DISH Adds Multi-Room Music to Hopper DVR with Upcoming Launch of New Mobile App

- | *DISH Music uses DTS Play-Fi technology to stream music on TV audio systems throughout the home*
- | *App available on all Hopper 2, Hopper 3 and connected Joey clients by February 2017*

LAS VEGAS--(BUSINESS WIRE)-- DISH today unveiled DISH Music, a Hopper-driven feature powered by DTS Play-Fi technology that gives customers the ability to sync music throughout their home using one central control. DISH Music provides a complete, room-to-room music entertainment experience by enabling users to play content from popular streaming sources, such as iHeartRadio, Pandora and TIDAL, via TV audio systems connected to Hopper 2 or Hopper 3 DVRs, and Joey clients.

"The Hopper is capable of serving as a household's comprehensive entertainment hub," said Niraj Desai, DISH vice president of product management. "Incorporating DTS Play-Fi technology into our offerings provides DISH customers with a premium whole-home music streaming option, in addition to the television experience they already love, at no additional cost."

DISH Music turns DISH's Hopper DVRs and Joeyes into music streaming zones that are controllable from Android or iOS smartphones and tablets. Using the app, customers can choose to sync the same music across rooms, or play different content in each zone. The whole-home music feature can also be controlled directly from an app on the set-top boxes. Hoppers and Joeyes will display the metadata for the music being played, such as the artists, song name and music service.

In addition to TV audio systems directly connected to DISH set-top boxes, DISH Music can wirelessly pair with DTS Play-Fi-enabled speakers connected to the same wireless network. Manufacturers of DTS Play-Fi-enabled speakers compatible with DISH Music include Aerix, Anthem, Arcam, Definitive Technology, Klipsch, MartinLogan, McIntosh, Paradigm, Phorus, Polk Audio, Rotel, Sonus Faber and Wren presently, with products from Elite, Integra, Pioneer, Onkyo, Thiel, SVS Sound and more forthcoming.

Music services available with DISH Music currently include iHeartRadio, Pandora, TIDAL, Deezer, Napster and Amazon Music. Users must have accounts to access content from these services, when required. DISH Music will also play from personal libraries on mobile devices and is compatible with DLNA media servers.

DISH Music is currently rolling out to customers, and the app will be available on all Hopper 2 and Hopper 3 DVRs by February 2017.
