## Clean Energy Opens LNG Station in Washington State

### Expands Natural Gas Infrastructure on West Coast

FIFE, Wash.--(BUSINESS WIRE)-- [Clean Energy Fuels Corp.](#), (NASDAQ: [CLNE](#)) announced the opening of a new state-of-the-art, public natural gas station along Interstate 5 in Fife, a suburb of Tacoma. The station adds to Clean Energy's "[America's Natural Gas Highway](#)"™, allowing fleets to operate from state to state utilizing natural gas vehicle fuel.

The station, located at 3013 20th Street East, was designed, built, and will be operated and maintained by Clean Energy. The station consists of two liquefied natural gas ([LNG](#)) fast-fill pumps, and is open to the public 24/7.

Interstate Distributor Co., headquartered in nearby Tacoma, will use the station for its fleet of LNG tractors operating throughout the Pacific Northwest.

"As the first national freight carrier in the Pacific Northwest to use natural gas vehicles for our fleet, we're very happy to see another station become available that can support our regional distribution network," said Interstate Distributor Co. CEO Marc Rogers. "We made the transition to natural gas early so we would be ahead of the game, and now that the infrastructure is here, we're more and more confident each day that we made the right decision."

Clean Energy also announced last month that it had completed a public natural gas station in [Central Point, Oregon](#), linking California to Washington.

"We continue to focus on key transportation corridors like the I-5 to expand our natural gas infrastructure," said Chad Lindholm, vice president of Sales at Clean Energy. "As our partners like Interstate make the transition to natural gas, we can offer the fueling stations they need to expand along with them."

### About Clean Energy

Clean Energy Fuels Corp. (Nasdaq: CLNE) is the leading provider of natural gas fuel for transportation in North America. We build and operate CNG and LNG fueling stations; manufacture CNG and LNG equipment and technologies; develop RNG production facilities; and deliver more CNG, LNG and Redeem RNG fuel than any other company in the U.S. For more information, visit [www.cleanenergyfuels.com](http://www.cleanenergyfuels.com).
