. It is the policy of the Group and the Company that the training, career development and promotion of disabled persons should, as far as possible, be identical to that of other employees.

### Environmental matters

The Group does not manufacture its own product, nor does it store finished goods. The Group leases all of its facilities and as such, it has a very minimal environmental impact. The Group complies with all laws and regulations, but as of this time it does not have a large environmental footprint.

### Employee consultation

The company operates a Framework for employee information and consultation which complies with the requirements of the information and Consultation of Employees Regulations 2004. As of 31 December 2015, the Group had 209 employees including our Chief Executive Officer. There have been no work stoppages and employee relations are good. The Group places considerable value on the involvement of its employees and has continued to keep them informed on matters affecting them as employees and on the various factors affecting the performance of the Group and the Company. Regular meetings are held between local management and employees to allow a free flow of information and ideas. The employee share scheme has been running successfully since its inception and is open to all employees.

### Diversity

Appointments within the Group are made on merit according to the balance of skills and experience offered by prospective candidates. Whilst acknowledging the benefits of diversity, individual appointments are made irrespective of personal characteristics such as race, disability, gender, sexual orientation, religion or age. A breakdown of the employment statistics as of 31 December is as follows:

<b>Position</b>	<b>Male</b>	<b>Female</b>	<b>Total</b>
Executive <sup>(1)</sup>	4	—	4
VP/Directors	19	15	34
Managers	21	9	30
Associates	2	8	10
Sales Professionals	52	79	131
Total Employees	98	111	209

<sup>(1)</sup> Includes our Chief Executive Officer

## STRATEGIC REPORT (continued)

### Social, community & human rights issues

The Group endeavours to impact positively on the communities in which it operates. The Group does not, at present, have a specific policy on human rights. However, we have several policies that promote the principles of human rights. We will respect the human rights of all our employees, including:

- Provision of a safe, clean working environment
- Ensuring employees are free from discrimination and coercion
- Not using child or forced labour
- Respecting the rights of privacy and protecting access and use of employee personal information

We also have an equal opportunities policy and an anti-harassment policy, both of which promote the right of every employee to be treated with dignity and respect and not to be harassed or bullied on any grounds.

### By order of the Board

## CARBON EMISSIONS REPORT

We have adapted our environmental reporting to reflect the requirements of the Companies Act 2006 (Strategic and Directors' Report) Regulations 2013.

We have used the GHG Protocol Corporate Accounting and Reporting Standard methodology to identify our greenhouse gas inventory of Scope 1 (direct) and Scope 2 (indirect) CO<sub>2</sub>. We have considered the six main GHGs and report in CO<sub>2</sub> equivalent.

The Company does not own any of its facilities or manufacturing plants and has no control over the operations of such facilities. The Company considered carbon emissions from business travel as well as purchased electricity and water.

### Assessment Parameters

Baseline year	FY 2013
Consolidation Approach	Operational control/Financial control
Boundary Control	All entities and all facilities owned or under operational control were included
Consistency with Financial Statements	No variation
Assessment methodology	Greenhouse Gas Protocol and ISO 14064-1 (2006)
Intensity Ratio	Emissions per \$m turnover

Greenhouse Gas Emissions Source	2015	2015	2014	2014
	(tCO <sub>2</sub> e)	(tCO <sub>2</sub> e/\$m)	(tCO <sub>2</sub> e)	(tCO <sub>2</sub> e/\$m)
Scope 1	-	-	-	-
Scope 2	1,626	20.1	1,638	30.2

# Amarin Corporation plc

## DIRECTORS' REPORT

The Directors present their report and the audited financial statements for the year ended 31 December 2015.

### Directors

The Directors of the Company at 31 December 2015, who have been Directors for the whole of the year ended on that date, were as follows:

#### *Executive*

Mr. John F. Thero, President Chief Executive Officer

#### *Non-executive*

Dr. James I. Healy

Dr. Lars Ekman

Mr. Jan van Heek

Ms. Kristine Peterson

Mr. Patrick O'Sullivan

Mr. David Stack

Mr. Joseph S. Zakrzewski

### Directors' interests in shares of the Company

The beneficial interests at 31 December 2015 of the persons who on that date were Directors of Amarin Corporation plc in the ordinary shares of the Company were as follows:

	Ordinary shares		Preference shares		Share options/warrants to acquire ordinary shares	
	2015	2014	2015	2014	2015	2014
Mr. J. Thero	379,400	114,900	—	—	7,875,341	2,447,141
Mr. J. Zakrzewski	226,047	226,047	—	—	2,255,669	2,156,667
Dr. J. Healy <sup>(1)</sup>	6,411,588	6,411,588	38,867,180	—	234,002	135,000
Mr. P. O'Sullivan	—	—	—	—	249,002	150,000
Mr. J. van Heek	25,203	25,203	—	—	309,002	210,000
Ms. K. Peterson	—	—	—	—	324,002	225,000
Mr. D. Stack	—	—	—	—	219,002	120,000
Dr. L. Ekman	40,000	40,000	—	—	359,883	251,738

<sup>(1)</sup> The majority of these shares have been issued to Sofinnova Venture Partners VII, L.P., the management company of which Dr. James I. Healy is a Managing General Partner.

### Election of Directors

The Articles provide that, at every Annual General Meeting, one-third of the Directors at the time shall retire from office (or, if the number of Directors at the time is not a multiple of three, then the number nearest to but not exceeding one-third shall retire from office). The Directors elected at the Annual General Meeting will hold office until their successors are elected and qualified, unless they resign or their seats become vacant due to death, removal, or other cause in accordance with the Articles.

## DIRECTORS' REPORT (continued)

### Code of Business Conduct and Ethics

We believe that our Board and committees provide the necessary leadership, wisdom and experience that the Company needs in making sound business decisions. Our Code of Business Conduct and Ethics helps clarify the operating standards and ethics that we expect of all of our officers, Directors and employees in making and implementing those decisions. Waivers of our Code of Business Conduct and Ethics for the benefit of a Director or an executive officer may only be granted by the Board or, if permitted, a committee of the Board, and will be publicly announced promptly in our Securities and Exchange Commission, or SEC, filings. Waivers of our Code of Business Conduct and Ethics for the benefit of other employees may be made by our Compliance Officer, the Board or, if permitted, a committee of the Board. In furthering our commitment to these principles, we invite you to review our Code of Business Conduct and Ethics and other corporate governance materials located on our website at [www.amarincorp.com](http://www.amarincorp.com).

### Indemnification of Directors

Qualifying third party indemnity provisions (as defined in section 234(2) of the Companies Act 2006) are in force for the benefit of the Directors, officers and the Secretary.

### Going concern

The accompanying consolidated financial statements of the Group have been prepared on a basis which assumes that the Group will continue as a going concern, which contemplates the realisation of assets and the satisfaction of liabilities and commitments in the normal course of business. The Group's focus is on the commercialisation of Vascepa.

At 31 December 2015, the Group had cash balances of approximately \$107.6 million. The Group started making sales in 2013 and this will necessitate further expenditure by the Group to continue to commercialise the product and develop the market. Management has considered various scenarios reflecting differing market conditions, and expects as a result of these considerations, together with current planned expenditures, purchase commitments, existing cash resources and latest sales information, that the Group will have sufficient cash to enable it to meet its liabilities as they fall due for at least 12 months from approval of these financial statements.

Therefore, after making inquiries, the Directors have a reasonable expectation that the Group will have adequate resources to continue in operational existence for a period of at least 12 months from the date of approval of these financial statements. For this reason, they continue to adopt the going concern basis in preparing the accounts.

### Reporting currency

The reporting currency of the Company continues to be U.S. Dollars.

### Financial risk management objectives and policies

#### *Liquidity risk*

Our sources of liquidity as of 31 December 2015 include cash and cash equivalents of \$107.6 million. Our projected uses of cash include the continued funding of the REDUCE-IT study, support of the commercialisation of Vascepa, working capital and other general corporate activities. Our cash flows from operating, investing and financing activities are reflected in the consolidated statement of cash flows.

We believe that our cash balance at 31 December 2015 will be sufficient to fund our projected operations for at least the next 12 months, including advancement of the REDUCE-IT cardiovascular outcomes study, support of the commercialisation of Vascepa, working capital and other general corporate activities.

## DIRECTORS' REPORT (continued)

### Financial risk management objectives and policies (continued)

#### *Credit risk*

The Group is exposed to credit-related losses in the event of non-performance by third parties to financial instruments. The Group does not expect any third parties to fail to meet their obligations given the policy of selecting only parties with high credit ratings, and minimising its exposure to any one institution.

#### Future developments

The Directors aim to increase revenues and cash flows through the continued commercialisation of Vascepa under the currently approved MARINE indication. We will also put significant efforts behind the efficient progression of the REDUCE-IT cardiovascular outcomes study, which with a successful outcome, could lead to further commercialisation under the additional indications.

#### Post balance sheet events

See review of the business above and note 36 to the financial statements for details of post balance sheet events.

#### Dividends

Amarin has never paid dividends on its ordinary shares and does not anticipate paying any cash dividends on ordinary shares in the foreseeable future.

#### Research and development activities

The Group has a programme of expenditure on research and development activities. Research and development costs are written off as they are incurred and are included within operating expenses. Research and development costs include staff costs, professional and contractor fees, materials and external services.

#### Disclosure of information to auditor

Each of the persons who is a Director at the date of approval of this report confirms that:

- so far as the Director is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- the Director has taken all the steps that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

#### By order of the Board

/s/ John F. Thero

**John F. Thero**  
Director

## DIRECTORS' REMUNERATION REPORT

### CHAIRMAN OF THE REMUNERATION COMMITTEE'S ANNUAL STATEMENT

Dear Shareholder,

I am pleased to present the Amarin Corporation plc Directors' Remuneration Report for the financial year ended 31 December 2015. This report has been prepared in accordance with Schedule 8 to the Accounting Regulation under the Companies Act 2006 (the "Act").

#### *Overall remuneration framework*

Our philosophy in setting compensation policies for executive officers has two fundamental objectives: (1) to attract and retain a highly skilled team of executives and (2) to align our executives' interests with those of our shareholders by rewarding short-term and long-term performance and tying compensation to increases in shareholder value. The Remuneration Committee believes that executive compensation should be directly linked both to continuous improvements in corporate performance ("pay for performance") and accomplishments that are expected to increase shareholder value. In furtherance of this goal, the Remuneration Committee has adhered to the following guidelines as a foundation for decisions that affect the levels of compensation:

- provide a competitive total compensation package that enables the Company to attract and retain highly qualified executives with the skills and experience required for the achievement of business goals;
- align compensation elements with the Company's annual goals and long-term business strategies and objectives;
- promote the achievement of key strategic and financial performance measures by linking short-term and long-term cash and equity incentives to the achievement of measurable corporate and individual performance goals; and
- align executives' incentives with the creation of shareholder value.

The Remuneration Committee has historically compensated executive officers with three compensation components: base salary, annual and short-term incentive bonuses and long-term equity-based compensation. The Remuneration Committee believes that cash compensation in the form of a base salary and incentive bonuses provides our executives with short-term rewards for success in operations, and that long-term compensation through equity awards aligns the objectives of management with those of our shareholders with respect to long-term performance and success.

#### *Annual bonus incentive*

Pay-out for the annual bonus incentive to our executive officers was based on achievement of 98% of the Company's corporate goals for 2015. The Strategic Report gives full details of the Company's performance in 2015, including:

- Reported \$84.8 million in total revenue in 2015, representing an increase of 56% over 2014 total revenue of \$54.2 million, including \$81.0 million in Vascepa product revenue;
- Achieved two important and unprecedented victories in lawsuits resulting in (i) a federal court ruling giving Amarin the ability, commencing in August 2015, to promote Vascepa to healthcare professionals with truthful and non-misleading information beyond the current FDA-approved labelling based on the principle that the public interest is best served by more informed medical decisions and (ii) a federal court ruling setting aside FDA's denial of New Chemical Entity status for Vascepa resulting in cessation of Vascepa ANDA reviews at FDA and dismissal, without prejudice, in early 2016 of Vascepa ANDA litigation;
- Achieved cumulative patient enrollment in the REDUCE-IT cardiovascular outcomes study of more than 99% of the target total for the study before the end of 2015 and secured support from the independent data monitoring committee (DMC) to continue the study after multiple unblinded reviews by the DMC of safety results of the study;
- Entered a collaboration with Eddingpharm for development and commercialisation of Vascepa in Greater China in which Eddingpharm is responsible for securing regulatory approval and marketing Vascepa, as part of which Eddingpharm paid \$15 million up front, will pay double digit royalties on Vascepa sales, and may pay over \$150 million in additional performance milestones.

In view of the group's overall performance against its goals during the period, I am satisfied that the level of annual performance bonus achieved is appropriate.

## DIRECTORS' REMUNERATION REPORT (continued)

### CHAIRMAN OF THE REMUNERATION COMMITTEE'S ANNUAL STATEMENT (continued)

#### *Equity compensation*

In considering annual equity awards for our executive officers in 2015, our Remuneration Committee identified that the level of equity compensation held by executives at the beginning of 2015 was significantly below the level held by executives with similar roles in the Company's peer group. In an effort to ensure that the Company's executives are highly motivated to achieve pre-determined corporate objectives, consistent with the Remuneration Committee's general goal of setting long-term incentive awards at the 75<sup>th</sup> percentile, it granted equity awards during 2015 with a significant portion of incremental awards above the 50<sup>th</sup> percentile, vesting only upon achievement of certain pre-defined milestones linked to corporate performance. Such equity awards in 2015 were comprised of a mix of time-based stock options (over a four-year period), time-based restricted stock unit awards (over a three- or four-year period), and performance-based stock options and restricted stock unit awards that vest only upon the achievement of certain pre-defined milestones. The 2015 stock option grant was targeted at the market 50<sup>th</sup> percentile and the 2015 restricted stock unit awards were intended to close the gap between the 50<sup>th</sup> and the 75<sup>th</sup> percentile with respect to 2015 compensation over three years after the grants, if such awards are earned consistent with applicable vesting and performance criteria. Non-executive directors were issued equity awards in 2015 comprised of a mix of time-based stock options and restricted stock unit awards consistent with the Company's non-executive director compensation program as described beginning on page 31 of this report.

#### *Changes to director remuneration in 2015 and 2016*

Effective 1 February, 2015, the base salary of Mr. John Thero, President and Chief Executive Officer of the Company and its sole executive director, increased to \$520,000 (2014: \$500,000). Effective 1 February, 2016, the base salary of Mr. John Thero, President and Chief Executive Officer of the Company and its sole executive director, increased to \$580,300. Base salary is targeted near the 50<sup>th</sup> percentile for CEOs within our peer group.

No changes were made to the non-executive director compensation program for 2015 and none are expected to be made for 2016.

We continue to be committed to open disclosure of the Company's remuneration practices and hope to receive your support at this year's Annual General Meeting of Shareholders.

/s/ James I. Healy

**James I. Healy, M.D., Ph.D.**

Chairman of the Remuneration Committee

## DIRECTORS' REMUNERATION REPORT (continued)

The Act requires the Company's auditor to report to the Company's members on certain parts of the Directors' Remuneration Report and to state whether in their opinion those parts of the report have been properly prepared in accordance with the Accounting Regulations under the Act. The report has therefore been divided into separate sections for audited and unaudited information.

### UNAUDITED INFORMATION

#### Remuneration Committee

The Company has established a Remuneration Committee. The terms of reference of the Remuneration Committee are available at the Company's website at [www.amarincorp.com](http://www.amarincorp.com).

The members of the Remuneration Committee at 31 December 2015 were Dr. James Healy, Mr. David Stack and Mr. Jan van Heek, who are all independent non-executive directors, and the Remuneration Committee is chaired by Dr. Healy. None of the members of the Remuneration Committee have any personal financial interest (other than as shareholders), conflicts of interest arising from cross-directorships or day-to-day involvement in running the business.

The Remuneration Committee determines the individual remuneration packages of each executive director and other members of the executive committee. No director plays a part in any discussion about his or her own remuneration.

#### Directors' remuneration policy report

The tables below summarise the remuneration policy, by component, for executive and non-executive directors. The Company's policy on remuneration is to attract, retain and incentivise highly qualified executives, recognising that they are key to the success of the business, and to align our directors' and senior management's interests with those of our shareholders by rewarding short-term and long-term performance and tying compensation to increases in shareholder value.

Consistent with this policy, the Company's benefit packages awarded to directors and senior management are intended to be competitive and comprise a mix of remuneration (historically consisting of base salary, annual cash incentive bonus and equity-based compensation) with the goals listed below, while not detracting from the goals of good corporate governance:

- provide a competitive total compensation package that enables the Company to attract and retain highly qualified directors and senior management with the skills and experience required for the achievement of business goals;
- align compensation elements with the Company's annual goals and long-term business strategies and objectives;
- promote the achievement of key strategic and financial performance measures by linking short-term and long-term cash and equity incentives to the achievement of measurable corporate and individual performance goals; and
- align the incentives of directors and senior management with the creation of shareholder value.

The Company's American Depositary Shares ("ADSs") are listed on the NASDAQ Global Market ("NASDAQ") and the Company is therefore subject to NASDAQ corporate governance rules.

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

The Company's peer group with respect to staffing lies within the pharmaceutical and biotechnology industries. Subject to changes in the industry and to competitive and other pressures, the Company will generally align its rates of remuneration with this sector, both in terms of overall packages and the division between basic and performance-related elements. However, it is recognised that such competition is only one of a number of factors to be taken into account.

Long-term incentives are provided to directors and senior management in the form of executive share options and, additionally, in the case of executive directors and senior management, by the granting of end-of-year cash bonuses that are specifically designed to reward executives for overall corporate performance as well as individual performance in a given year. Share options are granted to directors and senior management to aid in their retention, to motivate them to assist with the achievement of corporate objectives and to align their interests with those of our shareholders by creating a return tied to the performance of our stock price. It is the intention of the Board of Directors (the "Board") to grant share options to executive directors and senior management in the furtherance of these objectives and to reward performance. Additionally, the Board may award options from time to time to non-executive directors as is relatively standard practice in the U.S.

Share options are currently granted to directors and senior management pursuant to the Amarin Corporation plc 2011 Stock Incentive Plan approved by the shareholders in general meeting on 12 July 2011 (the "2011 Plan"). The maximum number of the Company's ordinary shares of £0.50 each or any ADSs, as the case may be (the "Shares"), to be issued under the 2011 Plan shall not exceed the sum of (i) 31.5 million Shares, (ii) the number of Shares that remain available for grants under the Company's existing 2002 Stock Option Plan (the "2002 Plan") as of 12 July 2011 and (iii) the number of Shares underlying awards under the 2002 Plan that are outstanding as of 12 July 2011 that are subsequently forfeited, cancelled, expire or are otherwise terminated. The Remuneration Committee may grant options to eligible persons. In determining which eligible persons may receive an award of options and become participants in the 2011 Plan, as well as the terms of any option award, the Remuneration Committee may take into account the nature of the services rendered to us by the eligible persons, their present and potential contributions to our success or such other factors as the Remuneration Committee, at its discretion, shall deem relevant.

In the event that a director resigns, then under the 2011 Plan, the director's unvested options lapse, and vested but unexercised options will lapse 12 months following the date of such resignation. Upon the initial appointment or re-election to the Board, non-executive directors will be eligible to receive equity awards split equally in value between options and restricted stock units, the latter of which are subject to deferred settlement upon the director's separation of service with the company (such restricted stock units, "DSUs"). In addition, for so long as the non-executive director remains on the Board, on an annual basis the non-executive director will be eligible to receive an additional equity award, such award to be made each year immediately after the company's annual general meeting of shareholders, split equally in value between options and DSUs. In addition, a non-executive Chairman of the Board that continues on the Board following the company's annual general meeting of shareholders, and who was not first elected to the Board at such meeting, will be eligible to receive an annual equity award split equally in value between options and DSUs. Share options granted to non-executive directors pursuant to the Option Plan typically vest in full upon the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year, while DSUs vest in equal annual instalments over three years commencing upon the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year. Share options granted to new employees typically vest 25% upon the one-year anniversary of the date of hire and then vest rateably over the subsequent 36-month period.

The Remuneration Committee has the delegated authority of the Board to vary the remuneration of executive directors and senior management to include the award of end-of-year bonuses and grant of options. The Remuneration Committee awards performance-based cash bonuses based in part on the Company's achievement of corporate goals. In addition, the Remuneration Committee considers the individual performance of the Company's executive directors and senior management and the level of each such individual's accountability, scope of responsibilities and impact on the Company's performance during the course of the year as well as corporate achievement beyond established goals. The Remuneration Committee also considers its own understanding of what executives with similar functions at similarly situated companies typically receive for performance-based cash compensation so as to ensure that the Company's executive directors and senior management are properly remunerated.

# Amarin Corporation plc

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

##### Remuneration policy – executive directors

The following policy applies to the Company's sole executive director, Mr. John Thero, President and Chief Executive Officer.

Component of remuneration package – purpose and link to strategy	Operation	Opportunity	Performance Measures
<i>Basic salary</i>			
Our Remuneration Committee aims to set executives' base salaries, in the aggregate, at levels near the 50 <sup>th</sup> percentile of salaries of executives with similar roles at the Company's peer group. The Remuneration Committee believes it is important to provide adequate fixed compensation to our executive officers working in a highly volatile and competitive industry.	Salaries are reviewed annually and fixed for 12 months from 1 February.  Salaries are paid semi-monthly in arrears, in cash.	Adjustments to base salary are considered annually in light of each executive officer's individual performance, the Company's performance and compensation levels at peer companies in our industry, as well as changes in job responsibilities or promotion.  Effective 1 February 2015, an increase to Mr. Thero's salary to \$520,000 was approved (2014: \$500,000). Effective 1 February 2016, an increase to Mr. Thero's salary to \$580,300 was approved.	Not applicable.
<i>Annual bonus incentive</i>			
The Company provides executive officers with performance-based cash bonuses, which are specifically designed to reward executives for overall corporate performance as well as individual performance in a given year.	Payable in cash on an annual basis at the discretion of the Remuneration Committee.	The bonus potential for Mr. Thero for 2015 was 65% of his base salary and the individual goals of Mr. Thero match the Company's corporate goals 100%. The corporate goals are based on achievement of various operational criteria.  The bonus potential for Mr. Thero for 2016 will be 75% of his base salary and the individual goals of Mr. Thero will continue to match the Company's corporate goals 100%.	See discussion of the 2015 corporate goals below.  2016 corporate goals relate primarily to revenue (40%) and clinical (30%) performance measures, with percentages reflecting the relative weighting of the bonus to the performance measures.

# Amarin Corporation plc

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

##### Remuneration policy – executive directors (continued)

<i>Special incentive bonus programs</i>			
From time to time, the Remuneration Committee establishes special bonus programs to incentivise individual performance towards goals that are judged by the Remuneration Committee as important for corporate progress, very difficult to achieve, and of significant shareholder value if achieved.	Payable in cash upon achievement of the specified criteria as determined at the discretion of the Remuneration Committee.	The amount of the bonus is determined by the Remuneration Committee on a case-by-case basis.	All such bonuses awarded to Mr. Thero were achieved in 2015 and, as such, there are no remaining performance measures outstanding. See discussion of variable performance-related awards made in 2015 in the Annual Report on Remuneration below.
<i>Equity compensation</i>			
Executive officers are eligible to receive equity compensation in the form of stock options and restricted stock units (RSUs). The Remuneration Committee grants stock options and RSUs to executive officers to aid in their retention, to motivate them to assist with the achievement of both near-term and long-term corporate objectives and to align their interests with those of our shareholders by creating a return tied to the performance of our stock price.	Awards are granted at the discretion of the Remuneration Committee based on individual performance and contributions.	All share options will be awarded at fair market value and calculated based on the closing market price on the grant date.	Each award grant has pre-specified time-based and performance vesting criteria.
<i>Employee benefits</i>			
Executive officers are eligible to participate in all of our employee benefit plans, including medical, dental, group life, disability and accidental death and dismemberment insurance, in each case on the same basis as other employees, subject to applicable law.	Executive officers receive private health insurance from the date of appointment.	The value of the private health insurance awarded to executive officers is dependent on the individual's circumstances.	Not applicable.

Information in respect of performance measures or targets, in the opinion of the directors, is commercially sensitive in respect of the Company.

Such details will be reported upon achievement of the performance criteria.

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

##### *Remuneration policy – executive directors (continued)*

**2015 Corporate Goals:** The following represent the Company's 2015 corporate goals. The related percentages assigned represent the percentage allocated to each set of functional goals, the total of which comprises 100% of the corporate goals. The goals may be determined to have been achieved on a graded basis at the discretion of the Remuneration Committee based on partial achievement of the functional goals.

**Sales & Marketing (50%):** These goals established target performance for the Company regarding the commercialisation of Vascepa for the FDA-approved MARINE indication. The specific goals were as follows:

- Revenues: Achieve net revenue growth per 2015 Operating Plan

**Clinical / Regulatory / Medical Affairs (10%):** These goals established target performance for the Company in clinical development progress. The specific goals were as follows:

- Outcomes study: Achieve enrollment target by year end (or terminate study effectively if Board elects to terminate)
- Research data: Complete and publish pre-specified areas of research related to Vascepa

**International (10%):** These goals established target performance for the Company in connection with business development efforts. The specific goals were as follows:

- Ex-U.S. partner: Complete at least one collaboration for Vascepa outside the United States

**Supply (15%):** These goals established target performance for the Company in connection with securing supply of the active ingredient for Vascepa. The specific goals were as follows:

- Purchases: Secure supply consistent with 2015 Operating Plan at average prices consistent with 2015 Operating Plan
- Commitments: Reduce minimum aggregate API purchase commitments to prior levels while ensuring third API supplier is viable to support future growth

**Financial and Public Relations / Investor Relations (15%):** These goals established target performance for the Company regarding financial and investor relations matters. The specific goals were as follows:

- Cash burn: Cash burn from operations not greater than target per 2015 Operating Plan
- Financing: Complete financing transaction to strengthen balance sheet
- Stock price: Achieve performance that exceeds peer group

##### *Approach to recruitment remuneration – executive directors*

The ongoing remuneration package for a newly recruited executive director is determined by the Remuneration Committee using the policy set out above. To facilitate recruitment, the Remuneration Committee may also make one-off awards to a newly recruited external executive director in the form of a sign-on bonus or to reimburse relocation expenses. Such awards are assessed on a case-by-case basis.

##### *Loss of office – executive directors*

As of 31 December 2015, in the event that Mr. Thero had been terminated without cause or resigned for good reason, he would have been entitled to severance as follows: continuation of base salary for twelve (12) months; continuation of group health plan benefits for up to twelve (12) months; and twelve (12) months of accelerated vesting on all outstanding equity incentive awards to the extent subject to time-based vesting. If Mr. Thero was terminated without cause or he quit for good reason as of 31 December 2015, in either case, within twenty-four (24) months following a change of control, then he would have been entitled to severance as follows: continuation of base salary for eighteen (18) months; continuation of group health plan benefits for up to eighteen (18) months to the extent authorized by and consistent with COBRA; a lump sum cash payment equal to the full target annual performance bonus for the year during which the termination occurred; and 100% acceleration of vesting on all outstanding equity incentive awards.

###### Illustrations of application of remuneration policy

The chart below provides an indication of the expected remuneration for executive directors (i.e., Chief Executive Officer) and at three level scenarios: Minimum, On-plan and Maximum.

In developing the scenarios, the following assumptions have been made:

**Minimum:** Fixed elements of remuneration comprise basic salary and benefits. CEO's salary is the last known salary and benefits are measured as set forth on the single total figure of remuneration table.

**On Plan:** Fixed elements of remuneration are as for the minimum scenario. The annual variable element pays out at 75% of the annual bonus target.

**Maximum:** Fixed elements of remuneration are as for the minimum scenario. The annual variable element pays out at 100% of the annual bonus target.

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

##### *Remuneration policy – non-executive directors*

Component	Purpose and link to strategy	Operation
Fees	The annual retainer fees are commensurate with the time each director is expected to spend on the Company's affairs and with the responsibility assumed as director of a listed Company. The fee amounts are intended to approximate the 50 <sup>th</sup> percentile of non-executive director compensation within the Company's peer group.	The remuneration of non-executive directors is set annually by the Board having taken advice on appropriate levels. The current level of fees, which are reviewed annually, are detailed below.  Non-executive directors are also reimbursed for their reasonable out-of-pocket expenses incurred in connection with attending Board and committee meetings.
Additional fees payable for duties	The additional fees payable to the Chairman and members of the Board committees reflect the additional time commitment in preparing and attending meetings and in relation to the Chairmen of the Board committees, outside these meetings.	
Equity compensation	Equity incentive awards are granted to new and continuing directors as described below.	All share options will be awarded at fair market value and calculated based on the closing market price on the grant date.

##### *Retirement and re-election of directors*

The Company's Articles of Incorporation provide that, at every annual general meeting, at least one-third of the directors at the time shall retire from office (or, if the number of directors at the time is not a multiple of three, then the number nearest to but not exceeding one-third shall retire from office). The directors elected at the Annual General Meeting of Shareholders will hold office until their successors are elected and qualified, unless they resign or their seats become vacant due to death, removal, or other cause in accordance with the Articles.

The Company is not currently a party to a service contract with any of its non-executive directors. Current non-executive directors are paid under the Company's non-executive director compensation policy which is summarised below.

##### *Statement of consideration of employment conditions elsewhere in the group*

The Company has not formally consulted with employees when drawing up the directors' remuneration policy. However, the Company considers any informal feedback received via employee staff surveys or other channels.

##### *Statement of consideration of shareholders' views*

The Remuneration Committee takes very seriously the views of shareholders when making changes to executive remuneration arrangements. The Remuneration Committee notes the high historic level of approval from shareholders for the Directors' Remuneration Report and thanks shareholders for their continuing support.

The Remuneration Committee welcomes shareholders' views on the executive remuneration package. The Remuneration Committee continues to challenge whether the executive remuneration arrangements align with the group's strategy, and to respond to best practice and any concerns or views expressed by our institutional investors.

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

##### *Remuneration policy – non-executive directors (continued)*

The Nominating and Corporate Governance Committee, which acts as the Company's nominating committee, reviews and recommends to the Board potential nominees for election to the Board. In reviewing potential nominees, the Nominating and Corporate Governance Committee considers the qualifications of each potential nominee in light of the Board's existing and desired mix of experience and expertise. Specifically, as set forth in our Nominating and Corporate Governance Committee Charter, it considers whether the nominee satisfies the following minimum criteria: has experience at a strategic or policymaking level in a business, government, non-profit or academic organisation of high standing; is highly accomplished in his or her field, with superior credentials and recognition; is well regarded in the community and has a long-term reputation for the highest ethical and moral standards; has sufficient time and availability to devote to the affairs of the Company, particularly in light of the number of boards on which the nominee may serve; has a demonstrated history of actively contributing at board meetings (to the extent that the nominee serves or has previously served on other boards). In addition to these minimum qualifications, the Nominating and Corporate Governance Committee recommends that the Board select persons for nomination to help ensure that: a majority of the Board shall be independent in accordance with in the listing standards of NASDAQ; each of the Company's Audit Committee, Remuneration Committee and Nominating and Corporate Governance Committee shall be comprised entirely of independent directors; and at least one member of the Audit Committee shall qualify as an audit committee financial expert as defined by Securities and Exchange Commission ("SEC") regulations. In addition, the Nominating and Corporate Governance Committee may consider whether the nominee has direct experience in the pharmaceutical, biotechnology or healthcare industries or in the markets in which the Company operates and whether the nominee, if elected, would assist in achieving a mix of Board members that represents a diversity of background and experience. Although the Nominating and Corporate Governance Committee may consider whether nominees assist in achieving a mix of Board members that represents a diversity of background and experience, which is not only limited to race, gender or national origin, we have no formal policy regarding board diversity.

After reviewing the qualifications of potential Board candidates, the Nominating and Corporate Governance Committee presents its recommendations to the Board, which selects the final director nominees. Upon the recommendation of the Nominating and Corporate Governance Committee, the Board nominated Mr. Zakrzewski and Ms. Peterson for re-election as directors at the Company's 2016 annual general meeting.

##### *Non-executive director compensation*

The levels of fees payable in 2015 and 2016 are as follows:

	<b>Retainer and Meeting Fees</b>
<b>Annual Board Retainer Fee:</b>	
Non-Executive Chairman	\$ 95,000
All other non-executive directors	\$ 55,000
<b>Annual Chairman Retainer Fees:</b>	
Audit Committee Chairman	\$ 20,000
Remuneration Committee Chairman	\$ 15,000
Nominating and Corporate Governance Committee Chairman	\$ 10,000
<b>Annual Committee Member Retainer Fees:</b>	
Audit Committee	\$ 10,000
Remuneration Committee	\$ 7,500
Nominating and Corporate Governance Committee	\$ 5,000

Upon recommendation of the Remuneration Committee, the Board approved an amended non-executive director compensation program effective 1 January 2014. The amended non-executive director compensation program was intended to approximate the 50<sup>th</sup> percentile of non-executive director compensation within the Company's peer group. The annual retainers are paid in equal instalments made in arrears within thirty days of the end of each calendar quarter, or upon the earlier resignation or removal of the non-executive director. Amounts owing to non-executive directors as annual retainers shall be annualised, meaning that for non-executive directors who join the Board during the calendar year, such amounts shall be on a pro rata basis depending on the number of calendar days served by such director.

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Directors' remuneration policy report (continued)

##### *Remuneration policy – non-executive directors (continued)*

##### *Non-executive director compensation (continued)*

Non-executive directors shall be given an annual election option, which option is to be exercised within ten calendar days of the end of each quarter of receiving their annual retainers in the form of either (i) cash or (ii) unregistered non-ADR ordinary shares, with any such issuances to be priced at the greater of (i) the closing price of the Company's ADSs on NASDAQ on the date which is ten calendar days after the end of each quarter or (ii) £0.50 per ordinary share (i.e., par value).

In addition, upon their initial appointment or re-election to the Board of Directors, non-executive directors will be eligible to receive equity awards valued at \$135,000 based on a consistently-applied, Black Scholes methodology, split equally in value between option awards and DSUs. The DSUs are subject to deferred settlement upon the director's separation of service with the Company and vest in equal instalments over three years on the anniversary of the date of grant. The grant date for such awards will be the date of such initial appointment or re-election, as the case may be, and the exercise price of any such option award shall be equal to the closing market price on NASDAQ of the Company's ordinary shares (and represented by ADSs) on the date of such appointment or re-election to the Board of Directors.

In addition, for so long as the non-executive director remains on the Board, the non-executive director will be eligible to receive annual equity awards valued at \$90,000 based on a consistently-applied, Black Scholes methodology, split equally in value between option awards and DSUs. Such award for ordinary shares will vest in full upon the earlier of the one-year anniversary of the date of grant or the annual general meeting of shareholders in such anniversary year. Such DSUs will vest in equal annual instalments over three years, in each case upon the earlier of the anniversary of the date of grant or the annual general meeting of shareholders in such anniversary year. Except with respect to grants made in 2014, the grant date for such awards will be the date of the Company's annual general meeting of shareholders, and the exercise price of any such option award shall be equal to the closing market price on NASDAQ of the Company's ordinary shares (and represented by ADSs) on the date of such meeting. In addition, the non-executive directors are also eligible to participate in the Company's stock option plans on a case-by-case basis. Non-executive directors are also reimbursed for their reasonable out-of-pocket expenses incurred in connection with attending Board and committee meetings.

In addition, a non-executive chairman of the Board that continues on the Board following the Company's annual general meeting of shareholders (and who was not first elected to the Board at such meeting) will be eligible to receive an annual equity award valued at \$20,000 based on a consistently-applied, Black Scholes methodology, split equally in value between option awards and DSUs. Except with respect to such awards made in 2014, such awards will have a grant date and exercise price identical to other annual equity awards.

On 6 July 2015, the Company awarded options representing the right to purchase 40,502 Ordinary Shares and 58,500 DSUs to each of Dr. Healy, Mr. O'Sullivan, Ms. Peterson, Mr. Stack, Mr. Zakrzewski and Mr. van Heek in connection with their service on the Board. For each grantee, 23,144 options and 18,000 DSUs will vest in full upon the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year, while 17,358 options and 40,500 DSUs will vest in equal annual instalments over three years commencing on the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year. The total grant-date fair value of each of these awards was \$66,365 and \$146,250, respectively, based on a closing price of \$2.50 on NASDAQ of the ADSs representing the Company's Ordinary Shares on the date of grant.

In addition, on 6 July 2015, the Company awarded 45,645 options and 62,500 DSUs to Dr. Ekman in connection with his service on the Board and as Non-Executive Chairman of the Board. Of these awards, 28,287 options and 22,000 DSUs will vest in full upon the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year, while 17,358 options and 40,500 DSUs will vest in equal annual instalments over three years commencing on the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year. The total grant-date fair value of these awards was \$74,594 and \$156,250, respectively, based on a closing price of \$2.50 on NASDAQ of the ADSs representing the Company's Ordinary Shares on the date of grant.

##### *Directors' interest in shares*

The directors serving in the financial year and their interest in the share capital of the Company (all beneficially held, other than with respect to options to acquire the ordinary shares) are as follows:

	At 31 December 2015	At 31 December 2014
	Ordinary Shares	Ordinary Shares
Dr. J. Healy <sup>(1)</sup>	10,298,306	6,411,588
Mr. J. van Heek	25,203	25,203
Dr. L. Ekman	40,000	40,000
Ms. K. Peterson	-	-
Mr. P. O'Sullivan	-	-
Mr. D. Stack	-	-
Mr. J. Zakrzewski	226,047	226,047
Mr. J. Thero (executive director)	379,400	114,900

(1) At 31 December 2015, includes 6,321,588 ordinary shares and 3,886,718 ordinary shares issuable upon conversion of 38,867,180 shares of Series A Convertible Preference Shares owned directly by Sofinnova Venture Partners VII, L.P. and 90,000 shares directly owned by Dr. Healy. At 31 December 2014, includes 6,321,588 ordinary shares owned directly by Sofinnova Venture Partners VII, L.P. and 90,000 shares directly owned by Dr. Healy. Dr. Healy may be deemed to have shared voting and dispositive power over the shares owned by Sofinnova Venture Partners VII, L.P. via Sofinnova Management VII, LLC (the general partner of Sofinnova Venture Partners), of which he is a managing general partner, but Dr. Healy disclaims beneficial ownership of the shares except to the extent of his pecuniary interest in Sofinnova Management VII, LLC.

None of the interests in ordinary shares were subject to performance measures.

##### *Share options and restricted/deferred stock units granted*

Share options and restricted/deferred stock units granted to directors in 2015 were as follows:

	Share Options	Restricted/Deferred Stock Units
Dr. J. Healy	40,502	58,500
Mr. J. van Heek	40,502	58,500
Dr. L. Ekman	45,645	62,500
Ms. K. Peterson	40,502	58,500
Mr. P. O'Sullivan	40,502	58,500
Mr. D. Stack	40,502	58,500
Mr. J. Zakrzewski	40,502	58,500
Mr. J. Thero (executive director)	1,800,000	3,910,500
<b>Total</b>	<b>2,088,657</b>	<b>4,324,000</b>

For each non-executive director with the exception of Dr. Ekman, 23,144 options and 18,000 DSUs will vest in full upon the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year, while 17,358 options and 40,500 DSUs will vest in equal annual instalments over three years commencing on the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year. For Dr. Ekman, 28,287 options and 22,000 DSUs will vest in full upon the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year, while 17,358 options and 40,500 DSUs will vest in equal annual instalments over three years commencing on the earlier of the one-year anniversary of the grant date or the annual general meeting of shareholders in such anniversary year.

For Mr. Thero, 1,000,000 options vest monthly over four years commencing on the last day of the month of grant, while 800,000 options vest upon achievement of certain financial performance criteria, and 780,000 RSUs vest in equal annual instalments over three years commencing 31 January 2016, 600,000 RSUs vest in equal quarterly instalments over four years commencing 30 September 2015, and 2,530,500 RSUs vest upon achievement of certain financial and clinical performance criteria.

- (1) These share options were issued to the individual as a director.
- (2) The share options were issued to Mr. Zakrzewski as a director in 2009, 2014, and 2015. The additional share options were issued to Mr. Zakrzewski as Chief Executive Officer in 2010, 2011, 2012 and 2013. Mr. Zakrzewski resigned as Chief Executive Officer of Amarin on 31 December 2013 and as a result, forfeited all unvested equity awards on such date that were issued in his capacity as Chief Executive Officer of Amarin.
- (3) The share options were issued to Mr. Thero as Chief Financial Officer in 2009, as President in 2010, 2012 and 2013, and as President and Chief Executive Officer in 2014 and 2015.
- (4) These share options are exercisable subject to the achievement of certain financial and clinical performance criteria.

During the year ended 31 December 2015, no other directors have been granted share options in the shares in the Company or other group entities.

## **DIRECTORS' REMUNERATION REPORT (continued)**

### **AUDITED INFORMATION (continued)**

#### **Annual report on remuneration (continued)**

##### *Interests in share options and warrants over Amarin Corporation plc (continued)*

The market price of the Company's shares at the end of the financial year was US\$1.89 and the range of the market prices during the year was between US\$0.98 and US\$3.33.

##### *Long-term incentive scheme*

There are no long-term incentive schemes in place in respect of any of the directors.

##### *Share ownership guidelines*

The Company believes it is important to align the interests of the directors with those of its shareholders. To this end, in March 2013, the Company established Share Ownership Guidelines for its executive and non-executive directors. The guidelines require that each director maintain an equity interest in the Company at least equal to three times the amount of such director's annual salary or cash retainer. Equity interests that count toward the satisfaction of the ownership guidelines include the value of ordinary shares owned beneficially and ordinary shares issuable, the settlement of restricted stock or restricted stock units, and unvested deferred stock units. The calculation of a director's equity **interest**, however, does not include the value of share options (whether or not vested), unvested restricted stock, and unvested restricted stock units, except unvested deferred stock units. Directors have five years from the date of the commencement of their appointment as a director to attain these ownership levels. If a director does not meet the guideline by the end of the five-year period, the director is required to hold a minimum of 50% to 100% of the shares resulting from any future equity awards until the guideline is met, net of shares sold or withheld to exercise share options and pay withholding taxes. The Remuneration Committee, however, may make exceptions for any director on whom this requirement could impose a financial hardship. As of the date of this Directors' Remuneration Report, all of the Company's directors have satisfied these ownership guidelines, or have time to do so.

# Amarin Corporation plc

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION

#### Annual report on remuneration

##### Relative importance of spend on pay

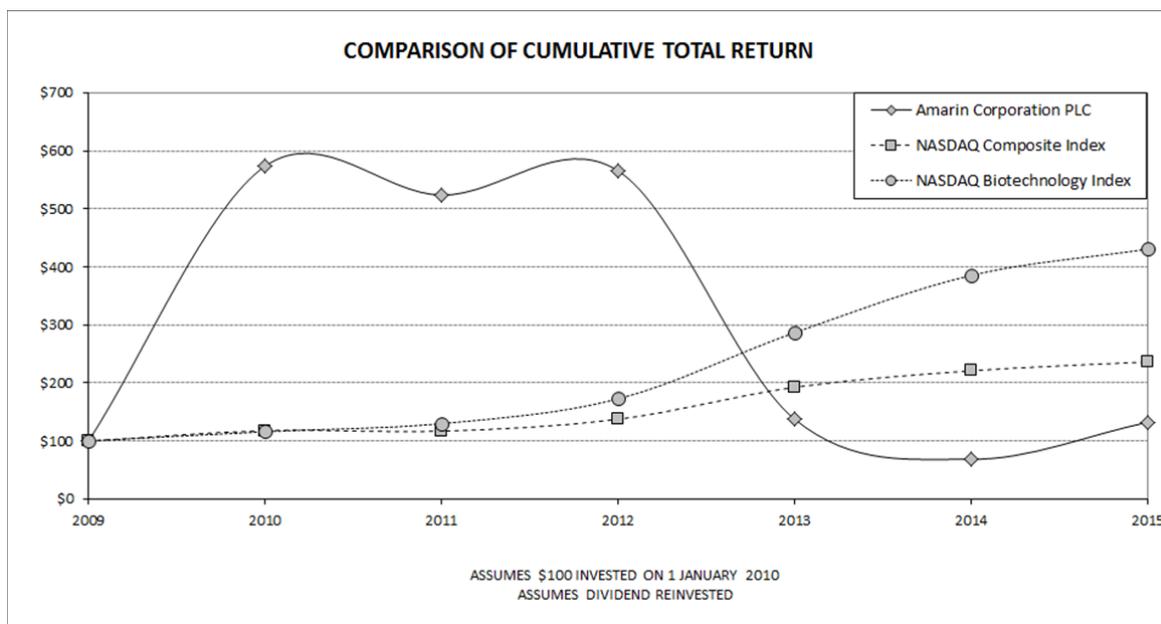

The table below shows the group's total employee remuneration for the current and prior years and the year-on-year change. There were no dividends distributed in either period.

	2015 (\$000)	2014 (\$000)	Change (\$000)
Employee remuneration	\$53,456	\$35,389	\$18,067

Employee remuneration includes total staff costs as shown in note 8 to the group financial statements. The increase in 2015 was primarily the result of an increase in new stock option and restricted stock awards granted to attract and retain qualified employees, increased headcount and larger bonus pay-outs.

##### Total Shareholder Return Performance Graph

The following graph compares the cumulative six-year return provided to stockholders of Amarin Corporation plc's ADSs relative to the cumulative total returns of the NASDAQ Composite Index and the NASDAQ Biotechnology Index. We believe these indices are the most appropriate indices against which the total shareholder return of Amarin should be measured. The NASDAQ Biotechnology Index has been selected because it is an index of U.S. quoted biotechnology and pharmaceutical companies. An investment of \$100 (with reinvestment of all dividends) is assumed to have been made in our ADSs and in each of the indexes on 1 January 2010 and its relative performance is tracked through 31 December 2015.

Company/Market/Peer Company	12/31/2010	12/31/2011	12/31/2012	12/31/2013	12/31/2014	12/31/2015
Amarin Corporation PLC	\$573.43	\$523.78	\$565.73	\$137.76	\$68.53	\$132.17
NASDAQ Composite Index	\$118.02	\$117.04	\$137.47	\$192.62	\$221.02	\$236.41
NASDAQ Biotechnology Index	\$116.06	\$130.08	\$172.67	\$286.67	\$385.29	\$430.64

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Annual report on remuneration (continued)

##### Chief Executive Officer remuneration – Six year comparison

The table below summarises the Chief Executive Officer's single total figure of remuneration, annual and long-term variable performance-related remuneration (and the percentage of the maximum opportunity that these represent) in relation to the past six years.

Year	Chief Executive Officer	Single total figure of remuneration \$	Annual variable element (actual award versus maximum opportunity) \$ (and % vesting) (1)(2)	Long-term incentive (vesting versus maximum opportunity) \$ (and % vesting) (1)(3)
2015	J. Thero	1,607,384	638,000 (76.1%) (8)	430,695 (10.1%) (9)
2014	J. Thero	762,293	243,750 (42.4%) (4)	— (25.7%) (6)
2013	J. Zakrzewski	759,771	— (0.0%) (5)	178,289 (54.0%) (7)
2012	J. Zakrzewski	9,215,275	305,525 (101.0%)	8,347,750 (45.6%) (7)
2011	J. Zakrzewski	6,050,030	159,588 (93.6%)	5,568,900 (30.0%)
2010	J. Zakrzewski (10)	556,630	100,000 (100.0%)	292,500 (27.8%)
	C. Stewart (11)	116,985	— (0.0%)	— (0.0%)
	D. Doogan (12)	869,203	140,000 (87.5%)	292,500 (38.4%)

##### Notes to CEO remuneration table:

- (1) The single total figure of remuneration, annual variable element and long-term incentive amounts for 2015 and 2014 are as reported in the total, annual performance-related remuneration, and long-term performance-related remuneration columns, respectively, of the single total figure of remuneration table on page 34. The notes to that table explain how these amounts have been calculated. Amounts for previous years have been computed on the same basis. These amounts, therefore, represent the awards that achieved all performance vesting conditions by the end of the relevant financial year (even if subject to further service conditions). The percentage vesting compared to the maximum opportunity calculates the percentage that the amounts described above bear to the amounts that would have been reported in these columns if the maximum award had vested.
- (2) Comprises achievement of annual bonus incentive only unless otherwise specified.
- (3) Comprises vesting of time-based share options only unless otherwise specified.
- (4) Comprises 75% achievement of annual bonus incentive and 0% achievement of special incentive bonus.
- (5) Comprises 0% achievement of annual bonus incentive and 0% vesting of performance-related share options.
- (6) Comprises vesting of 100% time-based share options per approved vesting schedules and 0% achievement of long-term performance incentives. 186,252 of share options vested out of a total maximum of 725,564; however, there is no cash value attributable to the vested share options, due to the strike price being lower than the market rate throughout the current year.
- (7) Comprises vesting of 100% share options per approved vesting schedules and 33% achievement of long-term performance incentives.
- (8) Comprises 100% achievement of annual bonus incentive and 60% achievement of special incentive bonuses.
- (9) Comprises vesting of 100% time-based share options per approved vesting schedules and 0% achievement of long-term performance incentives.
- (10) Mr. Zakrzewski served as CEO beginning 10 November 2010.
- (11) Mr. Stewart served as interim CEO for the period 16 August 2010 through 10 November 2010.
- (12) Mr. Doogan served as interim CEO for the period 1 January 2010 through 16 August 2010.

# Amarin Corporation plc

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Annual report on remuneration (continued)

##### *Comparison of CEO remuneration to employee remuneration*

	CEO remuneration (1)			Employee remuneration (2)
	2015 \$	2014 \$	2015 % increase	2015 % increase
Salaries and fees	518,333	500,000	3.7%	8.0%
Taxable benefits	20,356	18,543	9.8%	0.2%
Annual variable performance-related remuneration	638,000	243,750	161.7%	27.6%
Total	<b>1,176,689</b>	<b>762,293</b>	<b>54.4%</b>	
Single total figure of remuneration	<b>1,607,384</b>	<b>762,293</b>	<b>110.9%</b>	

Notes to Comparison of CEO remuneration to employee remuneration table:

- (1) CEO remuneration is from the single total figure of remuneration table on page 34.
- (2) The % increase in average remuneration for employees is calculated using wages and salaries (excluding share-based payments) of \$22,500,000 (2014: \$19,626,000), analysed into the three components in the table, and the average number of employees of 207 (2014: 195), both as detailed in note 8 to the group financial statements. These figures for employees are considered comparable with the components of remuneration required to be included for the CEO.

The Chief Executive Officer's total remuneration (attributable to salary, taxable benefits and annual variable performance-related remuneration) in 2015 increased by 54.4%, while the total remuneration increased by 110.9%, reflecting the achievement of the two special incentive bonuses as well as the achievement of the annual incentive bonus at a higher level in 2015 compared to 2014. Total average employee remuneration was \$170,231 and \$151,745 in 2015 and 2014, respectively, on a full-time equivalent basis.

### Remuneration Committee

#### *Role and responsibilities of the Remuneration Committee*

The Remuneration Committee, together with the Board, determines the framework for the compensation of the Company's executive officers. The Remuneration Committee also determines the corporate and individual performance goals under the Company's management incentive compensation plan and achievement of these goals, as well as determines the policy for and scope of service agreements for the executive officers and termination payments. While the Remuneration Committee draws on a number of resources, including input from the Chief Executive Officer and independent compensation consultants, to make decisions regarding the Company's executive compensation program, ultimate decision-making authority rests with the Remuneration Committee, subject in key cases to ratification by the Board. The Remuneration Committee relies upon the judgment of its members in making compensation decisions, after reviewing the performance of the Company and evaluating an executive's performance during the year against established goals, operational performance and business responsibilities. In addition, the Remuneration Committee incorporates judgment in the assessment process to respond to and adjust for the evolving business environment.

#### *Members of the Remuneration Committee*

The Remuneration Committee consists exclusively of non-executive directors. The members of the Remuneration Committee during the year were:

Dr. James I. Healy (Chairman)  
Mr. David Stack  
Mr. Jan van Heek

Each member of the Remuneration Committee attended at least 75% of the scheduled meeting in 2015.

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Remuneration Committee (continued)

##### *Remuneration advisors to the Remuneration Committee*

The Remuneration Committee retains the services of Radford, an Aon Hewitt Company, or Radford, as independent external compensation consultants. The mandate of the consultants include assisting the Remuneration Committee in its review of executive and director compensation practices, including the competitiveness of pay levels, executive compensation design and benchmarking with the Company's peers in the industry. The Remuneration Committee regularly evaluates the performance of its compensation consultants, considers alternative compensation consultants and has the final authority to engage and terminate such services.

The Remuneration Committee has assessed the independence of Radford and concluded that no conflict of interest exists that would prevent Radford from serving as an independent consultant to the Remuneration Committee. The total fees paid or payable to Radford in respect of its services to the Remuneration Committee during the year were approximately \$82,000. The fees charged for major projects are normally negotiated as fixed fees in advance (and this was the case in the financial year) whereas fees associated with the ongoing support to the Remuneration Committee are charged on a "time spent" basis.

##### *Competitive market benchmarking*

The Remuneration Committee draws on a number of resources to assist in the evaluation of the various components of the Company's executive compensation program. While we do not establish compensation levels based solely on benchmarking, pay practices at other companies are a factor that the Remuneration Committee considers in assessing the reasonableness of compensation and ensuring that our compensation practices are competitive in the marketplace.

Our peer companies used in determining compensation actions in the 2015 fiscal year were selected by the Remuneration Committee with the support of Radford, which beginning in 2011 has been retained to conduct comprehensive reviews of the Company's executive compensation practices. Our peer companies were selected in consultation with Radford on the basis of their similarity to us in terms of competition for talent, their status as a commercial or near-commercial stage company, phase of products in development, financial attributes, research and development expenditures, and market capitalisation. Radford also qualitatively evaluated each company based on business focus and corporate strategy.

The Remuneration Committee considered the foregoing analysis in selecting the following 19 publicly-traded peer companies for use in determining compensation actions in the 2015 fiscal year:

Agenus Inc.	BIND Therapeutics, Inc.	NeoStem, Inc.
Amicus Therapeutics, Inc.*	Cytokinetics, Incorporated	Peregrine Pharmaceuticals, Inc.
Argos Therapeutics, Inc.	Discovery Laboratories, Inc.*	Rigel Pharmaceuticals, Inc.
ArQule, Inc.	DURECT Corporation*	Synta Pharmaceuticals Corporation*
Array BioPharma Inc.	Dynavax Technologies Corporation*	XOMA Corporation*
Athersys, Inc.	Endocyte, Inc.	
AVEO Pharmaceuticals, Inc.	Five Prime Therapeutics, Inc.	

---

\* Included in prior-year peer group.

In addition to the peer group above, the Remuneration Committee also reviews competitive compensation data from the Radford Global Life Sciences Compensation Survey. For 2015 compensation decisions, the Radford survey group included 51 publicly traded biotechnology and pharmaceutical companies with between 100 and 500 employees, 14 of which were companies in our current peer group. Radford assessed Amarin's 2015 compensation against market pay elements such as base salary, target short-term incentives as a percentage of base salary, target total cash compensation, long-term incentives and target total direct compensation. Additionally, Amarin's incumbent officers were matched to benchmark positions according to each officer's primary responsibilities.

The Remuneration Committee reviews the Company's list of peer companies periodically to reflect changes in market capitalisation, developments at the Company relative to its peer companies, and other factors.

## DIRECTORS' REMUNERATION REPORT (continued)

### UNAUDITED INFORMATION (continued)

#### Remuneration Committee (continued)

*Summary of the principal activity of the Remuneration Committee during 2015*

The summary below provides a description of the Remuneration Committee's activities during 2015:

- Review of the 2014 Directors' Remuneration Report;
- Review of compensation trend analysis and assessment of competitive market benchmarking;
- Review of outcomes of the annual performance evaluation;
- Determination of annual bonus incentive and equity awards for performance during 2014;
- Implementation of special incentive bonus award program;
- Evaluation of the performance and effectiveness of the Remuneration Committee as part of the overall Board evaluation; and
- Assessment of the Company's overall compensation structure to determine effectiveness in retention of employees.

#### *Matters for consideration in 2016*

During 2016, the Remuneration Committee will focus on reviewing and assessing the appropriateness of current executive remuneration packages and targets and reviewing remuneration arrangements and ensuring that they continue to attract and retain talent.

#### *Statement of shareholder voting*

The table below sets out the voting by the Company's shareholders on the resolution to approve the Directors' Remuneration Report (and included within the directors' remuneration policy) at the Annual General Meeting of Shareholders held on 9 July 2013, including votes for, against and withheld:

	<i>Total number of votes</i>	<i>% of votes cast</i>
For	57,475,361	96.5
Against	2,104,038	3.5
Withheld*	598,950	N/A
Total votes cast	60,178,349	

\*A vote "withheld" is not counted in the calculation of the proportion of votes "for" and "against" a resolution

The Remuneration Committee is pleased to note that 96.5% of shareholders approved the 2012 Directors' Remuneration Report. We appreciate the continuing support of our shareholders and value their views.

#### **On behalf of the board**

/s/ James I. Healy

**James I. Healy, M.D., Ph.D.**

Chairman of the Remuneration Committee

31 May 2016

## DIRECTORS' RESPONSIBILITIES STATEMENT

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare such financial statements for each financial year. Under that law the Directors are required to prepare the Group financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union and have also chosen to prepare the parent company financial statements under IFRSs as adopted by the European Union. Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and the company and of the profit or loss of the Group for that period. In preparing these financial statements, International Accounting Standard 1 requires that Directors:

- properly select and apply accounting policies;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements in IFRSs are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and
- make an assessment of the company's ability to continue as a going concern.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the Group and the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Group and the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

## **INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF AMARIN CORPORATION PLC**

We have audited the group financial statements of Amarin Corporation plc for the year ended 31 December 2015 which comprises the Group Income Statement, the Group Statement of Comprehensive Income, the Group and Parent Company Balance Sheet, the Group and Parent Company Changes in equity, the Group and parent Company Statements of Cash Flows and the related notes 1 to 36. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union and, as regards the parent company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

### **Respective responsibilities of directors and auditor**

As explained more fully in the Directors' Responsibilities Statement set out on page 48, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

### **Scope of the audit of the financial statements**

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the group's and the parent company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the financial statements to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

### **Opinion on financial statements**

In our opinion:

- ▶ the financial statements give a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2015 and of the group's loss for the year then ended;
- ▶ the group financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union;
- ▶ the parent company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- ▶ the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

### **Opinion on other matters prescribed by the Companies Act 2006**

In our opinion:

- ▶ the part of the Directors' Remuneration Report to be audited has been properly prepared in accordance with the Companies Act 2006; and
- ▶ the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

**Matters on which we are required to report by exception**

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- ▶ adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- ▶ the parent company financial statements are not in agreement with the accounting records and returns; or
- ▶ certain disclosures of directors' remuneration specified by law are not made; or
- ▶ we have not received all the information and explanations we require for our audit.

/s/ Ernst & Young LLP

*David Hales (Senior statutory auditor)  
for and on behalf of Ernst & Young LLP, Statutory Auditor  
Reading  
1 June 2016*

Notes:

1. The maintenance and integrity of the **Amarin Corporation plc** web site is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the web site.
2. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**

**1. Going Concern**

The accompanying consolidated financial statements of the Group have been prepared on a basis which assumes that the Group will continue as a going concern, which contemplates the realisation of assets and the satisfaction of liabilities and commitments in the normal course of business. The Group's focus is on the commercialisation of Vascepa.

At 31 December 2015, the Group had cash balances of approximately \$107.6 million. The Group started making sales in 2013 and this will continue to necessitate further expenditure by the company to continue to commercialise the product and develop the market. Management has considered various scenarios reflecting differing market conditions, and expects as a result of these considerations, together with current planned expenditures, purchase commitments, existing cash resources and latest sales information, that the Group will have sufficient cash to enable it to meet its liabilities as they fall due for at least 12 months from approval of these financial statements.

Therefore, after making enquiries, the Directors have a reasonable expectation that the Group will have adequate resources to continue in operational existence for a period of at least 12 months from the date of approval of these financial statements. For this reason, they continue to adopt the going concern basis in preparing the accounts.

**2. Basis of Preparation**

***Basis of Accounting***

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs). The financial statements have also been prepared in accordance with IFRSs adopted by the European Union.

The financial statements have been prepared on the historical cost basis, except for the revaluation of financial instruments. Historical cost is generally based on the fair value of the consideration given in exchange for the assets. The principal accounting policies adopted are set out below.

The following standards and interpretations have been issued but are not yet effective (or in some cases have not yet been adopted by the EU):

- IFRS 9 Financial instruments – Classification and Measurement
- IFRS 15 Revenue from Contracts with Customers
- IFRS 16 Leases
- Disclosure Initiative (Amendments to IAS 1 and IAS 7)
- Recognition of deferred tax assets for unrealised losses (Amendments to IAS 12)
- Clarification of Acceptable Methods of Depreciation and Amortisation (Amendments to IAS 16 and IAS 38)
- Joint Arrangements: Accounting for Acquisitions of Interest (Amendments to IFRS 11)
- Equity Method in Separate Financial Statements (Amendments to IAS 27)
- Annual Improvements to IFRSs 2011–2013
- Annual Improvements to IFRSs September 2014

The Directors do not expect that the adoption of the Standards and Interpretations listed above will have a material impact on the financial statements of the Group in future periods, except as follows. IFRS 9 will impact both the measures and disclosures of Financial Instruments. The Company is currently evaluating the accounting, transition and disclosure requirements of IFRS 15 and IFRS 16, and cannot currently estimate the financial statement impact of adoption. Any impact is anticipated to be immaterial.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies*

The preparation of financial statements in conformity with IFRS as adopted by the EU and as issued by the IASB requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies.

**(a) Basis of consolidation**

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to 31 December each year. Control is achieved where the Company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Group undertakings during the year had the following nature of business:

*Trading companies:* Amarin Pharmaceuticals Ireland Limited

*Research and development companies:* Amarin Pharma Inc.

*Intermediary funding company:* Corsicanto Limited

*Dormant companies:* Amarin Neuroscience Limited & Ester Neurosciences Limited

All of the above listed companies are wholly-owned subsidiaries and included in the consolidated financial statements of Amarin Corporation plc.

See footnote 21 for further information on the investment of the Company in its subsidiaries.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(b) Intangible assets and research and development expenditure**

*In-process research and development*

Acquired in-process research and development (“IPR&D”) is stated at cost less accumulated amortisation and impairments. Acquired IPR&D arising on acquisitions is capitalised and amortised on a straight-line basis over its estimated useful economic life, which is the patent life of the intangible asset. The useful economic life commences upon generation of economic benefits relating to the acquired IPR&D.

Cost is defined as the amount of cash or cash equivalents paid, or the fair value of other consideration given. When IPR&D is acquired and the consideration is settled using the Group’s equity instruments, the IPR&D is stated at fair value at the date of acquisition. In cases where the fair value of the IPR&D acquired cannot be measured reliably, the fair value capitalised at the date of acquisition is measured by reference to the fair value of the equity instruments granted as consideration.

Intangible assets not yet available for use are not subject to amortisation but are tested for impairment at least annually. An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of an asset’s fair value less costs to sell and value in use. Value in use is calculated by discounting the expected future cash flows obtainable as a result of the asset’s continued use.

*Research and development expenditure*

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from the Group’s research and development activities conducted to provide evidence of product efficacy is recognised only if all of the following conditions are met:

- an asset is created that can be identified;
- it is probable that the asset created will generate future economic benefits;
- the development cost of the asset can be measured reliably.

Internally-generated intangible assets are amortised on a straight-line basis over their useful lives. Where no internally-generated intangible asset can be recognised, development expenditure is recognised as an expense in the period in which it is incurred. To date, all research and development costs have been written off as incurred and are included within operating expenses. Research and development costs include staff costs, professional and contractor fees and external services.

*Capitalisation of technological rights*

Technological rights arising from the Group’s research and development activities are recognised as it is probable that the asset created will generate future economic benefits.

*Impairment of intangible assets*

At each balance sheet date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. An intangible asset with an indefinite useful life is tested for impairment at least annually and whenever there is an indication that the asset may be impaired.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(b) Intangible assets and research and development expenditure (continued)**

*Impairment of intangible assets (continued)*

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

*Amortisation of intangible assets*

Capitalised research and development costs are amortised over the period over which the company is expected to benefit. This period has been estimated to be 18 years. Computer software is also held as an intangible asset and has an estimated economic life of five years.

*Allocation of CRO costs to accounting periods*

Clinical trial costs are a significant component of research and development expenses and include costs associated with third-party contractors. We outsource a substantial portion of our clinical trial activities, utilising external entities such as contract research organisations, independent clinical investigators, and other third-party service providers to assist us with the execution of our clinical studies. For each clinical trial that we conduct, certain clinical trial costs are expensed as incurred, while others are expensed over time based on the expected total number of patients in the trial, the rate at which patients enter the trial, and the period over which clinical investigators or contract research organisations are expected to provide services.

Clinical activities which relate principally to clinical sites and other administrative functions to manage our clinical trials are performed primarily by contract research organisations (CROs). CROs typically perform most of the start-up activities for our trials, including document preparation, site identification, screening and preparation, pre-study visits, training, and programme management. These start-up costs usually occur within a few months after the contract has been executed and are event driven in nature. The remaining activities and related costs, such as patient monitoring and administration, generally occur rateably throughout the life of the individual contract or study.

For clinical studies, where payments are made periodically on a milestone achievement basis, we accrue expense on a straight-line basis over the estimated life of the trial. The amount of clinical study expense recognised should be broadly consistent over the life of the trial. During the course of a trial, we monitor the progress of the trial to determine if actual results differ from our estimates. Our estimates and assumptions for clinical expense recognition could differ significantly from our actual results, which could cause material increases or decreases in research and development expenses in future periods when the actual results become known. No material adjustments to our past clinical trial accrual estimates were made during the two years ended 31 December 2015 and 2014.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(c) Foreign currencies**

The individual financial statements of each Group company are presented in the currency of the primary economic environment in which it operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each Group company are expressed in U.S. dollars, which is the functional currency of the Company, and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual companies, transactions in currencies other than the entity's functional currency (foreign currencies) are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- exchange differences on transactions entered into to hedge certain foreign currency risks (see below under financial instruments/hedge accounting); and
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in a foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss or partial disposal of the net investment.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated at exchange rates prevailing on the balance sheet date. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. Exchange differences arising, if any, are classified in other comprehensive income and accumulated in equity (attributable to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, loss of joint control over a jointly controlled entity that includes a foreign operation, or loss of significant influence over an associate that includes foreign operation), all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(d) Property, plant and equipment**

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repair and maintenance costs are charged to the income statement during the financial period in which they are incurred.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Depreciation is calculated using the straight-line method to write down the value of assets to their residual value over their estimated useful lives as follows:

Short leasehold	2 to 5 years
Fixtures and fittings	5 years
Computer equipment	5 years

**(e) Trade and other payables**

Trade and other payables are initially recognised at fair value and subsequently measured at amortised cost, which approximates to fair value given the short nature of these liabilities.

**(f) Investments in subsidiary undertakings**

Investments in subsidiary undertakings are shown at cost less any provision for impairment. Cost includes loans advanced to/received from subsidiary undertakings that are considered to form part of the net investment in the subsidiary undertakings. Investments in subsidiaries also include the cost of recharges to subsidiary undertakings for share-based payment expense incurred by the Parent company.

**(g) Leases**

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under finance leases are recognised as assets of the Group at their fair value or, if lower, at the present value of the minimum lease payments, each determined at the inception of the lease. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Group's general policy on borrowing costs (see below). Contingent rentals are recognised as expenses in the periods in which they are incurred.

Rentals payable under operating leases are charged to income on a straight-line basis over the term of the relevant lease, except where another more systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(h) Financial assets**

All financial assets are recognised and derecognised on a trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

**(i) Financial liabilities**

Financial liabilities are classified as either financial liabilities at 'FVTPL' or 'other financial liabilities'.

Financial liabilities are classified as FVTPL when the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities, or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and IAS 39 *Financial Instruments: Recognition and Measurement* permits the entire combined contract (asset or liability) to be designated at FVTPL.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognised in the income statement. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item in the income statement.

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis. The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(j) Derivative financial liabilities**

*Derivative financial liabilities*

Derivative financial liabilities on initial recognition are recorded at fair value, being the fair value of consideration received. They are subsequently held at fair value, with gains and losses arising from changes in fair value recognised in the income statement at each period-end. The Group derecognises the derivative financial liability, and recognises a gain in the income statement when its contractual obligations are cancelled or expired. If the Group issues shares to discharge the liability, the derivative financial liability is derecognised and share premium and share capital are recognised on the issuance of those shares.

Where options and warrants give rise to obligations to issue ordinary shares, other than on the exchange of a fixed amount of cash or another financial asset for a fixed number of shares, they are classified as financial liabilities on the balance sheet. Where these instruments meet the definition of derivatives they are included at fair value on the balance sheet at each reporting year-end, with the resulting unrealised gains or losses being recorded in the income statement.

If the terms of options or warrants initially classified as derivative financial liabilities lapse, such that the obligation becomes an exchange of a fixed amount of cash or another financial asset for a fixed number of shares, the derivative financial liability is reclassified out of financial liabilities into equity at its fair value on that date.

At settlement date, if the instruments are settled in shares the carrying value of the options and warrants are derecognised and transferred to equity at their fair value at that date. The cash proceeds received from shareholders for additional shares are recorded in the share capital and share premium account.

*Borrowings*

Debt instruments are initially recorded at fair value, with coupon interest and amortisation of debt issuance discounts recognised in the statement of operations as interest expense at each period end while such instruments are outstanding. If the Company issues shares to discharge the liability, the debt obligation is derecognised and common stock and additional paid-in capital are recognised on the issuance of those shares.

Compound financial instruments issued by the Group comprise convertible notes that can be converted to share capital at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value.

The fair value of the liability portion of a compound financial instrument is recognised initially using a market interest rate for an equivalent liability that does not have an equity conversion option. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion, redemption or maturity. The remainder of the proceeds are allocated to the conversion option. Where the conversion option results in the issuance of a fixed number of shares for a fixed price, the fair value of the conversion option is recognised in equity. Where the conversion option gives rise to obligations to issue ordinary shares, other than on the exchange of a fixed amount of cash or another financial asset for a fixed number of shares, they are considered embedded derivatives and are classified as derivative financial liabilities.

Subsequent to initial recognition, the liability component is measured at amortised cost using the effective interest method. The equity component of a compound financial instrument is not re-measured subsequent to initial recognition except on conversion or expiry.

On exercise of the conversion option, the liability component and the derivative financial liability, where applicable, are derecognised with the liability component being transferred to equity at its carrying value and the derivative financial liability being transferred at its fair value at the date of conversion.

The Company's December 2012 debt financing agreement contains an embedded derivative relating primarily to a redemption feature triggered upon a change of control. The fair value of the derivative was recorded as a reduction to the fair value of the note payable. The fair value of this derivative liability is re-measured at each reporting period, with changes in fair value recognised in the statement of operations. The discount recorded to the note payable is being amortised to interest expense over the term of the note payable.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(j) Derivative financial liabilities (continued)**

*Borrowings (continued)*

The Company's May 2014 & November 2015 debt refinancing contains embedded derivatives relating to a redemption feature triggered upon a change of control, the ability of the note holders to convert the debt into common shares and the right of note holders to put the note back to the company. The fair value of the derivatives was recorded as a reduction to the fair value of the note payable. The fair value of these derivative liabilities is re-measured at each reporting period, with changes in fair value recognised in the statement of operations. The discount recorded to the note payable is being amortised to interest expense over the term of the note payable.

Debt issuance costs are initially allocated between the financial instrument and the derivative financial liability based on their respective recognition values. Debt issuance costs related to financial instruments are capitalised as a deferred cost and amortised to interest expense using the effective interest method over the expected term of the related debt. Unamortised debt issuance costs related to extinguishment of debt are expensed at the time the debt is extinguished and recorded in other income (expenses), net in the consolidated statements of operations. Debt issuance costs allocated to the derivative financial liability are recognised immediately in the statement of operations.

**(k) Current and deferred taxation**

The tax expense represents the sum of the tax currently payable and deferred tax.

*Current tax*

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

*Deferred tax*

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted at the balance sheet date. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited in other comprehensive income, in which case the deferred tax is also dealt with in other comprehensive income.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(l) Employee benefits**

*Retirement benefit costs*

Payments to defined contribution retirement benefit schemes are charged as an expense as they fall due. Payments made to state-managed retirement benefit schemes are dealt with as payments to defined contribution schemes where the Group's obligations under the schemes are equivalent to those arising in a defined contribution retirement benefit scheme.

*Share-based payments*

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. The fair value excludes the effect of non-market-based vesting conditions. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 31.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest. At each balance sheet date, the Group revises its estimate of the number of equity instruments expected to vest as a result of the effect of non-market-based vesting conditions. The impact of the revision of the original estimate, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to equity reserves.

Save As You Earn (SAYE) share options granted to employees are treated as cancelled when employees cease to contribute to the scheme. This results in accelerated recognition of the expenses that would have arisen over the remainder of the original vesting period.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At each balance sheet date until the liability is settled, and at the date of settlement, the fair value of the liability is re-measured, with any changes in fair value recognised in profit or loss for the year.

**(m) Cash and cash equivalents**

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and, for the purposes of the cash flow statement, bank overdrafts are included within cash and cash equivalents. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

**(n) Provisions and contingencies**

A provision is recognised in the balance sheet when there is a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefit will be required to settle the obligation and it is reliably measured. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Included in provisions are onerous leases.

A contingent liability is disclosed where the existence of the obligation is considered more than remote.

Contingent consideration payable under collaborative agreements is recognised when it is probable that any cash flow of economic benefit will be required and can be measured reliably. Payments relating to the funding of research are expensed and payments relating to the acquisition of an asset are capitalised. Provisions are re-measured at each balance sheet date based on the best estimate of the settlement amount.

**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(o) Finance income and costs**

Finance income comprises interest income on cash and cash equivalents, gains on the disposal of available-for-sale financial assets and foreign currency gains on financing activities. Interest income is recognised on a time proportion basis using the effective interest method.

Finance costs comprise foreign currency losses incurred on financing activity, impairment losses on financial assets and borrowing costs. Borrowing costs are allocated to financial reporting periods over the effective life of the related borrowings using the effective interest method.

**(p) Earnings per share**

The Group presents basic and diluted earnings per share (“EPS”) data for its own ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise convertible debentures, share options and warrants granted. If the number of ordinary or potential ordinary shares outstanding increases as a result of a capitalisation, bonus issue or share split, or decreases as a result of a reverse share split, the calculation of basic and diluted earnings per share for all periods presented shall be adjusted retrospectively. If these changes occur after the balance sheet date but before the financial statements are authorised for issue, the per share calculations for those and any prior period financial statements presented shall be based on the new number of shares.

**(q) Segment reporting**

A segment is a distinguishable component of the Group that is engaged in either providing related products or services which is subject to risks and rewards that are different from those of other segments. The Chief Operating Decision-Maker has been identified as our Chief Executive Officer. The Chief Executive Officer reviews the Group’s internal reporting in order to assess performance and allocate resources. Management has determined that commercialisation of Vascepa is the one operating segment.

**(r) Capital redemption reserve**

The capital redemption reserve comprises deferred shares previously in issue which were cancelled.

**(s) Patent costs**

The Group undertakes to protect its intellectual property using patent applications. Costs associated with such applications are written off as incurred where they relate to ongoing development expenditure that is also not capitalised. Acquired patent costs arising on acquisitions are capitalised and amortised on a straight-line basis over their estimated useful economic lives. The useful economic life commences upon generation of economic benefits relating to the acquired patent.

**(t) Inventory**

Inventory is stated at the lower of cost or net realisable value. Cost is determined based on actual cost. An allowance is established when management determines that certain inventory may not be saleable. If inventory cost exceeds net realisable value due to obsolescence or quantities in excess of expected demand, the Company will record a provision for the difference between cost and net realisable value. The Company received FDA approval for the MARINE indication on 26 July 2012. At that time, the Company began capitalising inventory purchases of saleable product from approved suppliers. In addition, all inventory of saleable product from approved suppliers that was purchased prior to 26 July 2012 has also been capitalised.

**AMARIN CORPORATION PLC**

**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(u) Revenue recognition**

The Company sells Vascepa principally to a limited number of major wholesalers, as well as selected regional wholesalers and specialty pharmacy providers, or collectively, its Distributors, that in turn resell Vascepa to retail pharmacies for subsequent resale to patients and healthcare providers. Patients are required to have a prescription in order to purchase Vascepa. In accordance with GAAP, the Company's revenue recognition policy requires that: (i) there is persuasive evidence that an arrangement exists between the Company and the Distributor, (ii) delivery has occurred, (iii) collectability is reasonably assured and (iv) the price is fixed or determinable.

The Company commenced its commercial launch in the United States in January 2013. Prior to 2013, the Company recognized no revenue from Vascepa sales. In accordance with GAAP, until the Company had the ability to reliably estimate returns of Vascepa from its Distributors, revenue was recognized based on the resale of Vascepa for the purposes of filling patient prescriptions, and not based on sales from the Company to such Distributors. During the three months ended 31 March, 2014, the Company concluded that it had developed sufficient history such that it can reliably estimate returns and as a result, began to recognize revenue based on sales to its Distributors. The change in revenue recognition methodology resulted in the recognition of previously deferred revenue. As of 31 December, 2013, the Company had deferred approximately \$1.7 million in amounts billed to Distributors that was not recognized as revenue. This change in revenue recognition methodology resulted in the recognition of such deferred revenues in the three months ended 31 March, 2014.

The Company has contracts with its primary Distributors and delivery occurs when a Distributor receives Vascepa. The Company evaluates the creditworthiness of each of its Distributors to determine whether revenues can be recognized upon delivery, subject to satisfaction of the other requirements, or whether recognition is required to be delayed until receipt of payment or when the product is utilized. In order to conclude that the price is fixed or determinable, the Company must be able to (i) calculate its gross product revenues from the sales to Distributors and (ii) reasonably estimate its net product revenues. The Company calculates gross product revenues based on the wholesale acquisition cost that the Company charges its Distributors for Vascepa. The Company estimates its net product revenues by deducting from its gross product revenues (a) trade allowances, such as invoice discounts for prompt payment and distributor fees, (b) estimated government and private payor rebates, chargebacks and discounts, such as Medicaid reimbursements, (c) reserves for expected product returns and (d) estimated costs of incentives offered to certain indirect customers, including patients.

*Trade Allowances:* The Company generally provides invoice discounts on Vascepa sales to its Distributors for prompt payment and pays fees for distribution services, such as fees for certain data that Distributors provide to the Company. The payment terms for sales to Distributors generally include a 2% discount for payment within 30 days while the fees for distribution services are based on contractual rates agreed with the respective Distributors. Based on judgment and experience, the Company expects its Distributors to earn these discounts and fees, and deducts the full amount of these discounts and fees from its gross product revenues and accounts receivable at the time such revenues are recognized.

*Rebates, Chargebacks and Discounts:* The Company contracts with Medicaid, other government agencies and various private organisations, or collectively, Third-party Payors, so that Vascepa will be eligible for purchase by, or partial or full reimbursement from, such Third-party Payors. The Company estimates the rebates, chargebacks and discounts it will provide to Third-party Payors and deducts these estimated amounts from its gross product revenues at the time the revenues are recognized. The Company estimates the rebates, chargebacks and discounts that it will provide to Third-party Payors based upon (i) the Company's contracts with these Third-party Payors, (ii) the government-mandated discounts applicable to government-funded programs, (iii) information obtained from the Company's Distributors and (iv) information obtained from other third parties regarding the payor mix for Vascepa.

*Product Returns:* The Company's Distributors have the right to return unopened unexpired Vascepa during the 18-month period beginning six months prior to the labeled expiration date and ending twelve months after the labeled expiration date. The expiration date for Vascepa is three years after it has been converted into capsule form, which is the last step in the manufacturing process for Vascepa and generally occurs within a few months before Vascepa is delivered to Distributors. As of 31 December, 2015, the Company had experienced a de minimis quantity of product returns. The Company estimates future product returns on sales of Vascepa based on: (i) data provided to the Company by its Distributors (including weekly reporting of Distributors' sales and inventory held by Distributors that provided the Company with visibility into the distribution channel in order to determine what quantities were sold to retail pharmacies and other providers), (ii) information provided to the Company from retail pharmacies, (iii) data provided to the Company by a third-party data provider which collects and publishes prescription data, and other third

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(u) Revenue recognition (continued)**

parties, (iv) historical industry information regarding return rates for similar pharmaceutical products, (v) the estimated remaining shelf life of Vascepa previously shipped and currently being shipped to Distributors and (vi) contractual agreements intended to limit the amount of inventory maintained by the Company's Distributors.

*Other Incentives:* Other incentives that the Company offers to indirect customers include co-pay mitigation rebates provided by the Company to commercially insured patients who have coverage for Vascepa and who reside in states that permit co-pay mitigation programs. The Company's co-pay mitigation program is intended to reduce each participating patient's portion of the financial responsibility for Vascepa's purchase price to a specified dollar amount. Based upon the terms of the program and information regarding programs provided for similar specialty pharmaceutical products, the Company estimates the average co-pay mitigation amounts and the percentage of patients that it expects to participate in the program in order to establish its accruals for co-pay mitigation rebates and deducts these estimated amounts from its gross product revenues at the time the revenues are recognized. The Company adjusts its accruals for co-pay mitigation rebates based on actual redemption activity and estimates regarding the portion of issued co-pay mitigation rebates that it estimates will be redeemed.

*Multiple-Element Arrangements and Licensing Revenue*

When evaluating multiple-element arrangements, the Company identifies the deliverables included within the agreement and evaluates which deliverables represent separate units of accounting based on whether the delivered element has stand-alone value to the customer or if the arrangement includes a general right of return for delivered items.

The consideration received is allocated between each of the separable elements in the arrangement using the relative selling price method. The selling price used for each separable element will be based on vendor specific objective evidence ("VSOE") if available, third-party evidence if VSOE is not available, or estimated selling price if neither VSOE nor third-party evidence is available. Revenue is then recognized as each of the separable elements to which the revenue has been allocated is delivered.

The Company may receive up-front, non-refundable payments when licensing its intellectual property in conjunction with research, development and commercialisation agreements. In determining the units of accounting, management evaluates whether the license has stand-alone value from the undelivered elements to the collaborative partner based on the consideration of the relevant facts and circumstances for each arrangement. Factors considered in this determination include the stage of development of the license delivered, research and development capabilities of the partner and the ability of partners to develop and commercialize Vascepa independent of the Company.

When management believes the license to its intellectual property does not have stand-alone value from the other deliverables to be provided in the arrangement, the Company generally recognizes revenue attributable to the license over the Company's contractual or estimated performance period. Any unrecognized portion of license revenue is classified within deferred revenue in the accompanying consolidated balance sheets. When management believes the license to its intellectual property has stand-alone value, the Company recognizes revenue attributed to the license upon delivery. The periods over which revenue is recognized is subject to estimates by management and may change over the course of the agreement. Such a change could have a material impact on the amount of revenue the Company records in future periods.

*Milestones*

Contingent consideration from activities that is earned upon the achievement of a substantive milestone is recognized in its entirety in the period in which the milestone is achieved. At the inception of each arrangement that includes milestone payments, the Company evaluates whether each milestone is substantive. This evaluation includes an assessment of whether: (a) the consideration is commensurate with either (1) the entity's performance to achieve the milestone, or (2) the enhancement of the value of the delivered item(s) as a result of a specific outcome resulting from the entity's performance to achieve the milestone, (b) the consideration relates solely to past performance and (c) the consideration is reasonable relative to all of the deliverables and payment terms within the arrangement. The Company evaluates factors such as the scientific, clinical, regulatory, commercial and other risks that must be overcome to achieve the respective milestone, the level of effort and investment required and whether the milestone consideration is reasonable relative to all deliverables and payment terms in the arrangement in making this assessment.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

**(v) Distribution Costs**

The Company records distribution costs related to shipping product to its customers, primarily through the use of common carriers or external distribution services, in cost of goods sold.

**(w) Accounts Receivable, net**

Accounts receivable, net, comprised of trade receivables, are generally due within 30 days and are stated at amounts due from customers. The Company does not currently maintain an allowance for doubtful accounts and has not historically experienced any credit losses.

**(x) Costs for Patent Litigation and Legal Proceedings**

Costs for patent litigation or other legal proceedings are expensed as incurred and included in selling, general and administrative expenses.

**(y) Concentration of Suppliers**

The Company entered into long-term supply agreements with multiple FDA-approved API suppliers and encapsulators. Certain supply agreements require annual minimum volume commitments by the Company and certain volume shortfalls may require payments for such shortfalls, as detailed below.

The Company entered into its initial Vascepa API supply agreement with Nisshin Pharma, Inc., or Nisshin, in 2010. In 2011, the Company entered into agreements with two additional suppliers, Chemport, Inc., or Chemport, and BASF (formerly Equateq Limited) for the supply of API. In 2012, the Company agreed to terms with a fourth API supplier, a consortium of companies led by Slanmhor Pharmaceutical, Inc. (Slanmhor). The API supply agreement with BASF terminated in February 2014. In July 2014, the Company terminated the supply agreement with Slanmhor and subsequently, in July 2015, entered into a new supply agreement with Finorga SAS (Novasep), a French company. These agreements included requirements for the suppliers to meet certain product specifications and qualify their materials and facilities with applicable regulatory authorities including the FDA. The Company has incurred certain costs associated with the qualification of product produced by these suppliers as described below.

Nisshin, Chemport and Novasep are currently the three manufacturers from which the Company purchases API. As of 31 December, 2015, the Company has no royalty, milestone or minimum purchase commitments with Nisshin.

Chemport was approved by the FDA to manufacture API for commercial sale in April 2013 and the Company began purchasing commercial supply from Chemport in 2013. The agreement with Chemport contains a provision requiring the Company to pay Chemport in cash for any shortfall in the minimum purchase obligations.

The Company began purchasing commercial supply from Novasep in 2015. API manufactured by Novasep was previously approved by the FDA in July 2014. The 2015 supply agreement with Novasep includes commitments for the Company to fund API purchases and contains a provision requiring the Company to pay Novasep a cash remedy for any shortfall in the minimum purchase obligations.

**(z) Equity Reserves**

The equity reserves recorded in the Group's Statement of Financial Position include:

*Warrant/Share-based payment Reserves:* This item includes reserves related to the issuance of shares related to the exercise of warrants or share options.

*Capital Redemption Reserve:* This item includes deferred shares previously in issue, which were cancelled.

*Foreign currency translation Reserve:* This item is used to record exchange differences arising from the translation of the net investment in foreign operations.

*Preference shares:* This item includes convertible preference shares in issue.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**2. Basis of Preparation (continued)**

*Accounting Policies (continued)*

**(aa) Classification as liability or equity**

The fundamental principle of IAS 32 is that a financial instrument should be classified as either a financial liability or an equity instrument according to the substance of the contract, not its legal form, and the definitions of financial liability and equity instrument. The company makes the decision at the time the instrument is initially recognised. The classification is not subsequently changed based on changed circumstances.

**(ab) Preference shares**

Preference share can be classified as a financial liability or equity. If the company issues preference (preferred) shares that pay a fixed rate of dividend and that have a mandatory redemption feature at a future date, the substance is that they are a contractual obligation to deliver cash and, therefore, should be recognised as a liability. In contrast, preference shares that do not have a fixed maturity, and where the issuer does not have a contractual obligation to make any payment are equity.

**(ac) Treasury shares**

The cost of an entity's own equity instruments that it has reacquired ('treasury shares') is deducted from equity. Gain or loss is not recognised on the purchase, sale, issue, or cancellation of treasury shares. Treasury shares may be acquired and held by the entity or by other members of the consolidated group. Consideration paid or received is recognised directly in equity.

**3. Critical Judgements in Applying the Group's Accounting Policies**

Our discussion and analysis of our financial condition and results of operations is based on our financial statements and notes, which have been prepared in accordance with International Financial Reporting Standards. The preparation of these financial statements requires us to make estimates and judgements that affect the reported amounts of assets, liabilities, revenue and expenses. On an ongoing basis, we evaluate our estimates and judgements. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. A summary of our significant accounting policies is contained in Note 2.

*Key sources of estimation uncertainty*

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

*Impairment of investments*

Determining whether investments are impaired requires an estimation of the future cash flows associated with each investment. The value in use calculation requires the entity to estimate the future cash flows expected to arise and a suitable discount rate in order to calculate present value.

*Accounting for debt, including derivative liabilities*

Determining the valuation and the classification of the Company's debt, including derivative liabilities, is a key area of judgement. Management has reviewed the terms of the debt instruments to determine the most appropriate accounting treatment for the liability and associated derivative. In addition they have assessed the future cash flows used in measuring the liability and the derivative.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**3. Critical Judgements in Applying the Group's Accounting Policies (continued)**

*Accounting for revenue*

The Company calculates gross product revenues based on the wholesale acquisition cost that the Company charges its Distributors for Vascepa. The Company estimates its net product revenues by deducting from its gross product revenues (a) trade allowances, such as invoice discounts for prompt payment and distributor fees, (b) estimated government and private customer rebates, chargebacks and discounts, such as Medicaid reimbursements, (c) reserves for expected product returns and (d) estimated costs of incentives offered to certain indirect customers, including patients. The quantification of such gross to net sales deductions requires the use of judgment.

*Share-based payments*

The cost of employee services received (compensation expenses) in exchange for awards of equity instruments are recognised based upon the grant date fair value of stock options and stock. The grant date fair value of stock options is estimated using a Binomial Lattice option valuation model. This valuation model requires the use of assumptions, including expected stock price volatility, the estimated life of each award and the estimated dividend yield. The risk-free interest rate used in the model is determined, based on a US treasury zero-coupon gilt yield with a life equal to the expected life of the equity-settled share-based payments. Our current share-based payment plans do not provide for cash settlement of options and stock.

**4. Segment Information**

The Chief Executive Officer reviews the Group's internal reporting in order to assess performance and allocate resources. Management has determined there is one operating segment based on these reports, which is commercialisation of Vascepa. There is also only one geographical segment, being the United States of America.

Net revenue from the Company's three largest customers, each representing more than 10% overall revenue, amounted to \$30,402,000, \$24,746,000, & \$21,014,000 (2014: \$21,263,000, \$16,352,000, & \$13,868,000). A significant portion of the Company's sales are to wholesalers in the pharmaceutical industry.

**5. Development, Commercialization and Supply Agreement**

On 26 February, 2015, the Company entered into a Development, Commercialisation and Supply Agreement (the "DCS Agreement") with Eddingpharm (Asia) Macao Commercial Offshore Limited ("Eddingpharm") related to the development and commercialisation of Vascepa in Mainland China, Hong Kong, Macau and Taiwan, or the China Territory. Under the terms of the DCS Agreement, the Company granted to Eddingpharm an exclusive (including as to the Company) license with right to sublicense to develop and commercialize Vascepa in the China Territory for uses that are currently commercialized and under development by the Company based on the Company's MARINE, ANCHOR and ongoing REDUCE-IT clinical trials of Vascepa.

Under the DCS Agreement, Eddingpharm will be solely responsible for development and commercialisation activities in the China Territory and associated expenses. The Company will provide development assistance and be responsible for supplying finished and later bulk drug product at defined prices under negotiated terms. The Company will retain all Vascepa manufacturing rights. Eddingpharm has agreed to certain restrictions regarding the commercialisation of competitive products globally and the Company has agreed to certain restrictions regarding the commercialisation of competitive products in the China Territory.

The Company and Eddingpharm agreed to form a joint development committee to oversee regulatory and development activities for Vascepa in the China Territory in accordance with a negotiated development plan and to form a separate joint commercialisation committee to oversee Vascepa commercialisation activities in the China Territory. Development costs will be paid by Eddingpharm to the extent such costs are incurred in connection with the negotiated development plan or otherwise incurred by Eddingpharm. Eddingpharm will be responsible for preparing and filing regulatory applications in all countries of the China Territory at Eddingpharm's cost with the Company's assistance. The DCS Agreement also contains customary provisions regarding indemnification, packaging, record keeping, audit rights, reporting obligations, and representations and warranties that are customary for an arrangement of this type.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**5. Development, Commercialization and Supply Agreement (continued)**

The term of the DCS Agreement expires, on a product-by-product basis, upon the later of (i) the date on which such product is no longer covered by a valid claim under a licensed patent in the China Territory, or (ii) the twelfth (12th) anniversary of the first commercial sale of such product in Mainland China. The DCS Agreement may be terminated by either party in the event of a bankruptcy of the other party and for material breach, subject to customary cure periods. In addition, at any time following the third anniversary of the first commercial sale of a product in Mainland China, Eddingpharm has the right to terminate the DCS Agreement for convenience with twelve months' prior notice. Neither party may assign or transfer the DCS Agreement without the prior consent of the other party, provided that the Company may assign the DCS Agreement in the event of a change of control transaction.

Upon closing of the DCS Agreement, the Company received a non-refundable \$15.0 million up-front payment, which it will recognize as revenue over the estimated period in which the Company is required to provide initial and on-going regulatory and development support and clinical supply for obtaining regulatory approvals in the China Territory and through the estimated period in which the Company is required to provide commercial supply, which is currently estimated to be a period of approximately 4 years. Consequently, the Company recognized \$3.8 million of the up-front payment as licensing revenue during the year ended 31 December, 2015 and recorded \$11.2 million as deferred revenue as of 31 December, 2015 (\$4.5 million current, \$6.7 million non-current).

In addition to the non-refundable, up-front payment, the Company is entitled to receive certain regulatory and sales-based milestone payments of up to an additional \$154.0 million as well as tiered double-digit percentage royalties on net sales of Vascepa in the China Territory escalating to the high teens. The regulatory milestone events relate to the submission and approval of certain applications to the applicable regulatory authority, such as a clinical trial application, clinical trial exemption, or import drug license application. The sales-based milestone events occur when annual aggregate net sales of Vascepa in the territory equal or exceed certain specified thresholds. Each such milestone payment shall be payable only once regardless of how many times the sales milestone event is achieved. Each such milestone payment is non-refundable and non-creditable against any other milestone payments. The Company recognizes contingent consideration from activities that is earned upon the achievement of a substantive milestone in the period in which the milestone is achieved.

<b>Total finance income</b>	<u><b>526</b></u>	<u><b>13,654</b></u>

**Other income**

During 2015, we had no other finance income. During 2014, we reached a settlement agreement with a former supplier, BASF, under which we received a refund for previous material purchases of \$3.0 million, which is included within other income.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**12. Finance Costs**

	<u>2015</u>	<u>2014</u>
	<u>\$'000</u>	<u>\$'000</u>
Other finance costs	43	49
Foreign exchange loss	187	396
Interest expense	32,411	29,713
Amortisation of debt issuance costs	86	409
Loss on extinguishment of debt	1,757	1,098
<b>Total finance costs</b>	<b><u>34,484</u></b>	<b><u>31,665</u></b>

**Foreign exchange losses and bank charges**

Foreign exchange losses incurred during the years ended 31 December 2015 and 2014 resulted from changes in foreign currency exchange rates on accounts payables. For more details on the loss on extinguishment of debt, please see footnote 26.

**13. Loss for the Year**

	<u>2015</u>	<u>2014</u>
	<u>\$'000</u>	<u>\$'000</u>
<b>Loss for the year is stated after charging:</b>		
Depreciation charge for the period:		
Owned property, plant and equipment	50	75
Property, plant and equipment held under finance leases	4	12
Amortisation	758	757
Auditor's remuneration:		
Fees payable to the company's auditor and associates for:		
- the audit of the company's annual & subsidiary accounts	953	588
Other assurance services	68	—
Taxation compliance services	7	8
Operating lease charges:		
Other operating lease charges	842	951

In order to maintain the independence of the external auditor, the Board has determined policies as to what non-audit services can be provided by the Group's external auditor and the approval processes related to them.

Auditor's remuneration includes fees payable to Ernst & Young LLP, United Kingdom and Ernst & Young LLP, United States for the audits for the fiscal years ended 31 December 2015 and 2014.

**Policies for non-audit services**

The Audit Committee is responsible for the development, implementation and monitoring of the Group's policy on external audit. The policy assigns oversight responsibility for monitoring the independence, objectivity and compliance with ethical and regulatory requirements to the Audit Committee. It states that the external auditor is jointly responsible to the board and the Audit Committee and that the Audit Committee is the primary contact. The policy also sets out the categories of non-audit services which the external auditor will and will not be allowed to provide to the Group.

**14. Taxation**

	<b>2015</b>	<b>2014</b>
	<b>\$'000</b>	<b>\$'000</b>
Tax on loss before taxation:		
Current year tax expense	(1,166)	(777)
Deferred tax provision	4,382	3,531
<b>Total tax benefit/(charge)</b>	<b>3,216</b>	<b>2,754</b>

The following items represent the principal reasons for the differences between corporate income taxes computed at the Irish statutory tax rate and the total tax charge for the year.

	<b>2015</b>	<b>2014</b>
	<b>\$'000</b>	<b>\$'000</b>
Loss before taxation	(152,071)	(96,617)
Loss on ordinary activities multiplied by rate of corporate tax of 12.5% (2014: 12.5%)	19,009	12,077
Tax effect of expenses that are not deductible (Income)/expense not taxable/deductible	(329)	(23)
Tax effects of movement in relation to share based payments	1,531	1,022
Losses carried forward	(267)	517
Unrecognised accelerated capital allowances and other timing differences	(14,741)	(12,983)
R&D tax credit (rate difference)	(4,002)	253
Difference between Irish and overseas tax rate	225	187
	1,790	1,704
<b>Total tax charge</b>	<b>3,216</b>	<b>2,754</b>

The tax residency of Amarin Corporation plc migrated to Ireland in April 2008. Unutilised UK trading losses at the date of migration, of approximately \$35,209,000, are no longer available for offset against taxable profits. The Group balance sheet as at 31 December 2015 included a tax liability of \$0.2 million. The corporate tax rate in the United States and Israel is 34% and 25%, respectively. The UK Finance Act 2014, which provides for a reduction in the main rate of corporation tax from 23% to 21% effective from 1 April 2014, was enacted on 3 July 2012. A further reduction from 21% to 20% by 1 April 2015 was enacted on 2 July 2013. The corporate tax rate in Ireland is 12.5% for profits on trading activities and 25% for non-trading activities. For the years ended 31 December 2015 and 2014 the Company's tax rate was 12.5%, which has therefore been applied in the reconciliation above.

Tax losses carried forward in Amarin Corporation plc at 31 December 2015 and 2014 were \$107,477,000 and \$85,845,000, respectively.

Tax losses carried forward in Amarin Neuroscience Limited at 31 December 2015 and 2014 were \$47,785,000 and \$50,239,000, respectively, subject to confirmation by UK tax authorities.

Tax losses carried forward in Amarin Pharmaceuticals Ireland Limited at 31 December 2015 and 2014 were \$385,322,000 and \$345,317,000, respectively.

Tax losses carried forward in Corsicanto Limited at 31 December 2015 and 2014 were \$2,557,000 and \$622,000, respectively.

Tax losses carried forward in Ester Neurosciences Limited at 31 December 2015 and 2014 were \$12,476,000 and \$12,465,000, respectively, subject to confirmation by Israeli tax authorities.

The Group has an unrecognised deferred tax asset as follows:

	<b>2015</b>	<b>2014</b>
	<b>\$'000</b>	<b>\$'000</b>
Difference between accumulated depreciation and capital allowances	(56)	(62)
Temporary timing differences	(4,486)	5,075
Losses	(87,581)	(78,132)
	(92,123)	(73,119)

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**14. Taxation (continued)**

The Group has a recognised deferred tax asset as follows:

	<b>Long-term timing differences</b>	<b>Total</b>
	<b>\$'000</b>	<b>\$'000</b>
At 1 January 2014	(3,109)	(3,109)
Debit to income statement	(3,531)	(3,531)
Debit to equity	63	63
At 1 January 2015	(6,577)	(6,577)
Debit to income statement	(4,382)	(4,382)
Debit to equity	(74)	(74)
Other movement	(8)	(8)
Deferred tax asset	<b>(11,041)</b>	<b>(11,041)</b>

The deferred tax asset of \$11,041k has been recognised as the Group believes that there will be future taxable profits against which the deductible temporary differences may be offset.

The following amounts relating to tax have been recognised directly in equity:

	<b>2015</b>	<b>2014</b>
	<b>\$'000</b>	<b>\$'000</b>
<b>Current tax</b>		
Tax effects of movement in relation to share-based payments	—	(15)
<b>Deferred tax</b>		
Tax effects of movement in relation to share-based payments	74	(63)

**15. Loss for the Financial Period**

As permitted by section 408 of the Companies Act 2006, the Parent's Income Statement has not been included in these financial statements. Please see the statement of changes in equity for details of the Parent's results.

**16. Loss per Ordinary Share**

	<b>2015</b>	<b>2014</b>
	<b>\$'000</b>	<b>\$'000</b>

Loss per ordinary share, basic and diluted	(0.82)	(0.54)
	<b>Number</b>	<b>Number</b>
Weighted average number of ordinary shares in issue (thousands) – basic and diluted	180,654	173,719

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**16. Loss per Ordinary Share (continued)**

**Basic**

Basic loss per share is calculated by dividing the loss attributable to equity holders of the Group by the weighted average number of ordinary shares in issue during the year. In 2015 and 2014, 174,502 and 20,000 shares, respectively, representing the weighted average number of treasury shares, have been deducted in arriving at the weighted average number of ordinary shares.

**Diluted**

Diluted loss per share is calculated by dividing the loss for the year by the weighted average number of ordinary shares outstanding to assume conversion of all potentially dilutive shares. Potentially dilutive shares include share options, warrants, convertible debt on an as-if-converted basis, and preference shares on an as-if-converted basis. Since the Group reported a net loss from continuing operations in 2015 and 2014, none of the Group's contingently issuable shares were dilutive. The Group has 120,929,620 contingently issuable shares at 31 December 2015, consisting of 10,886,523 restricted stock units, 59,406,580 potentially convertible shares, 17,818,053 options and 32,818,464 potentially convertible preference shares.

	174	174	—	—

- (1) Concurrent with our supply agreement with Chemport, we agreed to make a minority share equity investment in Chemport of up to \$3.3 million. In September 2013, the Company entered into an equity sale and purchase agreement between this supplier and a third party in which the Company agreed to sell approximately \$1.3 million of its investment in the supplier to the third party at cost. This transaction closed in the first quarter of 2014. In August 2014, we entered into a second equity sale and purchase agreement between this supplier and another third party in which we agreed to sell approximately \$1.0 million of our remaining investment. This transaction closed in the fourth quarter of 2014.

**AMARIN CORPORATION PLC**

*(continued)*

**20. Trade Receivables**

	<b>2015</b>	<b>2014</b>
	<b>\$'000</b>	<b>\$'000</b>
Trade Receivables	<b>13,826</b>	<b>10,215</b>

Trade receivables disclosed above are classified as loans and receivables and therefore are measured at amortised cost. The trade receivable balances disclosed above include amounts which were past due as of 31 December 2015 and 2014 of \$0.6 million and \$0.6 million, respectively. No provision or charge against bad or doubtful debts has been made during 2015 or 2014 as these amounts are believed to be collectible. Additionally, the fair value of other debtors is not materially different to their carrying value.

A significant portion of the Group's sales are to wholesalers in the pharmaceutical industry. The Group monitors the creditworthiness of customers to whom it grants credit terms and has not experienced any credit losses. The average credit period taken on sales of goods is 30 days. The Group does not charge interest on its receivables. The Group does not require collateral or any other security to support credit sales. The Group's top three customers accounted for 95% and 95% of gross product sales for the years ending 31 December 2015 and 2014 and represented 95% and 96% of the gross accounts receivable balance as of 31 December 2015 and 2014, respectively.

**21. Investments and long term payables**

<b>At 31 December 2015</b>	<b>275,626</b>	<b>70,133</b>	<b>345,759</b>	<b>(111,718)</b>

(1) This balance comprises long-term intercompany loans.

The Parent Company's loan from Corsicanto Limited of \$140.5 million was discounted to fair value on 20 May 2014 as a result of the extinguishment of a portion of the 2012 Senior Notes discussed at length in footnote 26 below. The fair value of the intercompany loan was determined by using the market value of the 2014 Senior Notes around the time of issue as a proxy, due to the fact that this represents a good indicator of fair value for an arms-length transaction for the Parent Company. The coupon rate of the intercompany loan was 4% from the date of revaluation until 31 December 2014, 4.4% from 1 January, 2015 through 30 November 2015 and 4.6% thereafter. Since this intercompany loan is directly tied to the 2012 and 2014 Senior Notes borrowed by Corsicanto, the repayment terms, accretion of debt discount, and certain derivatives (discussed further in footnote 26) mirror the Notes.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**21. Investments and long term payables (continued)**

On 1 December, 2015, the Parent Company repaid \$16.2 million of the loan from Corsicanto Limited with a portion of the proceeds of 2015 Senior Notes (discussed further in footnote 26). The unamortized portion of the discount relating to this debt amounted to \$2.6 million at the time of repayment, and as such was recognised as a loss on the discount from the intercompany note.

The Parent Company assessed the recoverability of its investment in long-term inter-company loans due to the loss-making results of those companies for the year ended 31 December 2015. The Parent Company uses the estimated present value of future cash flows of its product, Vascepa, to determine whether a provision is required. These cash flows, which reflect the risks and uncertainties associated with the products, are then discounted to an appropriate net present value. Disclosures on the impairment test completed for Vascepa for Hypertriglyceridemia are described below. The Group prepares cash flow forecasts derived from the most recent financial budgets for a period of two years approved by the Board, extended to ten years using external data concerning expectations for the market. Key assumptions include the discount rate of approximately 15% based on the weighted average cost of capital to Amarin.

Having assessed the current value of the forecast cash flows, in light of the significant growth anticipated by the Company and of the discount rates applied to the resulting cash flows, management determined for the year ended 31 December 2015 that no provision in Amarin Corporation plc against the inter-company receivable from Amarin Pharmaceuticals Ireland Limited (APIL) was required (nil in 2014). The Company will continue to reassess the recoverability of this inter-company receivable in future periods based on actual cash flows and changes in estimated future cash flows. Due to the cessation of operations for the Amarin Neuroscience Limited subsidiary (ANL), a provision was created in 2012 Amarin Corporation plc for the inter-company receivable from ANL. These provisions have no impact on the financial results of the Consolidated Group.

**Interest in Group undertakings at 31 December 2015**

Name of undertaking	Country of incorporation or registration	Description of shares held	Proportion of nominal value of issued share capital held by the	
			Group %	Parent %
Amarin Pharma Inc.	USA	100 \$0.01 ordinary shares	100	100
Amarin Pharmaceuticals Ireland Limited	Ireland	100 €1 ordinary shares	100	100

Corsicanto Limited	Ireland	100 €1 ordinary shares	100	100
Ester Neurosciences Limited	Israel	1,320,264 NIS 0.01 ordinary shares	100	100
		440,526 NIS 0.01 "A" redeemable convertible preference shares	100	100
		1,212,145 NIS 0.01 "B" redeemable convertible preference shares	100	100

- All of the above companies are wholly-owned subsidiaries and included in the consolidated financial statements of Amarin Corporation plc.
- Amarin Pharma Inc. was incorporated on 31 August 2007.
- Amarin Pharmaceuticals Ireland Limited was incorporated on 5 October 2005.
- Amarin Neuroscience Limited was incorporated on 31 October 1997.
- Corsicanto Limited was incorporated on 17 November 2012.
- Ester Neurosciences Limited was acquired on 5 December 2007 and was accounted for as an asset acquisition.

Group undertakings during the year had the following nature of business:

- Amarin Pharmaceuticals Ireland Limited – *Trading company*
- Amarin Pharma Inc. - *Research and development*
- Amarin Neuroscience Limited - *Research and development*
- Ester Neurosciences Limited - *Research and development*
- Corsicanto Limited – *Intermediary funding company*

At 31 December 2015 and 2014, ANL held 20,079 ordinary shares in Amarin Corporation plc.

During the years ended 31 December 2015 and 2014, the Company has not defaulted on any of its payables.

**25. Obligations Under Finance Leases**

Future minimum lease payments to which the Group and the Parent Company are committed under finance leases are as follows:

	<u>Group</u>		<u>Parent Company</u>	
	<u>31 December</u>		<u>31 December</u>	
	<u>2015</u>	<u>2014</u>	<u>2015</u>	<u>2014</u>
	<u>\$'000</u>	<u>\$'000</u>	<u>\$'000</u>	<u>\$'000</u>
Not later than one year	—	5	—	—
Later than one year and not later than five years	—	—	—	—
Less: future finance charges on finance leases	—	—	—	—
	—	<u>5</u>	—	—
Less: current maturities	—	(5)	—	—
Long-term maturity	—	—	—	—

Finance lease liabilities are in respect of office equipment with lease terms of three years. In the year ended 31 December 2015, the average effective borrowing rate was nil (2014: 7.18%). Finance lease liabilities are effectively secured obligations, as the rights to the leased asset revert to the lessor in the event of default. The fair value of the finance lease liabilities is not materially different to their carrying value.

Interest charged above reflects both cash and non-cash interest.

\* The original Proceeds of Issuance for the 2012 notes was \$150 million, of which \$118.7 million was extinguished and re-issued as 2014 notes, and \$16.2 million was extinguished during 2015.

The loss on extinguishment of debt is the difference between the carrying value of the extinguished debt and the cash received (\$1,389,000, 2014: \$718,000) plus the financing costs associated (\$471,000, 2014: \$2,480,000), minus the extinguishment of the conversion feature on the 2012 notes (\$103,000, 2014: \$2,100,000). Cash financing costs for the 2015 Notes amounted to \$108,000.

**for the year ended 31 December 2015**  
*(continued)*

**26. Debt (continued)**

***Long-term debt – December 2012 Financing***

On 6 December 2012 the Company entered into an agreement with BioPharma Secured Debt Fund II Holdings Cayman LP (“BioPharma”). Under this agreement, the Company granted to BioPharma a security interest in future receivables associated with the Vascepa patent rights, in exchange for \$100 million received at the closing of the agreement, the closing of which occurred in December 2012. The Company has agreed to repay BioPharma up to \$150 million of future revenue and receivables. The Company has made payment under the agreement of \$12.7 million through 31 December 2015. These payments were calculated based on the threshold limitation, as described below, as opposed to scheduled quarterly repayments.

Quarterly repayments, subject to the threshold limitation, are scheduled to be paid thereafter in accordance with the following schedule: \$8.0 million in the second quarter of 2014 and in each of the next two quarters, \$10.0 million per quarter in each of the next four quarters, \$15.0 million per quarter in each of the next four quarters and \$13.0 million in May 2017. All such payments reduce the remainder of the \$150 million in aggregate payments to BioPharma. These quarterly payments are subject to a quarterly threshold amount whereby if a calculated threshold, based on quarterly Vascepa revenues, is not achieved, the quarterly payment payable in that quarter can at the Company’s election be reduced and with the reduction carried forward without interest for payment in a future period. The payment of any carried forward amount is subject to similarly calculated threshold repayment amounts based on Vascepa revenue levels. Except upon a change of control in Amarin, the agreement does not expire until \$150 million has been repaid. Under the agreement, upon a change of control, the Company would be required to repay \$150 million, less any previously repaid amount, if a change of control event occurs after 31 December 2013. The Company can prepay after 1 October 2013, an amount equal to \$150 million less any previously repaid amount.

The Company currently estimates that its Vascepa revenue levels will not be high enough in each quarter to support repayment to BioPharma in accordance with the amounts in the repayment schedule. For each quarterly period since the inception of the debt, revenues were below the contractual threshold amount such that cash payments were calculated for each period reflecting the optional reduction amount as opposed to the contractual threshold payment due for each quarterly period. In accordance with the agreement with BioPharma, quarterly differences between the calculated optional reduction amounts and the repayment schedule amounts are rescheduled for payment beginning in the second quarter of 2017. Any such deferred repayments will remain subject to continued application of the quarterly ceiling in amounts due established by the calculated threshold limitation based on quarterly Vascepa revenues. No additional interest expense or liability is incurred as a result of such deferred repayments. These estimates will be re-evaluated each reporting period by the Company and adjusted if necessary, prospectively.

The Company determined certain features of the debt, principally the redemption upon a change of control, to be an embedded derivative requiring bifurcation. The fair value of the embedded derivative was calculated by determining the fair value of the debt with the change in control provision included and also without the change in control provision.

The difference was determined to be the fair value of the embedded derivative, and the Company recorded a derivative liability of \$14.6 million as a reduction to the carrying value of the debt. The fair value of this derivative liability is re-measured at each reporting period, with changes in fair value recognised in the statement of operations. The fair value of this derivative at 31 December 2015 is \$5.5 million and the Company recognised a loss on change in fair value of derivative liability of \$0.7 million for the period ended 31 December 2015.

There is an additional embedded derivative feature as of 31 December 2015 related to the Company’s option to prepay the debt. This derivative feature currently has nominal value as the Company has no intention of prepaying the debt.

As a result of changes in the business resulting in changes in future cash flows, the Company has changed its estimates to extend the period of time during which the debt is expected to remain outstanding. Accordingly, in accordance with IAS 39.AG8, since the estimated cash flows have changed materially, management has adjusted the carrying amount of the debt to reflect the revised cash flows. The revised carrying amount was calculated by determining the net present value of the revised estimated cash flows by discounting such cash flows based on the original effective interest rate. The carrying value of the debt component was determined to be \$74.0 million at 31 December 2015 and the Company recognised financial income of \$0.4 million in the statement of operations as a result of the change in carrying value during the year ended 31 December 2015. The Company will periodically evaluate the remaining term of the agreement and the carrying value will be reassessed in the event that there is a material change in the Company’s projected cash flows.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**26. Debt (continued)**

*Long-term debt – December 2012 Financing (continued)*

To secure the obligations under the agreement with BioPharma, the Company granted BioPharma a security interest in the Company's patents, trademarks, trade names, domain names, copyrights, know-how and regulatory approvals related to the covered products, all books and records relating to the foregoing and all proceeds of the foregoing, referred to collectively as the collateral. If the Company (i) fails to deliver a payment when due and does not remedy that failure within a specific notice period, (ii) fails to maintain a first-priority perfected security interest in the collateral in the United States and does not remedy that failure after receiving notice of such failure or (iii) becomes subject to an event of bankruptcy, then BioPharma may attempt to collect the maximum amount payable by the Company under this agreement (after deducting any payments we have already made). For the year ended 31 December 2015, the Company recorded \$13.8 million of interest expense on the BioPharma debt.

*January 2012 Exchangeable Senior Notes*

In January 2012, the Company issued \$150.0 million in principal amount of 3.5% exchangeable senior notes due 2032 (the "2012 Notes"), a portion of which were subsequently exchanged (see discussion below of May 2014 Exchangeable Senior Notes). The 2012 Notes were issued by Corsicanto Limited, an Irish limited company. Corsicanto Limited is a wholly-owned subsidiary of Amarin. The general, unsecured, senior obligations are fully and unconditionally guaranteed by Amarin but not by any of the Company's subsidiaries. Corsicanto Limited has no assets, operations, revenues or cash flows other than those related to the issuance, administration and repayment of the Notes.

There are no significant restrictions on the ability of Amarin to obtain funds from Corsicanto Limited in the form of cash dividends, loans, or advances. Net proceeds to the Company, after payment of underwriting fees and expenses, were approximately \$144.3 million.

The 2012 Notes have a stated interest rate of 3.5% per year, payable semi-annually in arrears on 15 January and 15 July of each year beginning on 15 July 2012, and ending upon the Notes' maturity on 15 January 2032. The Notes are subject to repurchase by the Company at the option of the holders on each of 19 January 2017, 19 January 2022, and 19 January 2027, at a price equal to 100% of the principal amount of the 2012 Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the repurchase date. The 2012 Notes are exchangeable under certain circumstances into cash, American Depositary Shares (ADSs), or a combination of cash and ADSs, at the Company's election, with an initial exchange rate of 113.4752 ADSs per \$1,000 principal amount of Notes. It is the Company's current intention to settle these obligations in cash. If the Company elected physical settlement, the net remaining outstanding portion of the 2012 Notes would be exchangeable into 1,714,270 ADSs. Based on the closing price of the Company's stock at 31 December 2015, the principal amount of the 2012 Notes would exceed the value of the shares if converted on that date by \$11.9 million.

Additional covenants include: (i) limitations on future indebtedness under certain circumstances, (ii) the timely filing of documents and reports pursuant to Section 13 or 15(d) of the Exchange Act with both the SEC and the Trustee, and (iii) maintaining the tradability of the Notes. The Company is required to use commercially reasonable efforts to procure and maintain the listing of the 2012 Notes on the Global Exchange Market operated under the supervision of the Irish Stock Exchange (or other recognised stock exchange as defined in the Note Indenture). If the 2012 Notes are not freely tradable, as a result of restrictions pursuant to U.S. securities law or the terms of the Indenture or the Notes, the Company shall pay additional interest on the 2012 Notes at the rate of 0.50% per annum of the principal amount of 2012 Notes outstanding for each day during such period for which the Company's failure to file has occurred and is continuing or for which the 2012 Notes are not freely tradable.

The Company may not redeem the 2012 Notes prior to 19 January 2017, other than in connection with certain changes in the tax law of a relevant taxing jurisdiction that result in additional amounts becoming due with respect to payments and/or deliveries on the Notes. On or after 19 January 2017 and prior to the maturity date, the Company may redeem for cash all or part of the 2012 Notes at a redemption price equal to 100% of the principal amount of the 2012 Notes to be redeemed, plus accrued and unpaid interest to, but excluding, the redemption date. There is no prepayment penalty or sinking fund provided for the Notes. If the Company undergoes a fundamental change, holders may require the Company to repurchase for cash all or part of their 2012 Notes at a repurchase price equal to 100% of the principal amount of the 2012 Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the fundamental change repurchase date. The 2012 Notes are the Company's senior unsecured obligations and rank senior in right of payment to the Company's future indebtedness that is expressly subordinated in right of payment to the 2012 Notes and equal in right of payment to the Company's future unsecured indebtedness that is not so subordinated. The 2012 Notes are

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**26. Debt (continued)**

*January 2012 Exchangeable Senior Notes (continued)*

effectively junior in right of payment to future secured indebtedness to the extent of the value of the assets securing such indebtedness.

The 2012 Notes are exchangeable under certain circumstances. On issue the Company calculated the fair value of the liability component of the 2012 Notes to be \$126.2 million, and the excess of the principal amount of the debt over the liability component of \$23.8 million was allocated to the conversion option resulting in a discount on the debt and a derivative liability. The discount created from allocating proceeds to the conversion option is being amortised to interest expense using the effective interest method over the Notes' original estimated life, which was calculated to be a period of twenty-four months. The effective interest rate of the 2012 Notes is 14.4%. The fair value of the derivative liability is re-measured at each reporting period, with changes in fair value recognised in the statement of operations. The Company recognised a gain of \$0.2 million on change in fair value of derivative liability for the period ended 31 December 2015.

The Company also recorded a debt discount to reflect the value of the underwriter's discounts and offering costs. A portion of the debt discount from underwriter's discounts and offering costs was allocated to the derivative liability and liability components of the 2012 Notes in proportion to the proceeds allocated to each component. The portion of the debt discount and underwriters' discounts and offering costs allocated to the derivative liability and debt discount components have been expensed as of 31 December 2015. The carrying value of the Notes is \$13.5 million as of 31 December 2015, which is net of the May 2014 exchanged notes and a repayment of \$14.3 million of the carrying amount (\$16.2 million principal) in November 2015 described below.

*May 2014 Exchangeable Senior Notes*

In May 2014, the Company entered into separate, privately negotiated exchange agreements with certain holders of the 2012 Notes pursuant to which Corsicanto exchanged \$118.7 million in aggregate principal amount of the existing 2012 Notes for \$118.7 million in aggregate principal amount of new 3.50% May 2014 Exchangeable Senior Notes due 2032, following which \$31.3 million in aggregate principal amount of the 2012 Notes remained outstanding with terms unchanged (the 2012 Notes and 2014 Notes are referred to collectively as the "Notes").

The 2014 Notes have a stated interest rate of 3.5% per year, payable semi-annually in arrears on 15 January and 15 July of each year beginning on 15 July 2014, and ending upon the 2014 Notes' maturity on 15 January 2032, unless earlier repurchased or redeemed by Corsicanto or exchanged by the holders. At any time after the issuance of the 2014 Notes and prior to the close of business on the second business day immediately preceding 15 January 2032, holders may exchange the 2014 Notes at their option. If prior to 15 January 2018, a make-whole fundamental change (as defined in the Indenture) occurs or the Company elects to redeem the 2014 Notes in connection with certain changes in tax law, in each case as described in the Indenture, and a holder elects to exchange its 2014 Notes in connection with such make-whole fundamental change or election, as the case may be, such holder may be entitled to an increase in the exchange rate as described in the Indenture. In the event of physical settlement, the 2014 Notes would be exchangeable into 45,666,925 ADSs. The initial exchange rate is 384.6154 ADSs per \$1,000 principal amount of the 2014 Notes (equivalent to an initial exchange price of approximately \$2.60 per ADS, or the Exchange Price), subject to adjustment in certain circumstances. The exchange rate is subject to adjustment from time to time upon the occurrence of certain events, including, but not limited to, the payment of cash dividends. Based on the closing price of the Company's stock at 31 December, 2015, the principal amount of the 2014 Notes would exceed the value of the shares if converted on that date by \$32.4 million.

Prior to 19 January 2018, the Company may not redeem the 2014 Notes at its option other than in connection with certain changes in the tax law of a relevant taxing jurisdiction that results in additional amounts (as defined in the Indenture) becoming due with respect to payments and/or deliveries on the 2014 Notes. On or after 19 January 2018, the Company may redeem for cash all or a portion of the 2014 Notes at a redemption price of 100% of the aggregate principal amount of the 2014 Notes to be redeemed, plus accrued and unpaid interest to, but not including, the redemption date. If a fundamental change (as defined in the Indenture) occurs, holders may require the Company to repurchase all or part of their 2014 Notes for cash at a fundamental change repurchase price equal to 100% of the aggregate principal amount of the 2014 Notes to be repurchased, plus accrued and unpaid interest to, but not including, the fundamental change repurchase date. In addition, holders of the 2014 Notes may require the Company to repurchase all or any portion of the 2014 Notes on each of 19 January of 2019, 2024 and 2029 for cash at a price equal to 100% of the aggregate principal amount of the 2014 Notes to be repurchased, plus accrued and unpaid interest to, but not including, the repurchase date.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**26. Debt (continued)**

***May 2014 Exchangeable Senior Notes (continued)***

The Company may elect at its option to cause all or any portion of the 2014 Notes to be mandatorily exchanged in whole or in part at any time prior to the close of business on the business day preceding 15 January 2032 if the Daily Volume Weighted Average Price (“VWAP”) (as defined in the Indenture) equals or exceeds 110% of the Exchange Price then in effect for at least 20 VWAP Trading Days (as defined in the Indenture) in any 30 VWAP Trading Day period. The Company may only exercise its optional exchange rights upon satisfaction of specified equity conditions, including that the ADSs issuable upon exchange of the 2014 Notes be eligible for resale without registration by non-affiliates and listed on The NASDAQ Global Market, its related exchanges or the New York Stock Exchange. If Corsicanto elects to exercise its optional exchange rights on or prior to 15 January 2018, each holder whose 2014 Notes are exchanged will upon exchange receive a specified number of additional ADSs as set forth in the Indenture. Upon such a declaration of acceleration, such principal and accrued and unpaid interest, if any, will be due and payable immediately. Upon the occurrence of certain events of bankruptcy, insolvency or reorganisation involving Corsicanto, 100% of the principal of and accrued and unpaid interest, if any, on all of the 2014 Notes will become due and payable automatically. Notwithstanding the foregoing, the Indenture will provide that, to the extent Corsicanto elects and for up to 360 days, the sole remedy for an event of default relating to certain failures by Corsicanto or the Company, as the case may be, to comply with certain reporting covenants in the Indenture consists exclusively of the right to receive additional interest on the 2014 Notes. Additional covenants pertaining to the 2012 Notes (as described above for the January 2012 Exchangeable Senior Notes) are also applicable to the May 2014 Notes.

As a result of the note exchange (as described above), the Company assessed both quantitative and qualitative aspects of the features of the 2014 Notes as compared to the 2012 Notes. Such assessment resulted in the conclusion that the features of the 2014 Notes represent a substantive modification from the 2012 Notes as the terms of the exchange resulted in a substantive modification to the embedded conversion feature within the 2012 Notes, and as such should be accounted for as an extinguishment of debt. In accordance with IAS 39.39, IAS 39.40, IAS 39.41, IAS 39.42 and IAS 39.AG 62, the Company extinguished the 2012 Notes by recording a loss on extinguishment of the liability component of \$1.1 million. The 2014 Notes were recorded at fair value of \$90.8 million representing a \$27.9 million discount to par. In addition the Company recognised \$2.5 million in underwriter’s fees and offering costs and recognised those costs as part of the loss on extinguishment of debt. The Company further allocated \$21.9 million, \$3.5 million and \$18.2 million of the \$90.8 million fair value of the 2014 Notes to the derivative liability related to the conversion option, the derivative liability related to the fundamental change redemption feature and the derivative liability related to the put option, respectively (as described above). During the year ended 31 December 2015, the Company recognised a \$21.6 million loss on the change in fair value of the conversion option, \$0.5 million gain on the change in fair value of the redemption feature and a \$1.9 million gain on the change in fair value of the put option feature. The fair value of these derivative liabilities is re-measured at each reporting period, with changes in fair value recognised in the statement of operations and any changes in the assumptions used in measuring the fair value of the derivative liability could result in a material increase or decrease in its carrying value. The Company will periodically evaluate the remaining term of the agreement and the carrying value will be reassessed in the event that there is a material change in the Company’s projected cash flows. The carrying value of the Notes is \$63.1 million as of 31 December 2015.

***November 2015 Exchangeable Senior Notes***

In November 2015, the Company issued \$31.3 million in principal amount of 3.5% exchangeable senior notes due 2032 (the “2015 Notes”), a portion of the proceeds which was used to pay down \$16.2 million principal of the 2012 Notes, following which \$15.1 million in aggregate principal amount of the 2012 Notes remained outstanding with terms unchanged (the 2012, 2014, and 2015 Notes are referred to collectively as the “Notes”). The 2015 Notes were issued by the Parent Company. The general, unsecured, senior obligations are fully and unconditionally guaranteed by Amarin but not by any of the Company’s subsidiaries.

The 2015 Notes have a stated interest rate of 3.5% per year, payable semi-annually in arrears on 15 January and 15 July of each year beginning on 15 January 2016, and ending upon the 2015 Notes’ maturity on 15 January 2032, unless earlier repurchased or redeemed by Amarin or exchanged by the holders. At any time after the issuance of the 2015 Notes and prior to the close of business on the second business day immediately preceding 15 January 2032, holders may exchange the 2015 Notes at their option. If prior to 15 January 2018, a make-whole fundamental change (as defined in the Indenture) occurs or the Company elects to redeem the 2015 Notes in connection with certain changes in tax law, in each case as described in the Indenture, and a holder elects to exchange its 2015 Notes in connection with such make-whole fundamental change or election, as the case may be, such holder may be entitled to an increase in the exchange rate as described in the Indenture. In the event of physical settlement, the 2015 Notes would be exchangeable

*November 2015 Exchangeable Senior Notes (continued)*

into 12,025,385 ADSs. The initial exchange rate is 384.6154 ADSs per \$1,000 principal amount of the 2015 Notes (equivalent to an initial exchange price of approximately \$2.60 per ADS, or the Exchange Price), subject to adjustment in certain circumstances. The exchange rate is subject to adjustment from time to time upon the occurrence of certain events, including, but not limited to, the payment of cash dividends. Based on the closing price of the Company's stock at 31 December, 2015, the principal amount of the 2014 Notes would exceed the value of the shares if converted on that date by \$8.5 million.

Prior to 19 January 2018, the Company may not redeem the 2015 Notes at its option other than in connection with certain changes in the tax law of a relevant taxing jurisdiction that results in additional amounts (as defined in the Indenture) becoming due with respect to payments and/or deliveries on the 2015 Notes. On or after 19 January 2018, the Company may redeem for cash all or a portion of the 2015 Notes at a redemption price of 100% of the aggregate principal amount of the 2015 Notes to be redeemed, plus accrued and unpaid interest to, but not including, the redemption date. If a fundamental change (as defined in the Indenture) occurs, holders may require the Company to repurchase all or part of their 2015 Notes for cash at a fundamental change repurchase price equal to 100% of the aggregate principal amount of the 2015 Notes to be repurchased, plus accrued and unpaid interest to, but not including, the fundamental change repurchase date. In addition, holders of the 2015 Notes may require the Company to repurchase all or any portion of the 2015 Notes on each of 19 January of 2019, 2024 and 2029 for cash at a price equal to 100% of the aggregate principal amount of the 2015 Notes to be repurchased, plus accrued and unpaid interest to, but not including, the repurchase date.

The Company may elect at its option to cause all or any portion of the 2015 Notes to be mandatorily exchanged in whole or in part at any time prior to the close of business on the business day preceding 15 January 2032 if the Daily VWAP (as defined in the Indenture) equals or exceeds 110% of the Exchange Price then in effect for at least 20 VWAP Trading Days (as defined in the Indenture) in any 30 VWAP Trading Day period. The Company may only exercise its optional exchange rights upon satisfaction of specified equity conditions, including that the ADSs issuable upon exchange of the 2015 Notes be eligible for resale without registration by non-affiliates and listed on The NASDAQ Global Market, its related exchanges or the New York Stock Exchange. If Amarin elects to exercise its optional exchange rights on or prior to 15 January 2018, each holder whose 2015 Notes are exchanged will upon exchange receive a specified number of additional ADSs as set forth in the Indenture. Upon such a declaration of acceleration, such principal and accrued and unpaid interest, if any, will be due and payable immediately. Upon the occurrence of certain events of bankruptcy, insolvency or reorganisation involving Amarin, 100% of the principal of and accrued and unpaid interest, if any, on all of the 2015 Notes will become due and payable automatically. Notwithstanding the foregoing, the Indenture will provide that, to the extent Amarin elects and for up to 360 days, the sole remedy for an event of default relating to certain failures by the Company, as the case may be, to comply with certain reporting covenants in the Indenture consists exclusively of the right to receive additional interest on the 2015 Notes. Additional covenants pertaining to the 2012 Notes (as described above for the January 2012 Exchangeable Senior Notes) are also applicable to the November 2015 Notes.

As a result of the note repayment (as described above), the Company assessed both quantitative and qualitative aspects of the features of the 2015 Notes as compared to the 2012 Notes. Such assessment resulted in the conclusion that the features of the 2015 Notes represent a substantive modification from the 2012 Notes as the terms of the exchange resulted in a substantive modification to the embedded conversion feature within the 2012 Notes, and as such should be accounted for as an extinguishment of debt. In accordance with IAS 39.39, IAS 39.40, IAS 39.41, IAS 39.42 and IAS 39.AG 62, the Company extinguished the 2012 Notes by recording a loss on extinguishment of the liability component of \$1.8 million. The 2015 Notes were recorded at fair value of \$27.4 million representing a \$3.9 million discount to par. In addition the Company recognised \$0.1 million in underwriter's fees and offering costs and recognised those costs as part of the loss on extinguishment of debt. The Company further allocated \$10.2 million, \$0.5 million and \$4.6 million of the \$27.4 million fair value of the 2015 Notes to the derivative liability related to the conversion option, the derivative liability related to the fundamental change redemption feature and the derivative liability related to the put option, respectively (as described above). During the year ended 31 December 2015, the Company recognised a \$0.7 million gain on the change in fair value of the conversion option, \$0.1 million loss on the change in fair value of the redemption feature and a \$0.4 million loss on the change in fair value of the put option feature. The fair value of these derivative liabilities is re-measured at each reporting period, with changes in fair value recognised in the statement of operations and any changes in the assumptions used in measuring the fair value of the derivative liability could result in a material increase or decrease in its carrying value. The Company will periodically evaluate the remaining term of the agreement and the carrying value will be reassessed in the event that there is a material change in the Company's

*(continued)*

**26. Debt (continued)**

*November 2015 Exchangeable Senior Notes (continued)*

projected cash flows.

During the year ended 31 December 2015, the Company recognised aggregate interest expense of \$18.7 million related to the Notes, of which \$5.3 million represents contractual coupon interest (accrued separately and not shown in the table above), and \$13.4 million represents amortisation of the debt discount created upon allocation of proceeds to the conversion option, put and fundamental change feature. At 31 December 2015, the Company had accrued interest of \$2.3 million, which has been included in other current liabilities. The Company made the contractual interest payments due on the Notes in 2015 of \$5.3 million. The carrying value of the debt component for the 2015 Notes was determined to be \$12.4 million at 31 December 2015, with the combined value of the 2012, 2014 and 2015 Notes at \$89.0 million at that time.

During the year ended 31 December 2015, the Parent recognised aggregate interest expense of \$0.4 million related to the 2015 Notes, of which \$0.1 million represents contractual coupon interest (accrued separately and not shown in the table above), and \$0.3 million represents amortisation of the debt discount created upon allocation of proceeds to the conversion option, put and fundamental change feature. At 31 December 2015, the Parent had accrued interest of \$0.1 million, which has been included in other current liabilities. The Company made no contractual interest payments due on the 2015 Notes in 2015. The carrying value of the debt component for the 2015 Notes was determined to be \$12.4 million at 31 December 2015.

*Parent company impact of derivatives on 2012 & 2014 Exchangeable Senior Notes*

As a result of issuance of the 2012 Exchangeable Senior Notes, it was determined that the conversion option feature of the notes had created a derivative liability of \$23.8 million on the Parent's standalone financials since the entity is the only one of the group able to convert the debt by issuing ADSs. The discount on the long-term payable to subsidiaries created from allocating proceeds to the conversion option is being amortised to interest expense using the effective interest method over the Notes' original estimated life, which was calculated to be a period of twenty-four months and was fully amortised as of January 2014. The fair value of the derivative liability is re-measured at each reporting period, and the Parent recognised a gain of \$0.3 million on change in fair value of derivative liability for the period ended 31 December 2015. The Parent further allocated \$21.9 million and \$3.5 million of the 2014 Notes to the derivative liability related to the conversion option and the derivative liability related to the fundamental change redemption feature, respectively. The discount on the long-term payable to subsidiaries created from allocating these liabilities is being amortised to interest expense using the effective interest method over the Notes' original estimated life, which was calculated to be a period of fifty-seven months. During the year ended 31 December 2015, the Parent recognised a \$21.6 million loss on the change in fair value of the conversion option and a \$0.5 million gain on the change in fair value of the redemption feature.

*Preference share purchase option derivative liability*

Pursuant to a pre-existing contractual right to participate in certain private placement transactions effected by the Company in connection with the subscription agreement executed on 5 March 2015, the Company determined that such right represented a derivative liability. This preferred stock purchase option derivative liability was carried at fair value and classified as Level 3 in the fair value hierarchy due to the use of significant unobservable inputs. The fair value of this liability was calculated using a Black-Scholes model and was determined to be \$0.9 million at inception. On 30 March 2015, this right was exercised and the liability was marked to fair value through such date with a loss on the change in fair value of \$1.0 million. The liability was then reclassified to permanent equity on such date. Any changes in the assumptions used to value the derivative liabilities, including the probability of a change in control, could result in a material change to the carrying value of such liabilities.

<b>At 31 December 2015</b>	<b>325</b>

At 31 December 2015 and 2014 provisions due within one year were \$132,000 and \$60,000, respectively. At 31 December 2015 and 2014 provisions greater than one year were \$193,000 and \$120,000, respectively.

***Onerous lease***

In November 2013, our lease at Bridge Street, Groton CT became onerous. We are obliged to pay rent to the end of the lease which expired in January 2015. In December 2013 we provided for the period post November 2013 to the date of expiration of the lease in January 2015.

During 2014 and 2015, Amarin surrendered portions of our Bedminster, NJ lease and this portion became onerous. We provided for the period post surrender to date of expiration of the lease in April 2018.

**28. Financial Instruments**

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and interest rate risk), liquidity and credit risk. Details of the Group's financial instruments with regard to liquidity risk, interest rate risk and foreign currency risk are disclosed in the following sections to this note. It has been, and continues to be, the policy of the Board to minimise the exposure of the Group to these risks.

The Group has available financial instruments including finance leases, cash and other liquid resources, and various items, such as receivables and trade payables that arise directly from its operations.

There has been no change to the Group's exposure to financial risks or the manner in which these risks are managed and measured.

**Capital risk management**

The Group's objective when managing its capital structure is to safeguard the Group's ability to continue as a going concern. The Group raises capital through the issuance of shares and debt. Please refer to Note 29 for further details on the Group's issued share capital and to Note 26 for further details on the Group's issued debt.

The balance sheet position at 31 December 2015 is not representative of the position throughout the period as cash and shares fluctuate considerably depending on when fundraising activities have occurred.

**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**28. Financial Instruments (continued)**

**Liquidity risk**

Our sources of liquidity as of 31 December 2015 include cash and cash equivalents of \$107.6 million. Our projected uses of cash include the continued funding of the REDUCE-IT study, the continued commercialisation of Vascepa, working capital and other general corporate activities. Our cash flows from operating, investing and financing activities are reflected in the consolidated statements of cash flows.

We believe that our cash will be sufficient to fund our projected operations for at least the next 12 months, including advancement of the REDUCE-IT cardiovascular outcomes study, commercialisation of Vascepa, working capital and other general corporate activities. This is based on our current operational plans and activities at normal levels and does not assume any cash inflows from partnerships or other dilutive or non-dilutive financings in the longer-term.

The table below analyses the Group's and Parent Company's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group may be required to pay. The table includes both interest and principal cash flows. The amounts disclosed for exchangeable senior notes and long-term debt are the undiscounted cash flows including interest and hence will not agree to the amount disclosed on the balance sheet. The amounts disclosed for finance leases are equal to their carrying balances as the impact of discounting is not significant.

**28. Financial Instruments (continued)**

**Credit risk**

The Group and Parent Company are exposed to credit-related losses in the event of non-performance by third parties to financial instruments. Credit risk arises predominantly from cash and cash equivalents, including deposits with banks. For our principal banks and institutions, only independently rated parties with a minimum rating of 'A' are accepted. At year-end, all principal banks used by the Group and Parent Company were 'A' rated.

**Creditor payment policy**

It is Amarin's normal procedure to agree terms of transactions, including payment terms, with suppliers in advance. Payment terms vary, reflecting local practice throughout the world. It is Amarin's policy that payments be made in a timely manner, provided suppliers perform in accordance with the agreed terms. Amarin's policy follows the BIS's Better Payment Policy, copies of which can be obtained from the Better Payments Group's website.

**Financial liabilities**

The Group's non-derivative financial liabilities at 31 December 2015 and 2014 are classified at amortised cost and comprise trade and other payables, borrowings and finance leases.

	<b>31 December 2015 (\$'000)</b>				<b>31 December 2014 (\$'000)</b>

**Market risk/interest rate risk profile of financial assets**

The investment in Chemport described in Note 19 of \$174,000 (2014: \$174,000) is categorised as a held to maturity financial asset.

The Group's other financial assets are all categorised as loans and receivables and comprise cash, other receivables, short-term deposits and long-term deposits.

	31 December 2015 (\$'000)				31 December 2014 (\$'000)			
	Floating rate	Fixed rate	Non-interest bearing	Total	Floating rate	Fixed rate	Non-interest bearing	Total

Euro	304	—	9	313	394	—	334	728
US\$	83,085	—	41,988	125,073	107,580	—	23,390	130,970
<b>Total</b>	<b>83,941</b>	<b>—</b>	<b>43,679</b>	<b>127,620</b>	<b>108,602</b>	<b>—</b>	<b>25,472</b>	<b>134,074</b>

The Parent's financial assets are all categorised as loans and receivables and comprise cash, other receivables, short-term deposits and other investments.

	31 December 2015 (\$'000)				31 December 2014 (\$'000)			
	Floating rate	Fixed rate	Non-interest bearing	Total	Floating rate	Fixed rate	Non-interest bearing	Total
Sterling	—	—	16	16	51	—	21	72
Euro	—	—	—	—	—	—	—	—
US\$	38,022	—	—	38,022	10,170	—	—	10,170
<b>Total</b>	<b>38,022</b>	<b>—</b>	<b>16</b>	<b>38,038</b>	<b>10,221</b>	<b>—</b>	<b>21</b>	<b>10,242</b>

The Group's principal currency is that of the United States (U.S. dollar), which is exposed to the currency of the UK (Sterling) and the currency of Ireland (Euro). The following table details the Group's sensitivity to a ten per cent increase and decrease in the U.S. dollar against the relevant foreign currencies. Ten per cent is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period-end for a ten per cent change in foreign currency rates. A positive number below indicates a decrease in net loss where the U.S. dollar strengthens ten per cent against the relevant currencies. For a ten per cent weakening of the U.S. dollar against the relevant currencies, there would be a comparable impact on the net loss, and the balances below would be negative.

	Sterling Impact (\$'000)		Euro Impact (\$'000)	
	2015	2014	2015	2014
Net loss	(220)	(230)	(4)	(22)
<b>Total</b>	<b>(220)</b>	<b>(230)</b>	<b>(4)</b>	<b>(22)</b>

The balances in the above table are mainly attributable to receivables and payables in the Group at the balance sheet date. The Group's sensitivity to foreign currency has decreased during the current period mainly due to the reduction in the volume of foreign currency transactions in 2015 as compared to 2014.

**Interest rate sensitivity analysis**

At 31 December 2015, the Group had cash balances of approximately \$107.6 million, and earned \$0.1 million in interest income during 2015. An interest rate sensitivity analysis was performed to see what the impact would be should interest rates increase by 1%, and it was determined that interest income would increase approximately \$1.3 million, when using the Group's average 2015 cash balance.

**Fair value measurements**

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1—Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2—Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

**for the year ended 31 December 2015**  
*(continued)*

**28. Financial Instruments (continued)**

The estimated fair value of the long-term debt pursuant to the December 2012 financing is calculated utilizing the same Level 3 inputs utilised in valuing the related derivative liability. The estimated fair value of the 2012 Notes and 2014 Notes is calculated based on Level 1 quoted bond prices, while the estimated fair value of the 2015 Notes is calculated based on Level 2 quoted bond prices for the 2014 Notes. The carrying value of the 2012 Notes at 31 December 2015 and 2014 includes a debt discount of \$1.6 million and \$6.0 million, respectively, which is being amortized as non-cash interest expense over the expected term of the 2012 Notes, through January 2017. The carrying value of the 2014 Notes at 31 December 2015 and 2014 includes a debt discount of \$21.7 million and \$31.9 million, respectively, which is being amortized as non-cash interest expense over the expected term of the 2014 Notes, through January 2019. The carrying value of the 2015 Notes at 31 December 2015 includes a debt discount of \$3.8 million, which is being amortized as non-cash interest expense over the expected term of the 2015 Notes, through January 2019. The change in the estimated fair values of these liabilities from 31 December 2014 to 31 December 2015 is largely related to changes in the quoted bond prices.

The Company's 2014 Notes and 2015 Notes both contain a redemption feature whereby, upon occurrence of a change in control, the Company would be required to repurchase the notes. The Company determined these redemption features to be embedded derivatives. The derivatives are carried at fair value and are classified as Level 3 in the fair value hierarchy due to the use of significant unobservable inputs. The fair value of each embedded derivative was calculated using a probability-weighted model incorporating management estimates of the probability of a change in control occurring, and by determining the fair value of the debt with and without the change in control provision included. The difference between the two was determined to be the fair value of the embedded derivative. As of 31 December 2015, the fair value of the derivatives related to the 2014 Notes and 2015 Notes was determined to be \$2.1 million and \$0.6 million, respectively, and the debt was valued by using (i) the estimated remaining term of the notes, (ii) a bond yield of 25.6%, (iii) a risk-free interest rate of 2.9% and (iv) volatility of 89.0%.

The Company's December 2012 financing agreement with BioPharma Secured Debt Fund II Holdings Cayman LP (discussed in Note 26 above) contains a redemption feature whereby, upon a change of control, the Company would have been required to pay \$150 million, less any previously repaid amount. The Company determined this redemption feature to be an embedded derivative, which is carried at fair value and is classified as Level 3 in the fair value hierarchy due to the use of significant unobservable inputs. At 31 December 2015, the fair value of the derivative was determined to be \$5.5 million, and the debt was valued using a probability-weighted model incorporating management estimates for potential change in control, by comparing debt issues of similar companies with (i) remaining terms of between 2.0 and 7.3 years, (ii) coupon rates of between 6.6% and 12.5% and (iii) market yields of between 13.0% and 30.7%.

Any changes in the assumptions used to value the derivative liabilities, including the probability of a change in control, could result in a material change to the carrying value of such liabilities.

The fair value of amounts owed by subsidiary undertakings is considered to be at Level 3 of the hierarchy, as their calculation requires unobservable inputs. Fair value of intercompany receivables was estimated using a ten-year life and an estimated interest rate equal to the Parent Company's estimated borrowing rate, based on a company-specific estimated risk premium.

	174,053	142,824

During the year ended 31 December 2015, the Company received a refund of nil (2014:\$3.2 million) for UK stamp duty taxes paid in prior periods related to the issuance of common stock. Such proceeds were recorded as an increase to share premium, as the original expenses were recorded to share premium in prior periods.

During the year ended 31 December 2015, the Group issued 8,967,314 ordinary shares (£0.50 par) through option and warrant exercises, restricted stock unit vesting, and preferred stock conversions. In 2015, there were 18,020 options exercised, 1,844,585 warrants exercised, 821,376 restricted stock units vested, and 6,283,333 preference shares converted. The option and warrant exercises resulted in cash proceeds of \$1,443,000 (2014: \$1,636,000) to Share Capital, and \$1,301,000 (2014: \$322,000) to Share Premium. Also refer to the Consolidated and Parent Company Statements of Changes in Equity.

Due to these issuances, share capital increased \$2,061 thousand from the \$1,443 thousand of cash proceeds, as well as the vesting of \$618 thousand of restricted stock transferred from share-based payments. Share premium increased \$4,914 thousand from the \$1,301 thousand of cash proceeds, as well as the vesting of \$1,141 thousand of restricted stock transferred from share-based payments, and \$2,472 thousand transferred from warrants issued. The total impact of the restricted stock vesting on the share-based payment reserves resulted in \$1,759 thousand transferred between share capital and share premium.

***Principal Rights and Restrictions***

The Company has one class of ordinary shares at £0.50 each which carry no right to fixed income. Each share carries the right to one vote at general meetings of the Company. Under its Articles of Association, the Company has authority to issue unlimited ordinary shares.

There are no specific restrictions on the size of a holding nor on the transfer of shares, which are both governed by the general provisions of the Articles of Association and prevailing legislation. The Directors are not aware of any agreements between holders of the Company's shares that may result in restrictions on the transfer of securities or on voting rights. No person has any special rights of control over the Company's share capital and all issued shares are fully paid.

With regard to the appointment and replacement of Directors, the Company is governed by its Articles of Association, the Companies Act and related legislation. The Articles themselves may be amended by special resolution of the shareholders. The powers of Directors are described in the Main Board Terms of Reference, copies of which are available on request.

**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**29. Equity (continued)**

*(b) Preference Shares*

On 5 March, 2015, the Company entered into a subscription agreement with four institutional investors (the “Purchasers”), including both existing and new investors, for the private placement of 352,150,790 restricted American Depositary Shares, each representing one (1) share of Amarin’s Series A Convertible Preference Shares, par value £0.05 per share, in the capital of the Company (“Series A Preference Shares”), resulting in gross proceeds to the Company of \$52.8 million. The closing of the private placement occurred on 30 March, 2015.

For each restricted American Depositary Share, the Purchasers paid a negotiated price of \$0.15 (equating to \$1.50 on an as-if-converted-to-ordinary-shares basis), resulting in \$52.8 million in aggregate gross proceeds to the Company, before deducting estimated offering expenses of approximately \$0.7 million. The net proceeds are reflected as preference shares in the accompanying consolidated balance sheets.

Each ten (10) Series A Preference Shares may be consolidated and re-designated as one (1) ordinary share, par value £0.50 per share, in the capital of the Company, each ordinary share to be represented by American Depositary Shares (“ADSs”), provided that consolidation will be prohibited if, as a result, the holder of such Series A Preference Shares and its affiliates would beneficially own more than 4.99% of the total number of Amarin ordinary shares or ADSs outstanding following such re-designation (the “Beneficial Ownership Limitation”). By written notice to the Company, a holder may from time to time increase or decrease the Beneficial Ownership Limitation to any other percentage not in excess of 19.9% specified in such notice; provided that any such increase will not be effective until the sixty-first (61st) day after such notice is delivered to the Company. This consolidation and re-designation may be effected by a holder of Series A Preference Shares following the first to occur of the resale of the ADSs representing the ordinary shares being registered for resale under the Securities Act pursuant to an effective registration statement, following any sale of the ADSs representing the ordinary shares pursuant to Rule 144 under the Securities Act, or if such ADSs representing the ordinary shares are eligible for sale under Rule 144, following the expiration of the one-year holding requirement under Rule 144. During the year ended 31 December, 2015, at the request of the holders, a portion of the Series A Preference Shares were consolidated and re-designated, resulting in the issuance of 6,283,333 ADSs such that a maximum of 32,818,464 ordinary shares remain issuable upon future consolidation and re-designation of the remaining Series A Preference Shares, inclusive of the shares issued in July 2015 as discussed below, subject to certain adjustments for dilutive events.

Except as otherwise provided in the Series A Preference Share Terms or as required by applicable law, the Series A Preference Shares have no voting rights. However, as long as any Series A Preference Shares are outstanding, the Company cannot, without the approval of the holders of seventy-five percent (75%) of the then outstanding Series A Preference Shares, alter or change adversely the powers, preferences or rights attaching to the Series A Preference Shares or enter into any agreement with respect to the foregoing.

Holders of the Series A Preference Shares are entitled to receive, and the Company is required to pay, dividends (other than dividends in the form of ordinary shares) on the Series A Preference Shares equal (on an as-if-converted-to-ordinary-shares basis) to and in the same form as dividends (other than dividends in the form of ordinary shares) actually paid on ordinary shares when, as and if such dividends (other than dividends in the form of ordinary shares) are paid on the ordinary shares.

The restricted American Depositary Shares and Series A Preference Shares have not been registered under the Securities Act of 1933, as amended (the “Securities Act”), or state securities laws and may not be offered or sold in the United States absent registration with the Securities and Exchange Commission (SEC) or an applicable exemption from registration requirements. The Company filed a registration statement with the SEC covering the resale of the restricted American Depositary Shares and the ADSs representing ordinary shares created by the consolidation and re-designation of the Series A Preference Shares (the “Registrable Securities”) on 9 April, 2015. In addition, the Company agreed to use its commercially reasonable best efforts to effect and to keep the registration, and any qualification, exemption or compliance under state securities laws which the Company determines to obtain, continuously effective, and to keep the Registration Statement free of any material misstatements or omissions, until the earlier of (a) 11 March, 2017 or (b) the date on which all Registrable Securities held by Purchasers may be sold or transferred in compliance with Rule 144 under the Securities Act, without any volume or manner of sale restrictions.

On 30 March, 2015, in connection with the closing of the private placement, and pursuant to a pre-existing contractual right to participate in certain private placement transactions effected by the Company, the Company entered into a separate subscription agreement with an existing investor, Sofinnova Venture Partners VII L.P. (Sofinnova), for the

**29. Equity (continued)**

*(b) Preference Shares (continued)*

purchase of an additional \$5.8 million of restricted American Depositary Shares, each representing one (1) share of the Company's Series A Preference Shares, at the same price per share and otherwise on substantially the same terms as the initial private placement (the "Second Private Placement"). In accordance with applicable marketplace rules of the NASDAQ Stock Market, the consummation of the Second Private Placement was conditioned upon approval by the Company's shareholders at a future meeting of the Company's shareholders. Such approval was received at the Company's Annual General Meeting of Shareholders on 6 July, 2015 and as a result, the closing of the Second Private Placement occurred on 10 July, 2015. The Company issued 38,867,180 restricted ADSs, each representing one Series A Preference Share, which may be consolidated and re-designated from time to time up to a maximum of 3,886,718 ordinary shares, each ordinary share to be represented by one ADS. For each restricted ADS, Sofinnova paid a negotiated price of \$0.15 (equating to \$1.50 on an as-if-converted-to-ordinary-shares basis) resulting in gross proceeds to the Company of \$5.8 million, before deducting estimated offering expenses of approximately \$0.2 million. Dr. James Healy, a member of the Company's Board, is a managing member of Sofinnova Management VII, L.L.C., which is the general partner of Sofinnova.

The existence of this preferred stock purchase option was determined to be a derivative liability effective 5 March, 2015, the date on which the private placement was initially subscribed. The fair value of this liability was calculated using a Black-Scholes model and was determined to be \$868 thousand at inception and was charged to retained deficit as a deemed non-cash dividend to Sofinnova. The liability was then marked to fair value as of 30 March, 2015, the date on which the Company executed a subscription agreement with Sofinnova, resulting in a charge of \$868 thousand through change in fair value of derivatives. The liability of \$1.8 million was reclassified to permanent equity (share premium) on such date.

**31. Share-based Payments**

**2011 Stock Incentive Plan and Stock Option Plan**

On 29 April 2011 the Board, upon the recommendation of the Remuneration Committee, adopted the 2011 Stock Incentive Plan ("2011 Plan"), which was approved by the Company's shareholders on 12 July 2011. The 2011 Plan replaced the Company's 2002 Stock Option Plan ("2002 Plan"), which expired on 1 January 2012. The maximum number of the Company's ordinary shares of £0.50 each or any ADSs, as to be issued under the 2011 Plan, shall not exceed the sum of (i) 31.5 million newly authorised Shares available for award and (ii) the number of Shares that remained available for grants under the Company's 2002 Plan and (iii) the number of Shares underlying then outstanding awards under the 2002 Plan that could be subsequently forfeited, cancelled, expire or are otherwise terminated. The award of stock options (both incentive and non-qualified options) and restricted stock units, and awards of unrestricted Shares to Directors are permitted. The 2011 Plan is administered by the Remuneration Committee of our Board of Directors and expires on 12 July 2021.

A summary of activity under the 2011 Stock Option Plan for the years ended 31 December 2015 and 2014 is as follows: Under the terms of the 2011 Plan, options are exercisable at various periods and expire as set forth in the grant document. In the case where an incentive stock option is granted, the maximum expiration date is not later than 10 years from the date of grant. The following table summarises all stock option activity for the years ended 31 December 2015 and 2014.

	<b>2015</b>	<b>2015</b>	<b>2014</b>	<b>2014</b>
	<b>Number of options</b>	<b>Weighted average exercise price</b>	<b>Number of options</b>	<b>Weighted average exercise price</b>
	<b>Number</b>	<b>\$</b>	<b>Number</b>	<b>\$</b>
<b>Outstanding at 1 January</b>	10,670,412	4.95	9,330,005	6.64

Exercised	(18,020)	1.76	(234,500)	1.31
Forfeited	(810,496)	3.75	(1,696,483)	9.02
<b>Outstanding at 31 December</b>	<b>17,818,053</b>	<b>3.76</b>	<b>10,670,412</b>	<b>4.95</b>
<b>Exercisable at 31 December</b>	<b>9,405,549</b>	<b>5.02</b>	<b>7,262,626</b>	<b>5.33</b>

During the periods ended 31 December 2015 and 2014 all options were granted at the market price. Options outstanding and exercisable at the periods ended 31 December 2015 and 2014 had the following attributes:

	<b>2015</b>	<b>2015</b>	<b>2014</b>	<b>2014</b>
	<b>Number of options</b>	<b>Weighted average exercise price</b>	<b>Number of options</b>	<b>Weighted average exercise price</b>
	<b>Number</b>	<b>\$</b>	<b>Number</b>	<b>\$</b>
<b>Outstanding at 31 December</b>				
Options granted at market price	17,818,053	3.76	10,670,412	4.95
<b>Exercisable at 31 December</b>				
Options granted at market price	9,405,549	5.02	7,262,626	5.33

The weighted average fair value of the stock options granted during the year ended 31 December 2015 and 2014 was \$1.51 and \$1.35, respectively.

For the year ended 31 December 2015, the Company received \$31 thousand in cash from the exercise of options, and 810,496 options lapsed. For the year ended 31 December 2014, the Company received \$0.3 million in cash from the exercise of options, and 1,696,483 options lapsed.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**31. Share-based Payments (continued)**

*2011 Stock Incentive Plan and Stock Option Plan (continued)*

The following assumptions were used to estimate the fair values of options granted:

	<b>Years ended 31 December</b>	
	<b>2015</b>	<b>2014</b>
Risk-free interest	1.9% to 2.6%	0.8% to 1.6%
Volatility	83% to 97%	90%
Expected forfeiture rate	5%	5%
Dividend yield	—	—
Expected option life (in years)	6.25	4 to 4.1

The fair values relating to all options granted were estimated on the date of grant using the Binomial Lattice option pricing model. Expected volatilities are based on historical volatility of our stock and other factors, such as implied market volatility. This is based on analysis of daily price changes over the most recent six-and-a-quarter-year measurement and used historical exercise data based on the age at the grant of the option holder to estimate the option's expected term, which represents the period of time that the options granted are expected to be outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. Estimated forfeitures are based on the Company's historical forfeiture activity. No dividend yield has been assumed as the Company does not currently pay dividends on its common stock and does not anticipate doing so in the foreseeable future. We recognise compensation expense for the fair values of those awards which have graded vesting on an accelerated recognition basis. Employee stock options granted prior to 30 June 2009 generally vested over a three-year service period. Employee stock options granted after 30 June 2009 generally vest over a four-year service period. All employee stock options are settled by the issuance of new ordinary shares. Compensation expense recognised for all option grants is net of estimated forfeitures and is recognised over the awards' respective requisite service periods. The vesting of certain stock options is contingent upon the attainment of performance criteria. The probability that such criteria will be achieved is assessed by management each reporting period and compensation expense for such awards is only recorded to the extent that the attainment of the performance criteria is deemed to be probable.

**Restricted Stock Units**

The 2011 Plan also allows for granting of restricted stock unit awards under the terms of the Plan. The restricted stock units vest based upon a time-based service condition, a performance condition, or both. The probability that any performance criteria will be achieved is assessed by management each reporting period and compensation expense for such awards is only recorded to the extent that the attainment of the performance criteria is deemed to be probable. Restricted stock units are recorded as compensation expense based on fair value, representing the market value of the Company's common stock on the date of grant. The fair value of restricted stock units is amortized on an accelerated recognition basis over the service period until the shares have vested. The following table presents the restricted stock unit activity for the years ended 31 December 2015 and 2014.

	<b>2015</b>	<b>2015</b>	<b>2014</b>	<b>2014</b>

*2011 Stock Incentive Plan and Stock Option Plan (continued)*

The operating loss for the years ended 31 December 2015 and 2014 includes a non-cash charge for share-based compensation as follows:

	<b>2015</b>	<b>2014</b>
	<b>(\$'000)</b>	<b>(\$'000)</b>
R&D	3,695	777
G&A	12,963	3,550
<b>Total</b>	<b>16,658</b>	<b>4,327</b>

**32. Capital Commitments**

Purchase obligations that have been contractually committed to but have not been provided for in the financial statements as of 31 December 2015 and 2014 amounted to \$44,700,000 and \$55,500,000, respectively. Purchase obligations relate primarily to manufacturing agreements with third parties for the production of our product. These agreements include annual purchase levels enabling Amarin to maintain supply exclusivity with each respective supplier, and to prevent potential termination of the agreements. The agreements also include a provision that any shortfall in the minimum purchase commitments is payable in cash, for which the maximum amount payable is reflected in the above amounts. These minimum purchase levels do not contractually begin until the applicable supplemental NDA, or sNDA, for the supplier is approved by the FDA, if ever, and upon the achievement of manufacturing capacity expansion. Refer to Note 33b for further information.

Under the 2004 share repurchase agreement with Laxdale Limited, or Laxdale, upon receipt of marketing approval in Europe for the first indication for Vascepa (or first indication of any product containing Amarin Neurosciences Limited intellectual property acquired from Laxdale in 2004), the Company must make an aggregate stock or cash payment to the former shareholders of Laxdale (at the sole option of each of the sellers) of £7.5 million (approximately \$11.1 million as of 31 December, 2015). Also under the Laxdale agreement, upon receipt of a marketing approval in the United States or Europe for a further indication of Vascepa (or further indication of any other product using Amarin Neurosciences Limited intellectual property), the Company must make an aggregate stock or cash payment (at the sole option of each of the sellers) of £5 million (approximately \$7.4 million as of 31 December, 2015) for each of the two potential market approvals (i.e., £10 million maximum, or approximately \$14.8 million as of 31 December, 2015).

Upon approval of Vascepa by the FDA on 26 July, 2012, the Company capitalised this first Laxdale milestone (\$11.6 million on 26 July, 2012) as an intangible asset. This long-term asset is being amortised over the estimated useful life of the intellectual property the Company acquired from Laxdale and the Company recognised amortisation expense of \$0.6 million during the year ended 31 December 2015. The Company paid \$12.1 million in cash in November 2012 in settlement of this liability and recognised a currency exchange loss of \$0.5 million.

The Company has no provision for any of the obligations above since the amounts are either not probable or estimable at 31 December 2015.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**33. Financial Commitments**

*(a) Operating Leases*

The Group and Parent Company had future minimum payments under non-cancellable operating leases as follows:

	2015		2014	
	Land and buildings		Land and buildings	
	Group	Parent Company	Group	Parent Company
	\$'000	\$'000	\$'000	\$'000
< 1 year	523	—	636	—
> 1 year and < 5 years	633	—	1,403	—
	<u>1,156</u>	<u>—</u>	<u>2,039</u>	<u>—</u>

The Group and Parent Company's minimum sublease payments receivable under non-cancellable operating subleases are as follows:

	2015		2014	
	Land and buildings		Land and buildings	
	Group	Parent Company	Group	Parent Company
	\$'000	\$'000	\$'000	\$'000
< 1 year	—	—	17	—
> 1 year and < 5 years	—	—	—	—
	<u>—</u>	<u>—</u>	<u>17</u>	<u>—</u>

*(b) Royalty and Milestone Obligations*

The Company is party to certain milestone and royalty obligations under several product development agreements, as follows:

The Company entered into long-term supply agreements with multiple FDA-approved API suppliers and encapsulators. Certain supply agreements require annual minimum volume commitments by the Company and certain volume shortfalls may require payments for such shortfalls, as detailed below.

The Company entered into its initial Vascepa API supply agreement with Nisshin Pharma, Inc., or Nisshin, in 2010. In 2011, the Company entered into agreements with two additional suppliers, Chemport, Inc., or Chemport, and BASF (formerly Equateq Limited) for the supply of API. In 2012, the Company agreed to terms with a fourth API supplier, a consortium of companies led by Slanmhor Pharmaceutical, Inc. (Slanmhor). The API supply agreement with BASF terminated in February 2014. In July 2014, the Company terminated the supply agreement with Slanmhor and subsequently, in July 2015, entered into a new supply agreement with Finorga SAS (Novasep), a French company. These agreements included requirements for the suppliers to meet certain product specifications and qualify their materials and facilities with applicable regulatory authorities including the FDA. The Company has incurred certain costs associated with the qualification of product produced by these suppliers as described below.

Nisshin, Chemport and Novasep are currently the three manufacturers from which the Company purchases API. As of 31 December, 2015, the Company has no royalty, milestone or minimum purchase commitments with Nisshin.

Chemport was approved by the FDA to manufacture API for commercial sale in April 2013 and the Company began purchasing commercial supply from Chemport in 2013. The agreement with Chemport contains a provision requiring the Company to pay Chemport in cash for any shortfall in the minimum purchase obligations.

The Company began purchasing commercial supply from Novasep in 2015. API manufactured by Novasep was previously approved by the FDA in July 2014. The 2015 supply agreement with Novasep includes commitments for the Company to fund API purchases and contains a provision requiring the Company to pay Novasep a cash remedy for any shortfall in the minimum purchase obligations.

**33. Financial Commitments (continued)**

*(c) Litigation*

On 7 May, 2015, the Company and a group of independent physicians filed a federal lawsuit to permit the Company to share truthful and non-misleading information, including, but not limited to, the ANCHOR trial clinical data, with healthcare professionals in the United States about certain uses of Vascepa not included with approved FDA labeling of Vascepa and thus not permitted under the FDA's interpretation of applicable law. The lawsuit, captioned *Amarin Pharma, Inc., et al. v. Food & Drug Administration, et al.* (1:15-cv-03588-PAE), was filed in the United States District Court for the Southern District of New York and seeks a judicial declaration based on several legal theories. On 7 August, 2015, the Court granted the Company's request for preliminary relief in this litigation through a declaratory judgment that confirmed the Company may engage in truthful and non-misleading speech with healthcare professionals promoting the off-label use of Vascepa, i.e., to treat patients with persistently high triglycerides, and such speech may not form the basis of a misbranding action under the Federal Food and Drug Cosmetic Act. FDA did not appeal the Court's preliminary ruling prior to the 6 October, 2015 deadline for appeal. The underlying litigation has been stayed for settlement discussion and the parties are working toward settlement. The Company cannot predict the outcome of settlement negotiations or this litigation. On 28 May, 2015, the U.S. District Court for the District of Columbia granted the Company's motion for summary judgment in its lawsuit against the FDA, captioned *Amarin Pharmaceuticals Ireland Ltd. v. Food & Drug Administration, et al.*, Civ. A. No. 14-0324 (D.D.C.). This lawsuit sought an order requiring FDA to recognize five-year, New Chemical Entity ("NCE") marketing exclusivity for Vascepa. The decision vacated the FDA's denial of the Company's claim for such exclusivity and remanded to the FDA for proceedings consistent with the decision. FDA did not appeal the Court's decision prior to the 28 July, 2015 deadline for appeal. On 22 July, 2015, Watson Laboratories Inc., the purported first Vascepa ANDA filer, sought to intervene and appeal the Court's decision. The Company and FDA opposed this intervention effort. The applicable courts denied Watson the relief sought and appeal periods have expired. A new exclusivity determination by FDA has been pending since the 28 May, 2015 District of Columbia court order setting aside FDA's denial of NCE exclusivity for Vascepa. The Company believes Vascepa is entitled to NCE exclusivity, but cannot predict the outcome of FDA's determination.

In March, April, and May 2014, the Company received paragraph IV certification notices from six companies contending to varying degrees that certain of its patents are invalid, unenforceable and/or will not be infringed by the manufacture, use, sale or offer for sale of a generic form of Vascepa as described in those companies' abbreviated new drug applications, or ANDAs. The Company commenced patent infringement lawsuits against each of these ANDA applicants. In each of the lawsuits, Amarin sought, among other remedies, an order enjoining the defendants from marketing generic versions of Vascepa before the last to expire of the asserted patents expires in 2030. A summary of the lawsuits is below:

- In April 2014, Amarin filed lawsuits against Apotex, Inc. and Apotex Corporation, or collectively, Apotex, in the U.S. District Court for the District of New Jersey and the U.S. District Court for the Northern District of Illinois. The cases against Apotex are captioned *Amarin Pharma, Inc. et al. v. Apotex, Inc. et al.*, Civ. A. No. 14-2550 (D.N.J) and *Amarin Pharma, Inc. et al. v. Apotex, Inc. et al.*, Civ. A. No. 14-2958 (N.D. Ill.). On 27 August, 2014, Amarin voluntarily dismissed the Northern District of Illinois case against Apotex in favor of the New Jersey case, which concerns identical allegations of patent infringement against Apotex.
- In April 2014, Amarin filed lawsuits against Roxane Laboratories, Inc., or Roxane, in the U.S. District Court for the District of New Jersey and the U.S. District Court for the Northern District of Ohio. The cases against Roxane are captioned *Amarin Pharma, Inc. et al. v. Roxane Laboratories, Inc.*, Civ. A. No. 14-2551 (D.N.J) and *Amarin Pharma, Inc. et al. v. Roxane Laboratories, Inc.*, Civ. A. No. 14-901 (N.D. Ohio). On 7 May, 2014, Amarin voluntarily dismissed the Northern District of Ohio case against Roxane in favor of the New Jersey case, which concerns identical allegations of patent infringement against Roxane.
- In April 2014, Amarin also filed a lawsuit against Dr. Reddy's Laboratories, Inc. and Dr. Reddy's Laboratories, Ltd., or collectively, Dr. Reddy's, in the U.S. District Court for the District of New Jersey. The case against Dr. Reddy's is captioned *Amarin Pharma, Inc. et al. v. Dr. Reddy's Laboratories, Inc. et al.*, Civ. A. No. 14-2760 (D.N.J.).
- In May 2014, Amarin also filed a lawsuit against Watson Laboratories, Inc. and Actavis, Inc., or Watson, in the U.S. District Court for the District of New Jersey. One of the Company's directors, Patrick J. O'Sullivan, is also a director of Actavis, Inc. The case against Watson is captioned *Amarin Pharma, Inc. et al. v. Watson Laboratories, Inc. et al.*, Civ. A. No. 14-3259 (D.N.J). On 17 July, 2014, Amarin agreed to dismiss Actavis, Inc. from the case, and the Court accordingly dismissed Actavis, Inc. on 3 November, 2014.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**33. Financial Commitments (continued)**

*(c) Litigation (continued)*

- In June 2014, Amarin also filed a case against Teva Pharmaceuticals USA, Inc., or Teva, in the U.S. District Court for the District of New Jersey. The case against Teva is captioned *Amarin Pharma, Inc. et al. v. Teva Pharmaceuticals USA, Inc.*, Civ. A. No. 14-3558 (D.N.J.).
- In June 2014, Amarin also filed a lawsuit against Andrx Labs, LLC, Andrx Corporation, and Actavis plc, or collectively, Andrx, in the U.S. District Court for the District of New Jersey. The case against Andrx is captioned *Amarin Pharma, Inc. et al v. Andrx Labs, LLC et. al.*, Civ. A. No. 14-3924 (D.N.J.).

As a result of the 30-month stay associated with the filing of these lawsuits under the Hatch-Waxman Act, the FDA cannot grant final approval to any ANDA before September 2016, unless there is an earlier court decision holding that the subject patents are not infringed and/or are invalid.

Following the 28 May, 2015 District of Columbia court order setting aside FDA's denial of NCE exclusivity for Vascepa, FDA notified the ANDA filers that FDA had changed the status of their ANDAs to submitted, but no longer accepted, and notified ANDA filers that FDA had ceased review of the pending ANDAs. In rescinding acceptance of the ANDAs, the statutory basis for the patent litigation (accepted ANDAs) no longer existed. Thus, on 24 July, 2015, we moved to dismiss the pending patent infringement lawsuits against each of the Vascepa ANDA applicants in the U.S. District Court for the District of New Jersey.

On 22 January, 2016, the U.S. District Court for the District of New Jersey granted Amarin's motion to dismiss all patent infringement litigation related to the 2014 acceptance by the FDA of ANDAs to Vascepa. With this dismissal, there is no pending patent litigation related to Vascepa. An appeal of the court's dismissal was filed by one ANDA filer in this case and we intend to continue to litigate vigorously in support of the court's dismissal. We cannot predict the outcome of this litigation. A new exclusivity determination by FDA has been pending since the 28 May, 2015 District of Columbia court order setting aside FDA's denial of NCE exclusivity for Vascepa. We believe Vascepa is entitled to NCE exclusivity, but cannot predict the outcome of FDA's determination. We also cannot predict the outcome of this ANDA litigation. The legal process can also be costly and time-consuming.

We plan to defend the exclusivity of Vascepa through patent litigation after notification that FDA has accepted an ANDA application related to Vascepa. Assuming an NCE exclusivity determination from the FDA or no exclusivity determination, we expect notification of new ANDA submissions no sooner than in late July 2016, after the expiration of four years from the 2012 approval of Vascepa.

In addition to the above, in the ordinary course of business, the Company is from time to time involved in lawsuits, claims, investigations, proceedings, and threats of litigation relating to intellectual property, commercial arrangements and other matters. While the outcome of these proceedings and claims cannot be predicted with certainty, as of 31 December 2015, the Company was not party to any legal or arbitration proceedings that may have, or have had in the recent past, significant effects on the Company's financial position or profitability. No governmental proceedings are pending or, to our knowledge, contemplated against the Company. The Company is not a party to any material proceedings in which any Director, member of senior management or affiliate of ours is either a party adverse to the Company or its subsidiaries or has a material interest adverse to the Company or its subsidiaries.

**34. Contingent Liabilities**

Note 32 to the financial statements includes details of all commitments outstanding at the balance sheet date. The Group is not presently subject to any litigation where the potential risk of significant liability arising from such litigation is considered to be more than remote.

**35. Related Party Transactions**

All related party transactions are approved in accordance with our policy for related party transactions, which requires Audit Committee review and approval, followed by the approval of a majority of the Board of Directors who do not have a material interest in the transaction.

**AMARIN CORPORATION PLC**  
**NOTES TO THE CONSOLIDATED GROUP AND PARENT COMPANY FINANCIAL STATEMENTS**  
**for the year ended 31 December 2015**  
*(continued)*

**35. Related Party Transactions (continued)**

*Transactions with Directors and Executive officers*

The total compensation of our key management, defined as Directors and executive officers, was as follows:

	<b>Year ended 31 December 2015</b>	<b>Year ended 31 December 2014</b>
	<b>\$'000</b>	<b>\$'000</b>
Short-term employee benefits	3,691	2,547
Share-based compensation	21,309	3,797
<b>Total</b>	<b>25,000</b>	<b>6,344</b>

The share-based compensation amount referenced in the above table represents the total fair value of share options and Restricted Stock Units granted to key Directors and executive officers, during the years ended 31 December 2015 and 2014.

On 30 March, 2015, in connection with the closing of the initial private placement described in Note 29, and pursuant to a pre-existing contractual right to participate in certain private placement transactions effected by the Company, the Company entered into a separate subscription agreement with an existing investor, Sofinnova. The Company issued 38,867,180 restricted ADSs, each representing one Series A Preference Share, which may be consolidated and re-designated from time to time up to a maximum of 3,886,718 ordinary shares, each ordinary share to be represented by one ADS. For each restricted ADS, Sofinnova paid a negotiated price of \$0.15 (equating to \$1.50 on an as-if-converted-to-ordinary-shares basis) resulting in gross proceeds to the Company of \$5.8 million. The shares are owned directly by Sofinnova. Dr. James Healy (“Healy”), a member of the Company’s Board and a managing member of Sofinnova Management VII, L.L.C., the general partner of Sofinnova, and may be deemed to have shared voting and dispositive power over the shares owned by Sofinnova. Healy disclaims beneficial ownership over the shares owned by Sofinnova except to the extent of any pecuniary interest therein.

**36. Post Balance Sheet Events**

On 7 May, 2015, the Company and a group of independent physicians filed a lawsuit in federal court to permit the Company to promote truthful and non-misleading information, including, but not limited to, the ANCHOR trial clinical data, with healthcare professionals in the United States about certain uses of Vascepa not included within approved FDA labelling of Vascepa and thus not permitted under the FDA’s interpretation of applicable law. The lawsuit, captioned *Amarin Pharma, Inc., et al. v. Food & Drug Administration, et al.* (1:15-cv-03588-PAE), was filed in the United States District Court for the Southern District of New York and sought a judicial declaration based on several legal theories. On 7 August, 2015, the court granted the Company’s request for preliminary relief in this litigation through a declaratory judgment that confirmed that the Company may engage in truthful and non-misleading speech promoting the off-label use of Vascepa, i.e., to treat patients with persistently high triglycerides, and such speech may not form the basis of a misbranding action under the Federal Food and Drug Cosmetic Act. On 8 March, 2016, the parties obtained court approval of negotiated settlement terms that resolved the causes of action raised in the litigation. Under the settlement, the FDA and the U.S. government agreed to be bound by the court’s conclusions from the 7 August, 2015 declaration that the Company may engage in truthful and non-misleading speech promoting the off-label use of Vascepa and that certain statements and disclosures that the Company proposed to make to healthcare professionals were truthful and non-misleading as of such date.

On 26 April, 2016, the U.S. District Court for the District of New Jersey granted a motion to dismiss in favour of the Company and related defendants in the putative consolidated class action lawsuit captioned *In re Amarin Corporation plc, Securities Litigation*, No. 3:13-cv-06663 (D.N.J. 1 Nov., 2013). The class action was dismissed without prejudice with leave for plaintiffs to file an amended complaint. The lawsuit sought unspecified monetary damages and attorneys’ fees and costs alleging that the Company and certain of its current and former officers and directors made misstatements and omissions regarding the FDA’s willingness to approve Vascepa’s ANCHOR indication and related contributing factors and the potential relevance of data from the ongoing REDUCE-IT trial to that potential approval. This is the second motion to dismiss granted in favour of the Company and related defendants in this litigation. The first motion to dismiss in this litigation was granted in June 2015 in response to the original complaint and related amendment. Should plaintiffs file another amended complaint, the Company plans to vigorously defend against it. The Company has insurance coverage that is anticipated to cover any significant loss exposure that may arise from this action.
