

## **Converted Organics Announces Conference Call to Discuss Recent Business Developments**

**Management to Host Conference Call Monday, September 10, 2007 at 11 a.m. Eastern Daylight Time**

BOSTON, Sep 04, 2007 (BUSINESS WIRE) --

Converted Organics Inc. (NASDAQ: COIN, COINW, COINZ) today announced that its management will update the market on recent business developments in a conference call at 11 a.m. EDT on Monday, September 10, 2007.

Those who wish to participate in the conference call may telephone (888) 335-6674 from the US or (973) 321-1100 for international callers, passcode # 9182461, approximately 15 minutes before the call. A digital replay will be available by telephone for two weeks and may be accessed by dialing (877) 519-4471, from the US, or (973) 341-3080, for international callers, passcode # 9182461. The replay will also be available on our website at [www.convertedorganics.com](http://www.convertedorganics.com). You will be able to listen by either Windows Media or Real Player approximately 2 hours after the completion of the call.

About Converted Organics Inc.

Converted Organics (NASDAQ: COIN), based in Boston, MA, is a development stage company dedicated to producing a valuable all natural, organic soil amendment or fertilizer product through food waste recycling. The company uses proven, state-of-the-art technologies to create a product that helps grow healthier food and improve environmental quality. Converted Organics plans to sell and distribute its environmentally-friendly fertilizer or biostimulant in the agribusiness, turf management, and retail markets.

Converted Organics biostimulants will be produced in both a dry pellet and liquid concentrate. Converted Organics products have been tested in numerous field trials for more than a dozen crops with the result that, on average, the net value of the farmer's crop increased 11-16% depending on the particular crop and product application. This is due in part to the disease suppression characteristics of the product which reduce or eliminate the need for other, costly, often toxic, crop protection applications. Increased use of nitrogen in commercial agriculture and turf grass applications such as golf courses has reduced the soil's ability to absorb nitrogen and other nutrients. Using the products produced by Converted Organics helps restore the soil by replenishing these micronutrients. This reduces the amount nitrogen required in a virtuous cycle that benefits from long-term use. As a result, use of the product will reduce chemical run-off to streams, ponds and rivers, an objective with significant long-term benefits to the environment.

The products have a long shelf life compared to many other organic fertilizers. In a number of lab and field trials, the liquid product has been shown to be effective in mitigating powdery mildew, a leaf fungus that effects most plants and grasses and restricts the flow of water and nutrients to the plant. The company's biostimulants can be used on a standalone basis or in combination with more traditional fertilizers and crop protection products. Converted Organics expects to benefit from increased regulatory focus on organic waste processing and on environmentally-friendly growing practices.

This press release contains forward-looking statements that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. In some cases, you may identify forward-looking statements by words such as "may," "should," "plan," "intend," "potential," "continue," "believe," "expect," "predict," "anticipate" and "estimate," the negative of these words or other comparable words. These statements are only predictions. One should not place undue reliance on these forward-looking statements. The forward-looking statements are qualified by their terms and/or important factors, many of which are outside the Company's control, involve a number of risks, uncertainties and other factors that could cause actual results and events to differ materially from the statements made. The forward-looking statements are based on the Company's beliefs, assumptions and expectations of our future performance, taking into account information currently available to the Company. These beliefs, assumptions and expectations can change as a result of many possible events or factors, including those events and factors described in "Risk Factors" in the prospectus, not all of which are known to the Company. Neither the Company nor any other person assumes responsibility for the accuracy or completeness of these statements. The Company will update the information in this press release only to the extent required under applicable securities laws. If a change occurs, the Company's business, financial condition, liquidity and results of operations may vary materially from those expressed in the aforementioned forward-looking statements.
