

Marathon Petroleum Company LLC to Offer Gasolines at Marathon® Branded Locations Formulated With STP® Branded Additives

FINDLAY, Ohio, June 28, 2006 – Marathon Petroleum Company LLC (Marathon), The Armor All/STP Products Company (AASTP) and Afton Chemical Corporation (Afton) have entered into agreements to introduce STP® branded gasoline performance additives to the growing Marathon® branded retail fuel network in the Midwest and the Southeast.

The STP branded additives, which will be blended into all grades of Marathon gasoline, are specially formulated and patented to provide valuable performance benefits. All performance claims are supported by Afton's extensive laboratory testing. These new and improved Marathon gasolines with STP branded additives will offer Marathon consumers extra cleaning power and help engines run smoothly and maintain peak performance. The agreements enable Marathon marketers to use STP logos throughout the station to communicate the new performance attributes of their gasolines fortified with STP branded additives.

Marathon will have exclusive use of the STP branded gasoline additives in its marketing area. The STP mark will be deployed across the Marathon-branded network during the second half of 2006.

"We view this key strategic relationship as another example of the innovative and value-adding programs offered to our Marathon branded customers. We firmly believe that featuring trusted and powerful brands like STP provides the quality and selection that are expected and valued by our customers and consumers," said Mary Ellen Peters, Marathon senior vice president, Marketing. "We will continue to develop key strategic partnerships with trusted #1 consumer brands to deliver value, quality and innovation — the hallmark of the Marathon brand."

"The STP brand name is one of the most recognized automotive additive brands in the world," said Steven Silberblatt, vice president of Business Development for The Clorox Company, AASTP's parent company. "The STP trademark has a strong association with products that improve vehicle performance. We are pleased to enter into an agreement with Marathon to extend the STP mark into high quality additives pre-blended in the gasoline," he said.

According to Jackson Davis, Afton's marketing director "We understand the pressures most gasoline marketers face with today's volatile fuel costs. By showcasing the STP brand as an integral part of their blends, those marketers can quickly communicate a compelling brand message. We believe this a significant opportunity for select marketers to bring real value back to gasoline products and increase sales."

Based in Findlay, Ohio, Marathon is the nation's fifth largest refiner, currently with 974,000 barrels-per-day capacity in its seven-refinery system. The company's retail marketing system comprises approximately 5,400 locations in 17 states; nearly three-quarters are Marathon brand locations. Marathon serves the Midwest and Southeast as a petroleum products marketer with 85 light product and asphalt terminals and access to approximately 7,700 miles of pipeline.

Afton Chemical Corporation is a wholly owned subsidiary of NewMarket Corporation (NYSE:NEU). Afton Chemical develops and manufactures petroleum additives that enhance the performance of lubricating oils and fuels to enhance their performance in machinery, vehicles, and other equipment. From custom-formulated chemical blends to market-general additive components, Afton Chemical technology helps fuels burn cleaner, engines run smoother, and machines last longer.

The Armor All/STP Products Company is a leading manufacturer of quality car care products. The STP line of products includes STP Gas Treatment, STP Fuel Injector and Carburetor Treatment, STP Super Concentrated Fuel Injector Cleaner, STP Complete Fuel System Cleaner, STP Octane Booster and STP Oil Stabilizer. The Armor All/STP Products Company is a subsidiary of The Clorox Company, headquartered in Oakland, Calif. For more information about Clorox, visit www.TheCloroxCompany.com.
