

GTLS: GAS TO LIQUID SYSTEMS®

# INVESTING FOR **FUTURE GROWTH**

2013 ANNUAL REPORT

## INVESTING IN NATURAL GAS AND LNG

The global energy shift to natural gas and liquefied natural gas (LNG) is real and just beginning. We are investing in significant new capacity to maintain our leadership position and meet the global demand we are seeing across the entire LNG value chain. Beyond LNG, we see continued opportunity in the petrochemical, air separation, industrial gas, life sciences, and environmental markets we serve.

**ON THE COVER:** The Nautilus shell consists of a series of ever-larger chambers that form a logarithmic or growth spiral, which is often seen in nature. The sea creature lives in one chamber for a season, but all the while it is creating a new chamber suitable for the next stage of its life. In the same way, Chart Industries has succeeded through innovation, experience and performance, while investing in expanded capacity and capability in anticipation of further growth ahead. Also like the spiral shell, all of our businesses are intertwined, sharing common technologies and engineering expertise.

Chart is a leading independent global manufacturer of highly engineered equipment used in the production, storage and end-use of hydrocarbon and industrial gases. The majority of Chart's products are used throughout the liquid gas supply chain for purification, liquefaction, distribution, storage and end-use applications, the largest portion of which are energy-related. Chart has domestic operations located across the United States and an international presence in Asia, Australia and Europe.

## OFFICERS & DIRECTORS

### OFFICERS

**SAMUEL F. THOMAS**  
Chairman of the Board,  
Chief Executive Officer and President

**MICHAEL F. BIEHL**  
Executive Vice President,  
Chief Financial Officer and Treasurer
