### About BioCryst

BioCryst Pharmaceuticals designs, optimizes and develops novel small-molecule pharmaceuticals that block key enzymes involved in infectious diseases, inflammatory diseases and cancer. BioCryst currently has three novel late-stage compounds in development: [peramivir](#), a neuraminidase inhibitor for the treatment of influenza, [BCX4208](#), a purine nucleoside phosphorylase (PNP) inhibitor for the treatment of gout, and forodesine, an orally-available PNP inhibitor for cancer, which is being developed by Mundipharma under a global license agreement. Utilizing crystallography and structure-based drug design, BioCryst continues to discover additional compounds and to progress others through preclinical and early development to address the unmet medical needs of patients and physicians.
