

CACI Awarded \$25 Million Contract to Continue Support for Naval Shipyard Training and Education Programs

Solutions to Improve Maintenance Procedures for Faster Fleet Availability

Arlington, VA, January 22, 2008 - CACI International Inc ([NYSE:CAI](#)) announced today that it has been awarded a \$25 million task order by the Naval Sea Systems Command (NAVSEA) to continue support of the comprehensive Naval Shipyard Training and Education Program (NSTEP). The task order was awarded under the Seaport II Enhanced contract vehicle, with the five-year contract calling for one base year, one option year, and three performance-based years. CACI will perform the work at the Naval Sea Systems Command headquarters, Naval shipyards, and maintenance facilities in the U.S. and Japan. The award continues support CACI has provided for this client since 1992 and increases the company's business in strategic planning, business process development, and human capital and workforce development.

Collectively, Naval shipyards perform approximately \$3 billion worth of business a year and employ a workforce of about 25,000. NSTEP, formerly the Integrated Project Team Development process, is a large-scale, shipyard-wide approach to enhancing the U.S. Navy's Industrial Base capabilities. The program will provide centralized, competency-based learning solutions that support workforce development and drive improved business operations. The program enhances the Navy's ability to refine business processes, improve overall performance, and assure that fleet assets are more quickly available for deployment. In just the past six years, the program has graduated approximately 11,000 people.

CACI offers NAVSEA more than 15 years of experience providing change management, workforce, and organizational development, and technical and managerial support for industrial and ship maintenance operations. The company provides a curriculum of some 310 courses covering topics such as strategy development, team building, and communications. Fleet and contractor personnel trained through NSTEP range from mechanics and petty officers to commanding officers and senior executives. Their improved skill-sets help speed maintenance so the predominately nuclear-powered ships at these facilities can quickly return to the fleet.

According to Bill Fairl, CACI's President of U.S. Operations, "The ongoing work we provide for the Naval Sea Systems Command's Naval Shipyard Training and Education Program is a model for developing a solid base for adding to current customer value and shaping future business opportunities. I'm pleased that our CACI team has earned our customer's trust and confidence, and established such a fine record of professionalism."

CACI President and CEO Paul Cofoni said, "With this latest award for NAVSEA, CACI is, once again, able to continue helping shipyard teams to more effectively perform the maintenance work that is so crucial to getting ships where they belong – at sea. We're proud to provide a vital service to our nation by training civilian and military personnel in maintaining these critical U.S. Navy resources."

CACI International Inc provides the IT and network solutions needed to prevail in today's new era of national security, intelligence, and e-government. From systems integration and managed network solutions to knowledge management, engineering, simulation, and information assurance, we deliver the IT applications and infrastructures our federal customers use to improve communications and collaboration, secure the integrity of information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. Our solutions lead the transformation of national security and intelligence, assure homeland security, enhance decision-making, and help government to work smarter, faster, and more responsively.
