^{*} As Adjusted includes the effect of divesting our operations in Benelux and Latin America

N/M - Not Meaningful

The following defines the non-GAAP measures used to evaluate performance:

In addition to reporting generally accepted accounting principles in the United States of America ("GAAP") results, the Company evaluates performance and reports on a total company basis and on a business segment level basis its results (such as revenue, operating income, operating income growth, operating margin, net income, tax rate and diluted earnings per share) on an "As Adjusted" basis. The term "As Adjusted" refers to the following: the elimination of the effect on revenue due to purchase accounting fair value adjustments to deferred revenue; restructuring charges; other non-core gains and charges that are not in the normal course of our business (such as gains and losses on sales of businesses, impairment charges and material tax and legal settle ments); acquisition and divestiturerelated fees (such as costs for bankers, legal fees, diligence costs, retention payments, and contingent consideration adjust ments); and acquisition-related intangible amortization expense. A recurring component of our "As Adjusted" basis is our restructuring charges, which we believe do not reflect our underlying business performance. Such charges are variable from period to period based upon actions identified and taken during each period. Additionally, our "As Adjusted" results exclude the results of Discontinued Operations. Management reviews operating results on an "As Adjusted" basis on a monthly basis and establishes internal budgets and forecasts based upon such measures. Management further establishes annual and long-term compensation such as salaries, target cash bonuses and target equity compensation amounts based on performance on an "As Adjusted" basis and a significant percentage weight is placed upon performance on an "As Adjusted" basis in determining whether performance objectives have been achieved. Management believes that by reflecting these adjustments to our GAAP financial measures, business leaders are provided incentives to recommend and execute actions that support our long-term growth strategy rather than being influenced by the potential impact one of these items can have in a particular period on their compensation. The Company adjusts for these items because they do not reflect the Company's underlying business performance and they may have a disproportionate positive or negative impact on the results of its ongoing business operations. We believe that the use of our non-GAAP financial measures provides useful supplemental information to our investors.

We also isolate the effects of changes in foreign exchange rates on our revenue growth because we believe it is useful for investors to be able to compare revenue from one period to another, both after and before the effects of foreign exchange. The change in our operating performance attributable to foreign currency rates is determined by converting both our prior and current periods by a constant rate. As a result, we monitor our "As Adjusted" revenue growth both after and before the effects of foreign exchange.

We also analyze "As Adjusted" revenue growth on an organic basis because management believes this information provides important insight into the underlying/ongoing performance of the business. Organic revenue excludes revenue from acquired businesses for one year from the date of the acquisition and net divested revenue which we define as the historical revenues from the divested businesses net of the annual ongoing future revenue streams resulting from the commercial arrangements entered into in connection with such divestitures.

We may from time to time use the term "sales", which we define as the annual value of committed customer contracts. This term is often referred to as "bookings" or "commitments" by other companies.

We monitor free cash flow as a measure of our business. We define free cash flow as net cash provided by operating activities minus capital expenditures and additions to computer software and other intangibles. Free cash flow measures our available cash flow for potential debt repayment, acquisitions, stock repurchases, dividend payments and additions to cash, cash equivalents and short-term investments. We believe free cash flow to be relevant and useful to our investors as this measure is used by our management in evaluating the funding available after supporting our ongoing business operations and our portfolio of investments.

Free cash flow should not be considered as a substitute measure for, or superior to, net cash flows provided by operating activities, investing activities or financing activities. Therefore, we believe it is important to view free cash flow as a complement to the consolidated statements of cash flows.

We also monitor deferred revenue after adjusting for the effect of foreign exchange, dispositions, acquisitions and the impacts of the write-down of deferred revenue due to purchase accounting.
