

ESG PERFORMANCE SNAPSHOT

By 2025, Apache is committed to reducing its methane emissions to 0.36% or less of total methane production

- ▶ Reduced methane emissions intensity by 43 percent since 2012

We seek to use alternatives to potable fresh water—such as recycled produced water—in all of our operating regions, especially in areas of the U.S. and Egypt that could be considered “water scarce,” depending on conditions, location, pricing and regulations

- ▶ In 2016, 97 percent of water withdrawals were from nonpotable sources

The safety of our employees, contractors and communities is Apache’s highest priority and is deeply rooted in our Core Values

- ▶ Reduced Workforce Total Recordable Incident Rate (TRIR)⁽³⁾ by 54 percent over last five years

GLOBAL METHANE EMISSIONS INTENSITY⁽¹⁾

2014	2015	2016
0.53%	0.49%	0.43%

GLOBAL WATER USAGE INTENSITY⁽²⁾

2014	2015	2016
3.3	3.7	2.7

WORKFORCE TOTAL RECORDABLE INCIDENT RATE⁽⁴⁾

2014	2015	2016
0.89	0.76	0.52

⁽¹⁾ tCO₂e/Mboe = metric tons of carbon dioxide equivalent per thousands of barrels of oil equivalent

⁽²⁾ Bbls/Boe = barrels of water produced with oil and gas per barrels of oil equivalent Apache produced

⁽³⁾ Workforce TRIR includes employees and contractors

⁽⁴⁾ Total recordable incident rate is calculated by multiplying total number of recordable injuries by 200,000 hours and then dividing by total person-hours worked
