

CACI Awarded \$45 Million Contract to Continue Support for Common Ground Systems in U.S. Army Operations

New Task Order Bolsters Role in Supporting Warfighters

Arlington, VA, November 2, 2010 - CACI International Inc ([NYSE:CACI](#)) announced today that it has been awarded a \$45 million task order contract to provide program management and technical engineering services to upgrade Common Ground Systems (CGS) with subsystems from the U.S. Army's Distributed Common Ground System-Army (DCGS-A) Ground Mobile system. With the support of key teammate General Dynamics C4 Systems, CACI received the one base-year (six-month option) award under its Strategic Services Sourcing (S3) contract with the Army.

The DCGS-A integrates intelligence, surveillance and reconnaissance data within a single system to streamline the Army's ability to process and disseminate this data to commanders in the field. The benefit is that field commanders gain a better situational understanding of their environment, which enables them to visualize and analyze imminent threats, predict threat intentions, and develop countermeasures. The enhanced CGS systems will provide warfighters with improved means of receiving, processing and sharing intelligence data in a mobile, tactical environment.

The CACI team will provide software and lifecycle management for the integrated systems by performing budget and program financial analysis, managing and training users, and providing logistical support. The award strengthens CACI's functional core competency in C4ISR Integration Services, drawing upon more than 20 years of experience delivering advanced solutions to the warfighter at an accelerated pace and sustaining them throughout their lifecycle. CACI's work will result in a more effective CGS system while ensuring optimal deployment and containing costs.

According to Bill Fairl, CACI's President of U.S. Operations, "We're pleased to continue our support for the Distributed Common Ground System-Army. Our demonstrated expertise in technical engineering and program management is an ideal fit for helping the Army deliver the intelligence our warfighters need in theater operations."

CACI President and CEO Paul Cofoni said, "With this new contract, CACI continues its longtime commitment to providing support in the battle against global terrorism. We look forward to offering proven solutions for the Army's data and intelligence needs in the years to come."

CACI provides professional services and IT solutions needed for defense, intelligence, homeland security, and IT modernization and government transformation. We deliver enterprise IT and network services; data, information, and knowledge management services; business system solutions; logistics and material readiness; C4ISR services; cyber solutions; integrated security and intelligence solutions; and program management and SETA support services. CACI services and solutions help our federal clients provide for national security, improve communications and collaboration, secure the integrity of information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. CACI is a member of the Fortune 1000 Largest Companies and the Russell 2000 index. CACI provides dynamic careers for approximately 13,400 employees working in over 120 offices in the U.S. and Europe.
