

CACI Awarded Prime Contract on \$16.4 Billion, Multiple-Award U.S. Army Rapid Response Program

New Work for CACI on Government-Wide Program

Arlington, VA, August 30, 2010 - CACI International Inc ([NYSE:CACI](#)) announced today that it has been awarded one of 17 prime contracts to support the U.S. Army Communications and Electronics Command (CECOM) Rapid Response - Third Generation (R2-3G) program. The five-year, indefinite delivery/indefinite quantity contract has a ceiling value of \$16.4 billion. It is designed to provide all defense and federal civilian agencies with solutions for critical hardware, software, systems management, and rapid response requirements. While CACI provides significant support for the U.S. Army's Team C4ISR (command, control, communications, computers, intelligence, surveillance, and reconnaissance) warfighter capabilities, this award represents new business for CACI, complementing the company's very successful support for the Army's Strategic Services Sourcing (S3) and Technical Engineering Support Services (TESS) programs.

CACI's experience in supporting C4ISR systems throughout their lifecycle was instrumental in the government's selection of CACI to support the R2-3G program. Under this contract, CACI will deliver a wide range of C4ISR services and solutions. CACI's ability to quickly respond to new and emerging requirements with highly complex and cost-effective solutions assures clients of successful and on-time project delivery. CACI support includes technology insertion, system integration/installation, fabrication/prototyping, testing/certification, studies/analyses, logistics support, and training and engineering support, including re-engineering and reverse-engineering for a range of equipment and anti-terrorism technology.

Bill Fairl, CACI's President of U.S. Operations, said, "CACI has supported U.S. Army C4ISR and rapid response programs for the warfighter for many years, and we offer the benefit of lessons learned and best practices. Our Rapid Response - Third Generation team also includes small business and skilled providers who give us significant depth and breadth in the solutions we provide to help government respond quickly to urgent requirements."

According to CACI President and CEO Paul Cofoni, "CACI has strategically focused on building our rapid response capabilities to support growing government requirements. We provide long-term value, innovation, and an in-depth understanding of the federal environment. We believe this combination of technical expertise and service excellence makes CACI a valuable government partner, especially on complex and multifaceted programs. This award is further confirmation of CACI's ability to win the major contracts from our key clients that will support our growth strategy and continue to enhance shareholder value."

CACI provides professional services and IT solutions needed to prevail in the defense, intelligence, homeland security, and federal civilian government arenas. We deliver enterprise IT and network services; data, information, and knowledge management services; business system solutions; logistics and material readiness; C4ISR integration services; cyber solutions; integrated security and intelligence solutions; and program management and SETA support services. CACI services and solutions help our federal clients provide for national security, improve communications and collaboration, secure the integrity of information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. CACI is a member of the Fortune 1000 Largest Companies and the Russell 2000 index. CACI provides dynamic careers for approximately 13,200 employees working in over 120 offices in the U.S. and Europe.
