Comtech Telecommunications Corp. Named To Deloitte & Touche Long Island Technology Fast 50 Award

Comtech Recognized as One of Long Island's Fastest Growing Technology Companies in 2001 by Deloitte & Touche's "Fast 50" Program

Melville, N.Y. - January 10, 2002 - Comtech Telecommunications Corp. (Nasdaq: CMTL) has been named to Deloitte & Touche's prestigious "Fast 50" Program for Long Island, a ranking of the 50 fastest growing technology companies in the area. Rankings are based on the percentage of growth in revenues from 1996-2000 (five-year period). These companies, which include a broad spectrum of industries, are defying conventional wisdom by consistently expanding their revenues over a substantial period of time.

Comtech's CEO, Fred Kornberg, credits the successful completion of Comtech's transformation into a product-driven company with the company's 218 percent revenue growth over the past five years. He said, "Our core business has been consistently reporting strong growth for over 5 years with our telecommunications segment as the star performer. We are intensely focused on aggressively executing our strategic plan which calls for an expansion of our broad line of telecommunications and amplifier product offerings, and the commercial development of our mobile data communications business."

"Today, there are more than 22,000 technology companies in the United States, many of whom are competing for the same markets here and worldwide. The Fast 50 winners for Long Island have proven that they can compete successfully by consistently delivering technological wonders. We at Deloitte & Touche commend Comtech Telecommunications for having the vision and determination to become one of the 50 fastest growing technology companies in Long Island," said Adam Weisman, Long Island Office Managing Partner of Deloitte & Touche.

Comtech's increase in revenues of 218 percent over the five-year period of 1996 to 2000 resulted in a 16th ranking overall in the Fast 50 for Long Island. The average increase in revenues among companies who made the Fast 50 for this region was approximately 105 percent.

To qualify for the Fast 50, companies must have had operating revenues of at least \$50,000 in 1996 and \$1,000,000 in 2000, must be a public or private technology company headquartered in Long Island. The Fast 50 defines a "technology company" as a business that produces technology, manufactures a technology product, or devotes a high percentage of effort to research and development of technology.

Winners of the 22 regional Fast 50 programs in the United States and Canada are automatically entered in the Deloitte & Touche Technology Fast 500 program, which ranks the nation's top 500 fastest growing technology companies.
