

Converted Organics Reports Increase in Re-Orders of Organic Fertilizer Products

BOSTON, Sep 22, 2009 (BUSINESS WIRE) -- Converted Organics Inc. (NASDAQ:COIN) announced today that the Company has received re-orders for its organic granular and liquid fertilizer products from a wide spectrum of existing customers, including golf courses and country clubs, lawn care professionals, and agricultural growers.

"Our customers report being extremely pleased with the performance of Converted Organics' all-natural fertilizers, whether on professional turf, residential lawns, or crops. We are receiving additional product orders from many of them to meet their fall 2009 and spring 2010 growing needs," said Edward J. Gildea, President of Converted Organics. "From our perspective, re-use of our products is the best testimonial for the performance and effectiveness of our organic fertilizers."

"We have been extremely pleased with the performance of Converted Organics' Liquid Concentrate 1-1-1 fertilizer on our fairways, tees and greens, and have had very positive results throughout the two seasons we have been using the product," said Mark McEachern, superintendent of Cape Cod Country Club in Falmouth, MA. "We have consistently achieved improved turf growth and quality, as well as excellent disease suppression by using Liquid Concentrate 1-1-1, and plan to continue this strategy throughout our 2010 season."

Converted Organics has received re-orders for its granular and liquid organic fertilizers from additional customers, including Purely Organic Lawncare (York Harbor, ME), Black River Nursery (Stephentown, NY), Brae Burn Country Club (West Newton, MA), Tournament Players Club Boston (Norton, MA), Bay Pointe Country Club (Onset, MA), Country Club of New Bedford (North Dartmouth, MA), Newport Country Club (Newport, RI), Atlantic Golf Club (Bridgehampton, NY), Hyannisport Club (Hyannisport, MA), Eastward Ho Country Club (Chatham, MA), and organic cranberry grower Kingfisher Corporation (Dartmouth, MA).

About Converted Organics Inc.

Converted Organics (NASDAQ:COIN, www.convertedorganics.com), based in Boston, MA, is dedicated to producing high-quality, all-natural, organic soil amendment and fertilizer products through food waste recycling. The Company uses its proprietary High Temperature Liquid Composting (HTLC) system, a proven, state-of-the-art microbial digestion technology, to process various biodegradable food wastes into dry pellet and liquid concentrate organic fertilizers that help grow healthier food and improve environmental quality. Converted Organics sells and distributes its environmentally-friendly fertilizer products in the retail, professional turf management, and agribusiness markets.

Converted Organics' flagship manufacturing facility is located in Woodbridge, New Jersey. A second manufacturing site is located in Gonzales, California, and a third is under development in Johnston, Rhode Island. Converted Organics' products have been tested in numerous field trials for more than a dozen crops with the result that, on average, the net value of the farmer's crop increased 11-16 percent, depending on the particular crop and product application. This is due, in part, to the disease suppression characteristics of the product, which reduce or eliminate the need for other costly, often toxic, crop protection applications. In a number of lab and field trials, Converted Organics' liquid product has been shown to be effective in mitigating powdery mildew, a leaf fungus that affects most plants and grasses and restricts the flow of water and nutrients to the plant. Increased use of nitrogen in commercial agriculture and turf grass applications, such as on golf courses, has reduced the soil's ability to absorb nitrogen and other nutrients. Using the products produced by Converted Organics helps restore the soil by replenishing these micronutrients. This reduces the amount of nitrogen required in a virtuous cycle that benefits from long-term use. As a result, use of the product reduces chemical run-off to streams, ponds and rivers, an objective with significant long-term benefits to the environment.

Converted Organics' products have a long shelf life compared to many other organic fertilizers. The Company's fertilizer products can be used on a stand-alone basis or in combination with more traditional fertilizers and crop protection products. Converted Organics expects to benefit from increased regulatory focus on organic waste processing and on environmentally-friendly growing practices.

This press release contains forward-looking statements that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. In some cases, you may identify forward-looking statements by words such as "may," "should," "plan," "intend," "potential," "continue," "believe," "expect," "predict," "anticipate" and "estimate," the negative of these words or other comparable words. Forward-looking statements include the Company's ability to continue full operations at its Woodbridge facility and to become more efficient in its operations, the Company's ability to continue to sell its product to other

customers, and the Company's ability to raise financing on a timely basis, if at all. These statements are only predictions. One should not place undue reliance on these forward-looking statements. The forward-looking statements are qualified by their terms and/or important factors, many of which are outside the Company's control, involve a number of risks, uncertainties and other factors that could cause actual results and events to differ materially from the statements made. The forward-looking statements are based on the Company's beliefs, assumptions and expectations of our future performance, taking into account information currently available to the Company. These beliefs, assumptions and expectations can change as a result of many possible events or factors, including those events and factors described in the "Risk Factors" section in the Company's most recently filed annual report on Form 10-KSB, as updated in the Company's quarterly reports on Form 10-Q filed since the annual report, not all of which are known to the Company. Neither the Company nor any other person assumes responsibility for the accuracy or completeness of these statements. The Company will update the information in this press release only to the extent required under applicable securities laws. If a change occurs, the Company's business, financial condition, liquidity and results of operations may vary materially from those expressed in the aforementioned forward-looking statements.
