

## **Compuware Wins Three Software Development Productivity Awards**

### **Software Development Magazine Honors DevPartner Studio, DevPartner SecurityChecker and QACenter Enterprise Edition as Products That Have 'Jolted' the Industry**

DETROIT, April 6 /PRNewswire-FirstCall/ -- Compuware Corporation (Nasdaq: CPWR) today announced that three of its Quality Solutions have won Productivity Awards in the 16th Annual Software Development Jolt Product Excellence Awards. Winners were announced during the awards ceremony at the SD West 2006 Conference in Santa Clara, California to recognize and honor products that have "jolted" the industry by helping to create faster, easier and more efficient software.

"The 2006 Awards winners were chosen after a tough two-phase judging process conducted by an international panel of independent industry and subject matter experts, drawn from the academic, analyst, entertainment and media communities," said Rosalyn Lum, Dr. Dobb's Journal, technical editor. "The fact that Compuware received three Productivity awards in increasingly competitive fields reaffirms their impact and innovativeness on the developer market."

The Jolt Productivity awards were presented to Compuware QACenter Enterprise Edition 5.1 in the "Quality Project Management" category, Compuware DevPartner SecurityChecker 1.0 in the "Security Tools" category and Compuware DevPartner Studio 8.0 in the "Utilities" category.

"We are thrilled and honored that Software Development Jolt judges recognize the value that our Quality Solutions provide to development and testing teams," said Larry Angeli, Vice President of Marketing at Compuware Corporation. "Winning these awards demonstrates Compuware's leadership and innovation across the application life cycle, reaffirming our commitment to providing our customers with high-performance products that impact productivity."

Compuware Quality Solutions span across the application life cycle enabling enterprises to build, test and manage high-quality applications using Microsoft, Java, mainframe, web and packaged application technologies. These solutions work together to deliver value to enterprises that depend upon mission-critical applications to remain competitive in increasingly complex and demanding business environments.
