Campbell Law School Selects Citrix Collaboration and Workflow Solutions to Take Learning to the Next Level

Law Campus Features Citrix Tools for Multimedia Online Meetings, Lecture Capture and Online Collaboration

SANTA CLARA, Calif.--(BUSINESS WIRE)-- Today, Citrix announced that Campbell Law School, recently [ranked](#) as the No. 1 most underrated law school in the U.S., has standardized on Citrix for lecture capture/recording, hosting, online collaboration and file sharing. Located in the center of downtown Raleigh and just blocks away from the legislative, judicial and executive heart of North Carolina, Campbell Law School is honing a solid reputation as a cutting-edge, student-focused facility.

The modern, state-of-the-art campus supports the educational needs of the students, as well as the research and teaching demands of the faculty and staff due in large part to workflow and communications cloud technology through Citrix ShareFile, Podio and GoToMeeting products. For example, professors and students utilize Podio, a cloud-based collaboration tool, as a single, integrated environment to procure information in an accessible, integrated manner. Likewise, as Campbell Law offers students a flexible learning environment, GoToMeeting allows students to form group discussions and meetings from any location and device, as well as share notes, assignments and review work - all in a collaborative setting.

Enable workflows and enhance student collaboration

The combination of ShareFile and Podio software provides faculty and students a collaborative workspace where anyone can securely exchange, track and edit content from multiple devices and locations. Podio makes deadlines, responsibilities and goals clear for everyone - and they're always up to date. With transparent, organized projects, students never need to slow other group members down to get a status update. Also, faculty have the oversight they need to see if everything is on track. With the use of GoToMeeting, students can meet offsite using a simple interface, where they can share their webcams in high definition (for more personal interactions) to share notes, ideas and projects. This integrated and collaborative environment will ultimately help set up the next generation of lawyers to manage their future law practices.

Quotes

J. Rich Leonard, Dean, Campbell Law School

"Legal technology is changing quickly and dramatically, and it's critically important that we stay abreast of the changes. Many of our students end up in solo firms or small firms. They're looking for new and cutting-edge software that will let them do core legal work more effectively than they ever have before, but that will also let them run their business affairs, keep up with their accounts and stay in touch with their clients - all with an integrated system. In this vein, the Citrix solutions fit the bill."

Bill O'Boyle, Sr. Manager, Business Development for Citrix

"Citrix is particularly excited about this innovative partnership, in that it includes shared feedback from both Campbell Law School faculty and Citrix staffers who are acting as guest lecturers as well as serving as a technology resource for students. We also look forward to leveraging other partnerships with key tech companies to help outfit Campbell Law School with the newest and most innovative technology for students - ultimately helping to prepare and arm them for the ever-growing mobile workplace."
