CORINTHIAN COLLEGES, INC. CURRENT REPORT ON FORM 8-K/A

On July 2, 2002, Corinthian Colleges, Inc. (“Corinthian” or the “Company”) filed an initial Current Report on Form 8-K with the Securities and Exchange Commission reporting the acquisition by the Company of all outstanding capital stock of Wyo-Tech Acquisition Corp. (“Wyo-Tech”). This report amends Item 2, Acquisition of Assets, and Item 7, Financial Statements and Exhibits, to, among other things, include the historical financial statements of Wyo-Tech and the pro forma financial information as required by Item 7.

Item 2. Acquisition of Assets

Pursuant to the terms of the Stock Purchase and Sale Agreement, dated April 10, 2002 (the “Purchase Agreement”), by and among Wyo-Tech, Allied Capital Corporation, David Grenat (Allied Capital Corporation and David Grenat are collectively referred to as the “Sellers”) and the Company, the Company acquired all of the outstanding capital stock of Wyo-Tech from the Sellers on July 1, 2002. The total consideration paid by the Company in connection with the acquisition was approximately \$84.4 million which includes the repayment of approximately \$12.7 million of outstanding indebtedness of Wyo-Tech and after giving effect to certain projected closing balance sheet adjustments as required by the Purchase Agreement. In accordance with the terms of the Purchase Agreement, the foregoing purchase price is subject to adjustment based on a final determination of the foregoing balance sheet adjustments for Wyo-Tech as of July 1, 2002.

The full amount of the purchase price, including the projected adjustment, was paid by the Company in cash at the closing. To fund the purchase price for Wyo-Tech, the Company used a portion of its cash and cash equivalents and approximately \$43 million borrowed under its new \$100 million Credit Facility.

The acquisition of Wyo-Tech has been accounted for using the purchase method of accounting and accordingly, the purchase price has been allocated to the assets acquired and liabilities assumed based on the estimated fair market values at the date of acquisition. The excess of the purchase price over the fair market value of the assets acquired has been preliminarily allocated to goodwill and is subject to finalization of the purchase price and determination of identifiable intangibles, if any.

We believe that this acquisition is a strategic acquisition in the automotive education marketplace. With the addition of the two campuses acquired and their associated diploma and degree granting programs, we believe that the acquisition of the colleges provides a platform for the creation of a new technology division which will be well positioned to serve the growing automotive and diesel technology fields.

Wyo-Tech was founded in 1966, is accredited by the Accrediting Commission of Career Schools and Colleges of Technology (ACCSCT) and offers diploma and degree programs in Automotive Technology, Diesel Technology, Applied Services Management, and Collision/Refinishing. Wyo-Tech operates two campuses under the Wyoming Technical Institute name in Laramie, Wyoming and Blairsville, Pennsylvania.

Wyo-Tech Acquisition Corp.
Notes to Consolidated Financial Statements
December 31, 2001

1. Description of Business

Wyo-Tech Acquisition Corp. (the Company) was formed on October 27, 1998. Allied Capital Corporation (Allied) owns 100% of the Company's common stock. At the end of the business day on December 31, 1998, the Company acquired all of the outstanding capital stock of MJB Acquisition Corporation (MJB) from Bankers Trust Company in exchange for \$17,589,123 in cash. This transaction was accounted for as a purchase. The purchase price plus transaction expenses of \$440,600 exceeded the fair value of net assets acquired and resulted in goodwill of \$14,823,720. MJB operates an automotive technical college in Laramie, Wyoming. The Company had no significant operating activities prior to the acquisition of MJB.

2. Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements include the consolidated accounts of the Company and its wholly owned subsidiary, MJB. All significant intercompany balances and transactions have been eliminated in consolidation.

Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents.

Inventories

Inventories consist primarily of automotive repair and parts inventory. Inventories are stated at the lower of cost (first-in, first-out) or market.

Property and Equipment

Furniture, equipment, and leasehold improvements are stated at cost, or their estimated fair market values as of the date of acquisition of MJB, and are depreciated using a straight-line method over their estimated useful lives, generally ranging from three to five years.

Wyo-Tech Acquisition Corp.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Major renewals and betterments are capitalized, while replacements, maintenance, and repairs which do not improve or extend the lives of the respective assets are expensed.

Receivable from Perkins Loan Program

Contributions to the Perkins Loan Program are recorded at cost. An allowance is provided for the Company's portion of estimated uncollectible loans.

Goodwill

Goodwill represents the excess of purchase price over tangible assets acquired less liabilities assumed and is being amortized on a straight-line basis over an estimated useful life of 20 years. Goodwill is reviewed for impairment whenever events indicate that its carrying amount may not be recoverable. If this review indicates the goodwill will not be recoverable, the Company estimates the future cash flows to be generated by the business. In the event that the sum of the cash flows is less than the carrying amount of goodwill, it would be written down to its fair value, which is normally measured by discounting estimated cash flows.

The Company is required to adopt SFAS No. 142, *Accounting for Business Combinations, Goodwill and Other Intangible Assets*, in its entirety effective January 1, 2002. Under SFAS 142, goodwill will not be amortized on a periodic basis, but instead will be subject to an impairment test to be performed at least on an annual basis. The Company anticipates adoption of this new standard will reduce its amortization expense; however, impairment reviews may also result in future periodic write-downs. Separable intangible assets that are not deemed to have indefinite lives will continue to be amortized over their useful lives.

Revenue

Tuition and housing fees for the student's entire program are recorded as receivables with a corresponding liability for deferred tuition and housing at the time of enrollment. Tuition and housing revenue are recognized ratably over the number of months in the program.

Refunds are recognized as a liability at the time of a student's withdrawal. Refunds paid for the year ended December 31, 2001 and 2000 were \$3,593,887 and \$2,754,394, respectively.

Wyo-Tech Acquisition Corp.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Advertising Costs

Advertising costs, included in general and administrative expenses, are expensed as incurred and were \$831,844 and \$718,147 for 2001 and 2000, respectively.

New Accounting Pronouncements Not Yet Adopted

The Company will adopt SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* on January 1, 2002. SFAS No. 144 retains the fundamental provisions of existing generally accepted accounting principles with respect to the recognition and measurement of long-lived asset impairment contained in SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of*. However, SFAS No. 144 provides new guidance intended to address certain significant implementation issues associated with SFAS No. 121, including expanded guidance with respect to appropriate cash flows to be used to determine whether recognition of any long-lived assets impairment is required, and if required, how to measure the amount of the impairment. SFAS No. 144 also requires that any assets to be disposed of by sale be reported at the lower of carrying value or fair value less cost to sell, and expands the reporting of discontinued operations to include any component of any entity with operations and cash flows that can be clearly distinguished from the rest of the entity. The Company is still evaluating this new standard, and the effect, if any, to the Company of adopting SFAS No. 144 has not yet been determined.

Income Taxes

The Company accounts for income taxes under Statement of Financial Accounting Standards (“SFAS”) No. 109, *Accounting for Income Taxes*, which requires an asset and liability approach to financial reporting for income taxes. Deferred income tax assets and liabilities are computed annually for differences between financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future, based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce the deferred income tax assets to the amount expected to be realized.

Wyo-Tech Acquisition Corp.
Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

Reclassifications

Certain 2000 amounts have been reclassified to be consistent with 2001 presentation.

3. Lease Commitments

Operating Lease Commitments

The Company leases administrative, housing and classroom facilities, and certain equipment. All noncancelable leases contain various renewal options and escalation clauses, requiring the Company to pay for utilities, taxes, insurance, and maintenance expenses. Annual lease expense for 2001 and 2000 was approximately \$2,915,000 and \$2,200,000, respectively.

At December 31, 2001, future minimum rental payments on all noncancelable operating leases having an initial or remaining term of more than one year are:

2002	\$ 2,441,984
2003	1,948,319
2004	1,807,247
2005	1,583,462
2006	1,082,320
Thereafter	4,635,310
	<u>\$13,498,642</u>

The Company leases housing facilities which are in turn subleased to students. The terms of the subleases are less than one year. The Company recognized \$2,511,452 and \$2,043,221 of sublease income with related expenses incurred of \$1,589,325 and \$1,312,288 for the year ended December 31, 2001 and 2000, respectively.

3. Lease Commitments (continued)

Capital Lease Commitment

On June 15, 2001, the Company entered into a sale-leaseback transaction whereby the Company sold and leased back certain land and buildings in Laramie, Wyoming. The Company received proceeds of \$5,900,000 in cash. The resulting lease is being accounted for as a capital lease. The lease base term is 20 years and there is one option to extend the lease for 5 years. The monthly rental is \$69,208.

The Company's assets held under capital leases, which are included in property and equipment, consist of the following at:

	December 31,	
	2001	2000
Buildings	\$5,718,365	\$ –
Computers and tools	476,186	408,130

The future minimum lease payments under capital leases at December 31, 2001 are as follows:

	5,701,983
Long-term portion	\$ 5,701,983

Depreciation on these assets is included in depreciation expense and amounted to \$241,625 and \$138,166 for 2001 and 2000, respectively.

Wyo-Tech Acquisition Corp.

Notes to Consolidated Financial Statements (continued)

4. Department of Education

The Company derives a substantial portion of its revenues from Student Financial Aid (SFA) received by its students under the Title IV programs administered by the U.S. Department of Education (ED) pursuant to the Higher Education Act of 1965, as amended (HEA).

If there were to be a change in the ED current regulations, the Company's ability to attract students could be impacted and such impact could be material. The Company does not require collateral from the students or the ED, but does defer the recognition of revenue over the length of the student's course.

5. Mandatorily Redeemable Preferred Stock

The Company has issued 100 shares (1,000 shares authorized) of mandatorily redeemable preferred stock (the Preferred Stock). Holders of the Preferred Stock are entitled to receive the same dividend per share as declared or paid on shares of common stock when, as and if declared by the Board of Directors. Dividends are not cumulative. In the event of voluntary or involuntary liquidation, holders of the Preferred Stock are entitled to receive an amount in cash equal to the original purchase price of \$37,000 for each share plus all declared and unpaid dividends in preference to any distributions to common stockholders. On January 2, 2005, the Company must redeem the Preferred Stock at a price equal to the liquidation value. The Preferred Stock does not have any voting rights.

6. Long-Term Debt

In December 1999, the Company entered into a construction loan with a financial institution. The total available amount under the loan agreement is \$2,800,000. On August 14, 2000, the loan was converted to a promissory note for the same amount. The note was secured by the Company's new building and bore interest at a rate of 9% per annum. As of December 31, 2001, this note was paid in full from proceeds of the sale-leaseback transaction (see Note 3).

During 2000, the Company entered into a loan with Ford Credit Corporation for \$19,205 to acquire two vehicles. As of December 31, 2001, the unpaid principal on this loan was \$9,323.

In addition, during 2001, the Company entered into a loan with GMAC Financial Services for \$26,206 to acquire a vehicle. As of December 31, 2001, the unpaid principal on this loan was \$19,256.

7. Related-Party Debt

The Company has a senior note payable of \$10,000,000 to Allied. The senior note bears interest at a rate of 12% per annum. Interest is payable quarterly and principal is due December 31, 2003. Wyo-Tech Acquisition Corp.
Notes to Consolidated Financial Statements
June 30, 2002

1. Description of Business

Wyo-Tech Acquisition Corp. (the Company) was formed on October 27, 1998. Allied Capital Corporation (Allied) owns 100% of the Company's common stock. At the end of the business day on December 31, 1998, the Company acquired all of the outstanding capital stock of MJB Acquisition Corporation (MJB) from Bankers Trust Company in exchange for \$17,589,123 in cash. This transaction was accounted for as a purchase. The purchase price plus transaction expenses of \$440,600 exceeded the fair value of net assets acquired and resulted in goodwill of \$14,823,720. MJB operates an automotive technical college in Laramie, Wyoming and Blairsville, Pennsylvania. The Company had no significant operating activities prior to the acquisition of MJB.

2. Significant Accounting Policies

Basic of Presentation and Principles of Consolidation

The consolidated financial statements include the consolidated accounts of the Company and its wholly owned subsidiary, MJB. All significant intercompany balances and transactions have been eliminated in consolidation.

Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents.

Inventories

Inventories consist primarily of automotive repair and parts inventory. Inventories are stated at the lower of cost (first-in, first-out) or market.

Property and Equipment

Furniture, equipment, and leasehold improvements are stated at cost, or their estimated fair market values as of the date of acquisition of MJB, and are depreciated using a straight-line method over their estimated useful lives, generally ranging from three to five years.

Table of Contents

Wyo-Tech Acquisition Corp.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Major renewals and betterments are capitalized, while replacements, maintenance, and repairs which do not improve or extend the lives of the respective assets are expensed.

Receivable from Perkins Loan Program

Contributions to the Perkins Loan Program are recorded at cost. An allowance is provided for the Company's portion of estimated uncollectible loans.

Goodwill

Goodwill represents the excess of purchase price over tangible assets acquired less liabilities assumed and during 2001 was being amortized on a straight-line basis over an estimate useful live of 20 years. The Company adopted Statement of Financial Accounting Standards (SFAS) No. 142, *Accounting for Business Combinations, Goodwill and Other Intangible Assets*, in its entirety, effective January 1, 2002. Under SFAS 142, goodwill is no longer amortized on a periodic basis, but instead is subject to an impairment test to be performed at least on an annual basis. If this test indicates that goodwill is impaired, it is written down to its fair value. Separable intangible assets that are not deemed to have indefinite lives will continue to be amortized over their useful lives.

Revenue

Tuition and holding fees for the student's entire program are recorded as receivables with a corresponding liability for deferred tuition and housing at the time of enrollment. Tuition and housing revenue are recognized ratably over the number of months in the program.

Refunds are recognized as a liability at the time of a student's withdrawal. Refunds paid for the six months ended June 30, 2002 and year ended December 31, 2001 were \$2,304,839 and \$3,593,887, respectively.

Advertising Costs

Advertising costs, included in general and administrative expenses, are expensed as incurred and were \$461,497 and \$831,844 for the six months ended June 30, 2002 and the year ended December 31, 2001, respectively.

Wyo-Tech Acquisition Corp.

Notes to Consolidated Financial Statements (continued)

2. Significant Accounting Policies (continued)

Impairment of Long-Lived Assets

The Company adopted SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, on January 1, 2002. SFAS No. 144 retains the fundamental provisions of existing generally accepted accounting principles with respect to the recognition and measurement of long-lived asset impairment contained in SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of*. However, SFAS No. 144 provides new guidance intended to address certain significant implementation issues associated with SFAS No. 121, including expanded guidance with respect to appropriate cash flows to be used to determine whether recognized of any long-lived asset impairment is required, and if required, how to measure the amount of the impairment, SFAS No. 144 also requires that any net assets to be disposed of by sale be reported at the lower of carrying value or fair value less cost to sell, and expands the reporting of discontinued operations to include any component of any entity with operations and cash flows that can be clearly distinguished from the rest of the entity. As of June 30, 2002, there has been no effect to the Company for adopting SFAS No. 144.

Income Taxes

The Company accounts for income taxes under SFAS No. 109, *Accounting for Income Taxes*, which requires an asset and liability approach to financial reporting for income taxes. Deferred income tax assets and liabilities are computed annually for differences between financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future, based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce the deferred income tax assets to the amount expected to be realized.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

On June 15, 2001, the Company entered into a sale-leaseback transaction whereby the Company sold and leased back certain land and buildings in Laramie, Wyoming. The Company received proceeds of \$5,900,000 in cash. The resulting lease is being accounted for as a capital lease. The lease base term is 20 years and there is one option to extend the lease for five years. During the six-month period ending June 30, 2002, the Company expended \$929,000 on leasehold improvements on this property and expects to receive a reimbursement from the owner of \$161,000. This amount is reflected as a receivable at June 30, 2002. The monthly rental is \$69,208 through July 31, 2006, \$71,976 from August 1, 2007 to July 31, 2011, and \$74,855 from August 1, 2011 to July 31, 2021.
