Q2 2015 EARNINGS CONFERENCE CALL

August 6, 2015

Kathy Guinnesssey

Good morning everyone, and thank you for joining us today.

With me on the call this morning are:

Bob Carrigan, our President and Chief Executive Officer

Rich Veldran, our Chief Financial Officer, and

Josh Peirez, our Chief Operating Officer

Here's what you can expect on the call today. Following my brief remarks, Bob will provide an overview of our second quarter results, and an update on the post-acquisition integration of NetProspex and Credibility Corp. Then Rich will come on to take you through the highlights of the second quarter. After that we will open the call for your questions.

One housekeeping item to share. As you know, we sold our business in Australia on June 30th and converted to a partner model.

1 The Australia business is classified in our financials as Discontinued
2 Operations, and as such the results of Australia have been removed from
3 our company “as adjusted” results for both the current and all prior periods.
4 This will be reflected in the updated financial model that will be posted on
5 our website later today.

6

7 To help our analysts and investors understand how we view the business,
8 our remarks this morning will include forward-looking statements.

9 Our Form 10-K and 10-Q filings – as well as the earnings release we
10 issued yesterday – highlight a number of important risk factors that could
11 cause our actual results to differ from these forward-looking statements.

12 These documents are available on the Investor Relations section of our
13 website, and we encourage you to review this material. We undertake no
14 obligation to update any forward-looking statements.

15

16 During our call today, we will be discussing a number of non-GAAP
17 financial measures which we call “as adjusted” results, as that’s how we
18 manage the business.

19

20 For example, when we discuss “revenue growth” we’ll be referring to the
21 non-GAAP measure “revenue growth, as adjusted” which is revenue
22 adjusted to eliminate the effect on revenue due to purchase accounting fair
23 value adjustments to deferred revenue, and before the effect of foreign
24 exchange. When we discuss “operating income,” “operating margin” and
25 “EPS,” these will all be on a non-GAAP basis, which we call “as adjusted”.

1 Additionally, our “as adjusted” results exclude the results of Discontinued
2 Operations. When we discuss “free cash flow” this will be on a non-GAAP
3 basis, excluding the impact of legacy tax matters, potential regulatory fines
4 associated with the ongoing China investigation and potential payments for
5 legal and other matters.

6

7 You can find the reconciliation between these and other non-GAAP
8 financial measures, and the most directly comparable GAAP measures, in
9 the schedules to our earnings release. They can also be found in a
10 supplemental reconciliation schedule that we post on the Investor Relations
11 section of our website.

12

13 We do not provide guidance on a GAAP basis because we are unable to
14 predict, with reasonable certainty, the future movement of foreign exchange
15 rates or the future impact of: (i) non-core gains and charges, (ii) acquisition
16 and divestiture-related fees; and (iii) purchase accounting fair value
17 adjustments to deferred revenue. These items are uncertain and will
18 depend on several factors, including industry conditions, and could be
19 material to Dun & Bradstreet's results computed in accordance with GAAP.

20 Later today, you'll also find a transcript of our prepared remarks on our
21 Investor Relations site. With that, I'll now turn the call over to Bob
22 Carrigan.

23

24

1 **Bob Carrigan**

2

3 Thank you, Kathy, and thank you everyone for joining us for today's call.

4 It's good to talk to you today about Dun & Bradstreet's second quarter and

5 how we've been executing against our strategy for growth. We've had

6 quite a lot going on in the second quarter to advance our strategy. We

7 completed the acquisition of Credibility Corp. and formed our new division,

8 Dun & Bradstreet Emerging Businesses, to bring new capabilities to the

9 important small and medium business space. We also converted our

10 Australia business into a partner model, issued new bonds to finance our

11 acquisitions, made great progress integrating both Credibility Corp. and

12 NetProspex, and held an Investor Day in June. Like I said, it's been a busy

13 quarter.

14

15 It was great to see and hear from so many of you directly at our Investor

16 Day event. I had the opportunity to speak with a lot of you both before and

17 after our presentation, during which we updated you on our strategy for

18 growth, and my team spoke specifically about how we will grow each of our

19 sales channels.

20

21 As I mentioned then, I feel good about where Dun & Bradstreet is today,

22 but I feel great about where we're headed. We see an ever-growing

23 market for our data and solutions. Our addressable market has grown 20

24 percent in just the last year to \$24 billion.

1 Dun & Bradstreet is positioned to grow beyond trade credit and traditional
2 sales and marketing to where the market is growing: in data services,
3 digital marketing, and new commercial risk categories.

4

5 As I talked about during Investor Day, we have launched a strategy to take
6 advantage of the enormous market available to Dun & Bradstreet. I won't
7 go into detail on each component of our strategy today because I know
8 many of you were at Investor Day. For those who weren't able to come, I
9 urge you to go to the investor relations section of our website at dnb.com
10 so you can watch the presentation or read the transcript. You'll be able to
11 see for yourself the path we've laid out to achieve sustainable growth with
12 expanding margins over the next few years.

13

14 Today we're here to talk about the second quarter, and last night we
15 announced our second quarter earnings. Total company revenue for the
16 quarter was up 6 percent, largely due to the acquisitions of NetProspex and
17 Credibility, whose revenues were slightly above our expectations. Organic
18 revenue was up about 1 percent in the quarter. Organic revenue growth
19 has gotten off to a slower start than we would have liked in the first half of
20 the year and we're about a point behind our expectations.

21

22 Let me give you some insight into our results. We've got 2 things going on
23 that are impacting our numbers. First, underlying sales growth in the
24 Americas accelerated in the second quarter, and we are moving in the right
25 direction.

1 Sales are growing faster than revenue because we're selling more products
2 where revenue is recognized over time, like our newer products, D&B
3 Direct and Optimizer-for-Contacts, which we created from the acquisition of
4 NetProspex.

5

6 You can see the evidence of our progress in the growth in our Americas
7 deferred revenue. Americas deferred revenue, excluding the impact of
8 acquisitions, was up slightly year over year, which was the first time we've
9 been in positive territory in the last eight quarters and a significant uplift
10 over the first quarter where Americas deferred revenue was down a little
11 more than a point. So while organic revenue is a little behind at this point
12 in the year, improving deferred revenue means we will see more revenue in
13 the future.

14

15 Our revenue growth continues to come from the areas we expect to drive
16 our strategy: alliances and large strategic customers, both of which were up
17 in the quarter. Furthermore, we have seen additional evidence that DNBI is
18 stabilizing, with a revenue decline of 1 percent for the second consecutive
19 quarter after being down 4 percent for all of 2014.

20

21 Second, we are experiencing some weakness in Europe, which we are
22 addressing through tightening our sales execution, increasing the discipline
23 around pipeline management and introducing new products in areas like
24 Compliance. I'm pleased to say we've already closed some large deals in
25 the third quarter in Europe.

1 We are exactly where we thought we would be on profit and earnings at
2 this point in the year. Operating income was down 10 percent in the second
3 quarter, while EPS was down 11 percent, both as expected. As we
4 discussed in our first quarter earnings call, we anticipated that operating
5 income would be down 10 to 12 percent in the first half of the year due to
6 the timing of investments, and also due to timing of revenue growth, which
7 is more back end weighted. So, we are on track to deliver all of our
8 guidance metrics for the year – both organic and inorganic.

9

10 Before I turn the call over to Rich to discuss the quarter in more detail, I
11 want to give you a view of how our recent acquisitions are doing.

12

13 Sales in our new Emerging Businesses division, which is the combination
14 of Credibility Corp. and our small business sales channel, exceeded our
15 expectations in the quarter. Though early days, we are pleased with the
16 results so far, particularly given all of the activity around merging these
17 teams.

18

19 As I discussed on the last earnings call, to turn around our small and
20 medium business sales, we faced a decision: build or buy. We made the
21 strategic decision to buy, but we didn't stop there. Under the leadership of
22 the Credibility management team, which has a proven track record of
23 generating growth in the SMB space, we've merged the Dun & Bradstreet
24 inside sales team with the Credibility team to form the Emerging
25 Businesses division.

1 We now have a much more robust suite of solutions for the small and
2 medium customer segments. It's great to have the Credibility team
3 onboard, and they're excited to have joined forces under one Dun &
4 Bradstreet brand.

5

6 We're already working together to bring new value to our customers. We
7 are identifying opportunities to leverage the Emerging Businesses platform
8 in different geographies and to develop new products to further drive
9 growth. This will allow SMB sales to move from a drag on revenue growth,
10 as it has been the last few years, to a driver of revenue growth into the
11 future.

12

13 We've also made great progress in integrating NetProspex into Dun &
14 Bradstreet. This acquisition was about making a big play in the business
15 contacts space. When it comes to information about businesses, Dun &
16 Bradstreet has long been the world heavyweight champ. And, with the
17 acquisition of NetProspex, we're now the heavyweight champ in the
18 professional contact data space too. This helps our customers reach not
19 just the businesses they're targeting, but the decision-makers and
20 influencers at those businesses.

21

22

23

24

1 With NetProspex, we are able to provide our customers an actionable view
2 of companies and the people who run them, putting quality relationship
3 insight at the center of marketing data strategy, which is increasingly
4 important in a world where companies are trying to engage with customers
5 in new ways, leveraging data and technology.

6

7 The acquisition is an example of our focus and commitment to modernizing
8 delivery of data and analytics to our customers. The NetProspex
9 Optimizer-for-Contacts tool is a cloud-based solution that provides an easy
10 and cost-effective way for B2B marketers to dramatically improve their
11 contact data health, ensure they are targeting the best-fit prospects, and
12 optimize their demand generation efforts. I hope some of you had an
13 opportunity to check out the Optimizer-for-Contacts demo at Investor Day.

14

15 Even since Investor Day, we have been making improvements to the
16 NetProspex products. We've mapped all of the professional contacts at
17 NetProspex to the companies in our database through the D-U-N-S
18 Number, to ensure that our products are comprehensive and
19 complementary. We're moving fast, because we see a big need in the
20 market as companies strive for more and cleaner contact data.

21

22 Our sales teams are focused on penetrating the existing Dun & Bradstreet
23 customer base with Optimizer-for-Contacts, and we had a few big wins in
24 the second quarter with large accounts.

1 By leveraging existing Dun & Bradstreet relationships the average order
2 size of the product is increasing significantly – by more than 20 percent.
3 We also have seen improvement in our pipeline, driven by identified upsell
4 and cross-sell opportunities, and sales through our Emerging Businesses
5 division.

6

7 We have found some real business synergies in the integration of
8 NetProspex. One of the things that attracted us to NetProspex was their
9 process for curating and validating data to ensure it's not just the most
10 accurate data in the market, but actionable. They did for contact data what
11 Dun & Bradstreet has historically done for company data, and now it's all
12 under one roof. All of the contact data we source as a company, including
13 sources that NetProspex was not previously collecting, goes through
14 NetProspex's data refinery, so all the data that we provide is of the highest
15 quality.

16

17 Furthermore, we are realizing the cost synergies we expected when
18 undertaking the acquisition. We are eliminating a couple of million dollars
19 of spend with other third party providers of contact data, and I believe there
20 is opportunity to find additional savings down the road.

21

22 NetProspex is a great example of forward-thinking at Dun & Bradstreet. As
23 I discussed during Investor Day, the world of data is changing, and it's
24 changing fast.

1 As business becomes digitized, as marketing becomes automated, and as
2 customers continue to demand data where they need it, when they need it,
3 Dun & Bradstreet is filling a gap to help make sure that our customers know
4 that there's no better place to go for the data they need most.

5

6 I am pleased to say that our strategy is working – NetProspex contributed a
7 point to total company revenue growth in the second quarter, and we plan
8 to keep growing that business into the future.

9

10 So, with the integration of Credibility and NetProspex, and with our strategy
11 that we discussed with you during Investor Day, you can see that we have
12 a lot going on. We are keenly focused on executing and taking advantage
13 of the tremendous opportunities in front of us.

14

15 With that, I now will turn the call over to Rich Veldran, who will discuss our
16 second quarter results in further detail.

17

18 Rich?

19

20

1 **Rich Veldran**

2 Thanks Bob and good morning everyone.

3

4 For the second quarter, total company revenue was \$381.6 million, up 6%,
5 with about 1% organic growth. The Americas segment represented 81% of
6 our revenue at \$309.1 million in the quarter, and was up 8%, approximately
7 1% organic. Non-Americas represented 19% of total revenue, down from
8 25% of our reported revenue last quarter due to the sale of our Australia
9 business. Non-Americas revenue was \$72.5 million, about flat to last year,
10 and all organic. Let me go through each segment in more detail, beginning
11 with the Americas.

12

13 Risk Management, which makes up 58% of Americas revenue, was up 8%.
14 Within Risk Management, Trade credit was down 2%. DNBI is 75% of
15 Trade Credit and was down 1% during the quarter, similar to Q1. Price
16 increases continued to be in the low single digits and retention was in the
17 low 90's. As Bob mentioned, DNBI continues to stabilize and we expect its
18 2015 performance to be better than last year, although still down for the
19 year.

20

21 Other Enterprise Risk Management was up 53% in the second quarter, off
22 a relatively small base. The majority of the growth is inorganic, as the
23 Credibility Corp "Credit-on-Self" revenue is in the category.

24

1 Sales & Marketing, representing 42% of Americas revenue, also increased
2 8% in the quarter. Traditional Prospecting, representing about a quarter of
3 S&MS revenue, was up 3%. This category was helped by some inorganic
4 revenue from Credibility Corp, which offset declines in Hoovers.

5

6 Advanced Marketing Solutions, the remaining three quarters of S&MS, was
7 up 9%. Consistent with our results in the first quarter, about half of this
8 growth was from NetProspex, which we acquired in early January. The
9 rest of the increase was due to continued strong growth in our DaaS CRM
10 alliances.

11

12 As Bob discussed, deferred revenue in the Americas was up slightly for the
13 quarter, before the effect of foreign exchange and acquisitions. This does
14 not reflect committed sales through alliances that would have added about
15 2 points to the total balance.

16

17 In Non-Americas revenue was flat for the quarter. Revenue growth is
18 expected to pick up in the second half of the year, as we have a growing
19 pipeline of large deals. Compliance products, such as FATCA and other
20 “Know-Your- Customer” solutions, are resonating particularly well with
21 European companies that want to get ahead of compliance with US
22 regulations. We expect full year revenue growth for Non-Americas to be in
23 the low single digits.

24

1 Turning to the bottom line, operating income was down 10% in the quarter,
2 which is where we expected to be due to the timing of both our revenue
3 ramp and investment spending. Our 2015 investment spending is on track
4 and will step up slightly in the second half. We've also gotten past the big
5 negative comparison from the annualization of our 2014 investments that
6 contributed to the -10% first half. Going forward, we expect operating
7 income to flatten in the 3rd quarter, and grow in the fourth quarter when, as
8 in prior years, we see most of our revenue growth.

9

10 EPS was down 11% in the second quarter, slightly more than operating
11 income, due to increased interest expense, slightly offset by a lower tax
12 rate. Earlier in the year, I said we expected our full year 2015 tax rate to be
13 up to 50 basis points below our 2014 rate. That 50 BP improvement still
14 applies, but with Australia out of our results, our tax rate for 2014 was
15 32.5%, so the improvement will be off a higher base rate.

16

17 Turning to the balance sheet, during the second quarter we issued new 5
18 year senior notes to support our recent acquisitions. The new debt issue
19 was very well received, with demand 3 times higher than the \$300 million
20 we were raising. The coupon on the notes is 4%. We also entered into a
21 "forward-starting" 5-year term loan with a syndicate of banks. This
22 commitment allows us to draw down up to \$400 million at any time between
23 now and November 2015. We plan to use this term loan to refinance \$300
24 million of 5-year notes that mature in November of this year.

25

1 As we have said, we are committed to maintaining our investment grade
2 credit rating, and in the near term, we plan to use free cash flow to reduce
3 debt. We are adding this term loan to our capital structure because it
4 allows us to repay all or part of the loan at any time prior to maturity with no
5 prepayment penalty.

6

7 So, all in all we are on track to deliver our guidance for the year.

- 8 • Revenue growth of 6% to 9%, including about 5 points of contribution
9 from acquisitions
- 10 • Operating income of flat, to up 4%
- 11 • EPS of (3%) to 1%, and
- 12 • Free cash flow of \$255 to \$285 million

13

14 With that, we'll now open the call for your questions. Operator?

15

16
