

SCO Linux 4.0, Powered by UnitedLinux to Support Unisys Servers

LinuxWorld 2003, New York, NY (Booth # 865)-Jan. 22, 2003-The SCO[®] Group (SCO)(Nasdaq: SCOX) today announced that it will offer SCO Linux 4.0, powered by UnitedLinux for the Unisys ES7000 series and Unisys ClearPath Plus enterprise servers. With this offering, SCO will provide worldwide sales and support for Linux on Unisys platforms, including engineering development support and 24 x 7 enterprise customer level support of SCO Linux 4.0.

"Unisys ES7000 and ClearPath servers offer enterprise customers unprecedented levels of flexibility and scalability," said Kevin McHugh, vice president of Unisys Platform Marketing. "With SCO's long relationship with Unisys, world-class track record, skills, reputation and support infrastructure, customers who require Linux are in good hands."

"SCO Linux 4.0 fills the needs that enterprise customers demand - superior worldwide support and widespread hardware and software compatibility," said Jeff Hunsaker, SCO's vice president and general manager of Americas. "We are pleased to offer the scalability and performance of Unisys ES7000 and ClearPath Plus servers with the reliability and support of SCO Linux."

SCO Linux 4.0, powered by UnitedLinux is an enterprise Linux operating system designed for mission-critical business applications, with guaranteed stability, security and worldwide support from SCO. Unisys ES7000 series servers are enterprise-class servers designed to combine the highest levels of scalability, reliability, and performance with the superior economics of Intel processor technology. Unisys ClearPath Plus servers integrate the mainframe performance and functionality of Unisys MCP and OS2200 operating systems with popular computing environments based on Intel technology.

SCO Linux 4.0, powered by UnitedLinux includes several features and support services, including:

- A single, uniform platform for application development, certification and deployment, allowing Linux vendors, Independent Software Vendors (ISVs) and Independent Hardware Vendors (IHVs) to support a single Linux offering rather than many different versions.
- SCO certification services that will be accepted across all distributions of the "Powered by UnitedLinux" family.
- SCO's commitment to operating system quality and continuous operating system uptime, worldwide support and 12-18 month release cycles, providing stability for business IT needs.
- SCO's award-winning support services for tasks including installation, configuration support and 24x7 emergency response, available in local languages around the world. SCO's dedicated engineering services organization provides experienced support for UNIX, all other Linux platforms powered by UnitedLinux, as well as all RPM-based Linux distributions.
