## **CACI Awarded \$23 Million Contract to Continue Support for U.S. Navy Submarine Missile Program**

### ***Ongoing Work Involves Maintaining Software for Ballistic and Cruise Missiles***

ARLINGTON, Va.--(BUSINESS WIRE)-- CACI International Inc ([NYSE: CACI](#)) announced today that it has been awarded a \$23 million task order contract with the Naval Surface Warfare Center (NSWC) Dahlgren Division in Dahlgren, Virginia to provide technical and engineering services to the Submarine Launched Ballistic Missile (SLBM) program. This contract, which is for one base year and two option years, was awarded under the SeaPort-e contract vehicle that CACI received in 2004. Leveraging its expertise in program management and SETA support as well as engineering and logistics, CACI will provide software testing and full lifecycle support for TRIDENT submarine fire control systems.

NSWC Dahlgren, a premier research and development center, serves as a specialty site for weapon system integration. It supports the TRIDENT fire control systems through its Strategic and Weapons Control Systems (K) Department, whose mission is to ensure the systems are ready to accurately target and support a strategic launch of an SLBM. CACI's lifecycle support services will ensure the Navy-developed fire control software is delivered error free, on time, and ready to support both the ballistic and cruise missile programs.

Factors that enabled CACI to win this contract include the company's proven software expertise, more than 20 years of SLBM experience, and veteran SLBM personnel. CACI's full-lifecycle software support encompasses verification and validation checking, developer testing, configuration management, logistics support, and development of reference documentation. CACI will also continue to provide support to the Ship Submersible Guided Nuclear (SSGN) program, a ballistic missile submarine retrofitted to carry Tomahawk cruise missiles. Also on this contract, CACI will perform information assurance services for the K Department as well as information technology support for NSWC Dahlgren's Corporate Department.

Dan Allen, CACI President of U.S. Operations, said, "CACI's extensive experience and 20-year record of outstanding performance in the submarine ballistic missile community makes us an excellent fit to support the U.S. Naval Surface Warfare Center in Dahlgren. We will provide quick-reaction tactical capabilities that will help the Navy most effectively maintain and upgrade its submarine missile fire control systems."

Paul Cofoni, CACI President and Chief Executive Officer, said, "CACI's latest award with the U.S. Naval Surface Warfare Center demonstrates the success of our relentless focus on excellence in our program performance. We continue to sustain our client base and expand into new markets with new clients by providing innovative solutions to our nation's most enduring challenges."

Celebrating our 50th year in business, CACI sustains an exceptional record of success by providing professional services and IT solutions needed to prevail in the areas of defense, intelligence, homeland security, and IT modernization and government transformation. We deliver enterprise IT and network services; data, information, and knowledge management services; business system solutions; logistics and material readiness; C4ISR solutions; cyber solutions; integrated security and intelligence solutions; and program management and SETA support services. CACI solutions help federal clients provide for national security, improve communications and collaboration, secure information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. A member of the Fortune 1000 Largest Companies and the Russell 2000 index, CACI provides dynamic careers for approximately 14,600 employees working in over 120 offices in the U.S. and Europe.
