

## Global Capacity Wins Network Optimization Contract in Europe

### Expands Relationship with Major Global Carrier

CHICAGO, Nov 17, 2009 /PRNewswire-FirstCall via COMTEX News Network/ -- Global Capacity (parent: Capital Growth Systems, Inc. (OTC Bulletin Board: CGSY)), the world's leading telecommunications information and logistics company, today announced it has been awarded a contract to optimize the network of a major global carrier in three European markets. Under the terms of the agreement, Global Capacity will offer its systems and tools to identify opportunities to reduce the operating costs of the network. This contract follows an earlier contract with the same Tier 1 client in which Global Capacity utilized its network optimization tools and global pricing applications to identify historical overcharging in 32 countries across Europe, Middle East, and Africa (EMEA).

Global Capacity has built and maintains a unique database of market intelligence regarding global communications infrastructure and pricing that provides much needed market transparency to the highly-fragmented global access network market. On top of this market intelligence, the Company has built systems and tools that leverage this data to enable the efficient design, pricing, provisioning, management, optimization, and billing of complex access networks globally. The ability to deliver automated execution of network modifications across the entire telecom supply chain, informed by global market intelligence, enables Global Capacity to reduce the cost and improve the efficiency of connectivity portfolio management.

In this engagement, Global Capacity will utilize its automated pricing system that contains customer proprietary pricing data, blended with real-time quotation of competitive market rates, as a basis to conduct the optimization analysis. Global Capacity will cleanse and upload customer network data into a network optimization tool that uses the automated pricing system to identify least cost solutions, alternative providers, and more efficient network designs. The results are stored and displayed in a web-based application that allows the client to execute "what if" analysis and identify the optimal solution based on their specific business objectives.

"This contract ratifies the value Global Capacity offers to large global carriers in reducing costs and streamlining processes and builds on our previous network overcharge engagement with this client," said Patrick Shutt, Global Capacity Chief Executive Officer. "Our information and tools provide both carrier and enterprise clients the ability to leverage automated market intelligence that can dramatically improve the profitability of network operations."

#### *About Global Capacity*

Global Capacity (parent: Capital Growth Systems, Inc.) is a telecom information and logistics company providing a fully-integrated telecommunications supply chain management system that streamlines and accelerates the process of designing, pricing, building, optimizing, and managing customized communications networks. It offers a comprehensive suite of services to enterprises, systems integrators, and carrier customers worldwide. Global Capacity is headquartered in Chicago, IL, with operational centers in Waltham, MA and Manchester, England; and with offices in Houston, TX; Glastonbury, CT; New York, NY; London, England; and Lisbon, Portugal. For more information, please visit [www.globalcapacity.com](http://www.globalcapacity.com) or contact the Company at 312-673-2400.
