### **For Immediate Release:**

## **COMMUNICATIONS & POWER INDUSTRIES' ADVANCED ANTENNAS SELECTED FOR GLOBAL COMMUNICATIONS SYSTEM**

**PALO ALTO, Calif. – October 2, 2017** –The Antenna Systems Division of Communications & Power Industries (CPI) has been awarded a multiyear contract to provide hundreds of advanced antenna products for a novel satellite system that will provide global coverage. The CPI Antenna Systems Division will design and manufacture Ka-band satellite gateway and telemetry, tracking and control (TT&C) antennas to support the system. These antennas will combine the proven Ka-band technology of CPI Antenna Systems Division's ASC Signal product line with the high-precision tracking system of its Malibu product line, providing state-of-the-art technology that demonstrates the breadth and depth of CPI Antenna System Division's portfolio of antenna products.

“CPI's advanced antenna products are the technology of choice for cutting-edge communications programs. This new satellite constellation is a pioneering approach to providing global broadband access and will be an exciting showcase for the capabilities of CPI's latest antenna technology. By combining the technologies of our ASC Signal and Malibu product lines into the newly formed Antenna Systems Division, CPI offers a truly leading-edge product for the GEO, MEO and LEO satellite communications markets,” said Tony Russell, president of CPI's Antenna Systems Division.

Manufacturing for this program will take place at CPI Antenna Systems Division's facilities in Whitby, Ontario, Canada.

### **About Communications & Power Industries**

Communications & Power Industries (CPI) is a global manufacturer of electronic components and subsystems focused primarily on communications and defense markets. With a heritage of technological excellence that spans decades, CPI develops, manufactures and globally distributes innovative and reliable technology solutions used in the generation, amplification, transmission and reception of microwave signals for commercial and military applications. CPI serves customers in the communications, defense, medical, industrial and scientific markets. Communications & Power Industries is headquartered in Palo Alto, California and has significant manufacturing facilities in the U.S.

and Canada, as well as more than 40 sales and service offices around the world. Learn more about CPI at [www.cpii.com](http://www.cpii.com).
