

## **CACI Awarded Prime Position on \$40 Million Program to Support National Air and Space Intelligence Center**

### ***New Work will Provide Wide Array of Signals Intelligence Engineering Support Services***

ARLINGTON, Va.--(BUSINESS WIRE)-- CACI International Inc ([NYSE:CACI](#)) announced today that it has been awarded one of three prime positions to support the National Air and Space Intelligence Center's (NASIC) Signals Intelligence (SIGINT) Engineering Support Services II (SESS II) initiative for enhanced analysis and information technology capabilities. The multiple-award, five-year indefinite delivery/indefinite quantity contract has a potential value of \$40 million. CACI will provide technical, engineering, and analysis support in the areas of technical SIGINT (e.g., technical electronic intelligence, and command, control, and communications (C3) data links) and analysis infrastructure.

A valued CACI customer for nearly 50 years, NASIC is the Department of Defense's primary source to assess foreign air and space threats. The Center performs SIGINT activities to support operational forces, defense acquisition efforts and national policy and decision makers. SIGINT analysis is conducted by NASIC analysts, and the results are incorporated into all-source threat assessments, used to construct engineering models and provided directly to intelligence end-users.

To bring enhanced solutions to NASIC's challenges, CACI and its partners offer technical capabilities that have supported other elements of the Intelligence Community. The CACI team offers an integrated SIGINT approach combining SIGINT and systems technology and wide-ranging expertise in designing, developing, integrating, and operating a SIGINT processing laboratory which will help assure that NASIC remains a center of excellence for advanced signals intelligence processing and learning. The team tightly integrates large and small businesses to focus on supporting specific task areas, emerging technologies, and process improvements.

According to Bill Fairl, CACI's President of U.S. Operations, "This new work with the National Air and Space Intelligence Center provides a strategically important opportunity for CACI to use our expertise to help NASIC achieve its mission requirements. The contract enables us to reinforce our long-standing commitment to enhance the Center's unmatched analytic capabilities."

CACI President and CEO Paul Cofoni observed that, "A key component of our growth strategy is supporting mission critical solutions in intelligence. With this welcome award from NASIC, we will be able to make a significant advance in our position in the very specialized signals intelligence arena that is so important to our national security."

Celebrating our 50th year in business, CACI sustains an exceptional record of success by providing professional services and IT solutions needed to prevail in the areas of defense, intelligence, homeland security, and IT modernization and government transformation. We deliver enterprise IT and network services; data, information, and knowledge management services; business system solutions; logistics and material readiness; C4ISR solutions and services; cyber solutions; integrated security and intelligence solutions; and program management and SETA support services. CACI solutions help federal clients provide for national security, improve communications and collaboration, secure information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. A member of the Fortune 1000 Largest Companies and the Russell 2000 index, CACI provides dynamic careers for approximately 13,900 employees working in over 120 offices in the U.S. and Europe.
