### **About Cascadian Therapeutics**

Cascadian Therapeutics is a clinical-stage biopharmaceutical company dedicated to developing innovative product candidates for the treatment of cancer. Its lead product candidate, tucatinib, is an investigational oral, selective small molecule kinase inhibitor that is highly selective for HER2 and the Company's lead product in development for the treatment of HER2 overexpressing cancers. Cascadian Therapeutics is conducting a randomized, double-blind, controlled pivotal clinical trial called HER2CLIMB, which is comparing tucatinib vs. placebo, each in combination with capecitabine and trastuzumab, in patients with locally advanced or metastatic HER2+ breast cancer with and without brain metastases, who have previously been treated with trastuzumab, pertuzumab and T-DM1. Additional details on HER2CLIMB can be found at [www.HER2CLIMB.com](http://www.HER2CLIMB.com) or [www.clinicaltrials.gov](http://www.clinicaltrials.gov).
