

## CA Technologies Celebrates CA Together in Action, Annual Employee Volunteer Initiative

*Projects focused on STEM and the environment take place worldwide*

NEW YORK--(BUSINESS WIRE)-- Today, CA Technologies (NASDAQ: CA) kicked off *CA Together in Action*, the company's annual employee volunteer initiative. From Monday, April 17 to Friday, April 21, CA employees around the world will take time out of their workday to give back in the communities where they live and work. This is the 12<sup>th</sup> anniversary of the initiative, which takes place the week leading up to Earth Day and focuses largely on the advancement of STEM (science, technology, engineering and math) education and the environment.

*CA Together in Action* activities in the U.S. are scheduled to take place in Boulder, CO; Charlotte, NC; Framingham, MA; Herndon, VA; Islandia, NY; New York, NY; Plano, TX; Portsmouth, NH; San Juan, PR; and Santa Clara, CA. Global projects are scheduled in Asia, Canada, the Czech Republic, France, Italy, Mexico, Spain and the United Kingdom.

"Since its inception in 2005, participation in *CA Together in Action* has continued to grow, showing the commitment our colleagues around the globe have to sharing their time and talents with those in need," said Erica Christensen, vice president, Corporate Social Responsibility, CA Technologies. "As a software company, we're particularly invested in helping to close the STEM skills gap. *CA Together in Action* is one of many ways we're working to encourage the next generation of tech leaders."

CA is partnering with organizations like [Code.org](#), a nonprofit dedicated to expanding access to computer science, and increasing participation by women and underrepresented students of color; and [STEM Alliance](#) in Europe, an organization that inspires young people to consider careers in STEM. Several activities are also being held with long-time partners, including El Peñón IAP, Growing Gardens, Island Harvest, PENCIL and Robert Moses State Park.

"We are proud to partner with CA Technologies to help bring computer science education to all students," said Hadi Partovi, CEO and Founder, [Code.org](#). "During *CA Together in Action*, CA Technologies employees will have the opportunity to join the Hour of Code movement which has brought computer science opportunities to students year-round."

"We always look forward to hosting CA Technologies here at Growing Gardens each year," said Lauren Kelso, site director. "The volunteers are always so enthusiastic about helping out and also bring an awesome skill set. This year the group will be using their skills to build a wind block for our bee enclosure and planting seeds and seedlings in our pollinator garden, both of which are super important to sustaining the future success of our gardens."

"STEM Alliance is very pleased to have CA Technologies onboard as a [founding partner](#). Collaboration between schools and industry is a vital step in addressing the skills gap to help make teachers and pupils more aware of STEM study paths and careers. Through these connections, we can raise young peoples' awareness of the skills needed to pursue careers in STEM," said Marc Durando, Executive Director of [European Schoolnet](#), a network of 31 European Ministries of Education.

Over *CA Together in Action's* history, more than 60,000 employee volunteer hours have been given, and more than 1,200 projects have been completed. CA employees are encouraged to use up to five workdays each year to give back. In addition, CA matches employee donations of up to \$10,000 each fiscal year.

### **About CA Technologies**

CA Technologies (NASDAQ:CA) creates software that fuels transformation for companies and enables them to seize the opportunities of the application economy. Software is at the heart of every business in every industry. From planning, to development, to management and security, CA is working with companies worldwide to change the way we live, transact, and communicate - across mobile, private and public cloud, distributed and mainframe environments. Learn more at [www.ca.com](http://www.ca.com).

### **About CA Together**

CA Technologies is a global corporation with a local commitment. The company works to improve the quality of life in communities where its employees live and work worldwide and is fully committed to advancing social, environmental and economic sustainability. CA Together, the company's Corporate Social Responsibility program, is driven by the core philanthropic focus of improving the lives of underserved children and communities around the world. CA does this by supporting organizations, programs and initiatives that enrich the lives and well-being of others with a primary focus on STEM (science, technology, engineering and math) education. CA Together activities include employee volunteerism and matching gifts; in-kind donations of CA Technologies products and services; and partnerships and philanthropic support to community organizations worldwide.
