

CACI Awarded \$36 Million Prime Contract to Support Naval Operational Logistics Support Center

Ongoing Work Helps U.S. Navy Ordnance Information System Manage and Track Ordnance Worldwide

Arlington, VA, October 12, 2010 - CACI International Inc ([NYSE:CACI](#)) announced today that it has been awarded a \$36 million prime contract for program management and technical support services for the Naval Operational Logistics Support Center's (NOLSC) Ordnance Information System (OIS) which is used to manage and track Navy ordnance worldwide. The indefinite delivery/indefinite-quantity contract is for five years (one base, four option years). The majority of the work will be performed at Navy facilities in Bloomington, IN and at the Naval Weapons Station in Yorktown, VA. The award continues a twenty-year relationship with the Navy's ordnance community and expands the support that CACI's logistics and material readiness and enterprise IT and network services functional core competencies provide for the sea service.

NOLSC develops and utilizes state-of-the-art web-based logistical and inventory management tools, as well as maintaining a global presence of ordnance logistics experts to provide front line support and training. The center's comprehensive Ordnance Information System provides critical, real-time, worldwide ordnance tracking. The OIS not only improves and simplifies the day-to-day ordnance inventory management; it also provides Naval and Marine aviation warfighters, as well as SEALs and Marines on the front lines, with critical data for mission success.

In supporting these capabilities, CACI is a trusted and proven partner to the Navy in developing ordnance accounting solutions and software applications. The company's credentials in these disciplines have recently been enhanced with the successful completion of a Capability Maturity Model Integration (CMMI[®]) Appraisal that resulted in CACI's U.S. operations now being rated at CMMI[®] Maturity Level 3. This recognition of the organization's systems and software engineering practices assures NOLSC that CACI's systems engineering, integration, and software projects will be completed with high levels of quality, on time, and within budget.

According to Bill Fairl, CACI's President of U.S. Operations, "This work with the Naval Operational Logistics Support Center expands a long-standing relationship with a valued customer. It's remarkable that we are able to continue a process initiated more than a decade ago when we began focusing on quality and process improvement benchmarking utilizing the old Capability Maturity Model (CMM[®])."

CACI President and CEO Paul Cofoni observed that, "With our Navy and Marine Corps warfighters around the world relying on the fast, reliable availability of ordnance, it's clear that the support CACI provides for the Naval Operational Logistics Support Center is a key component in making that vital delivery capability a reality. With this significant award, we look forward to fulfilling this critical mission function for the Navy."

CACI provides professional services and IT solutions needed to prevail in the areas of defense, intelligence, homeland security, and IT modernization and government transformation. We deliver enterprise IT and network services; data, information, and knowledge management services; business system solutions; logistics and material readiness; C4ISR integration services; cyber solutions; integrated security and intelligence solutions; and program management and SETA support services.
