

## **ChemoCentryx to Hold Second Quarter 2017 Financial Results Conference Call on Tuesday, August 8, 2017**

MOUNTAIN VIEW, Calif., July 26, 2017 (GLOBE NEWSWIRE) -- ChemoCentryx, Inc., (Nasdaq:CCXI), a biopharmaceutical company developing new medications targeted at inflammatory and autoimmune diseases and cancer, today announced that the Company's second quarter 2017 financial results will be released after market close on Tuesday, August 8, 2017. ChemoCentryx executive management will host a conference call beginning at 5:00 p.m. Eastern Time on Tuesday, August 8, 2017, to discuss these results and to answer questions.

To participate by telephone, please dial (877) 303-8028 (Domestic) or (760) 536-5167 (International). The conference ID number is 58685442. A live and archived audio webcast can be accessed through the Investors section of the Company's website at [www.ChemoCentryx.com](http://www.ChemoCentryx.com). The archived webcast will remain available on the Company's website for fourteen (14) days following the live call.

### **About ChemoCentryx**

ChemoCentryx is a biopharmaceutical company developing new medications targeted at inflammatory and autoimmune diseases and cancer. ChemoCentryx targets the chemokine and chemoattractant systems to discover, develop and commercialize orally-administered therapies. ChemoCentryx is currently focusing on its late stage drug candidates for patients with rare kidney diseases, avacopan (CCX168) and CCX140.

Avacopan is an orally-administered small molecule that is a selective inhibitor of the complement C5a receptor, or C5aR. Avacopan is in Phase III development for the treatment of anti-neutrophil cytoplasmic auto-antibody-associated vasculitis (AAV). In clinical studies to date, avacopan was shown to be safe, well tolerated and provided effective control of the disease while allowing elimination of high-dose steroids, part of the current standard of care. Avacopan is also being developed in patients with C3 glomerulopathy (C3G) and atypical hemolytic uremic syndrome (aHUS). The U.S. Food and Drug Administration has granted avacopan orphan-drug designation for AAV, C3G and aHUS. The European Commission has granted orphan medicinal product designation for avacopan for the treatment of two forms of AAV: microscopic polyangiitis and granulomatosis with polyangiitis (formerly known as Wegener's granulomatosis), as well as for the treatment of C3G. Avacopan was also granted access to the European Medicines Agency's (EMA) PRiority Medicines (PRIME) initiative, which supports accelerated assessment of investigational therapies addressing unmet medical need.

The Company's other late stage drug candidate is CCX140, an inhibitor of the chemokine receptor known as CCR2, which is currently being developed for patients with focal segmental glomerulosclerosis (FSGS), a debilitating kidney disease.

ChemoCentryx's Kidney Health Alliance with Vifor Pharma provides Vifor Pharma with exclusive rights to commercialize avacopan and CCX140 in markets outside of the U.S. and China.

ChemoCentryx also has early stage drug candidates that target chemoattractant receptors in other Inflammatory and autoimmune diseases and in cancer.
