

## Dresser-Rand Opens Gas Engine Technology Center

Fort Collins, Colo., November 20, 2009 - Dresser-Rand Group Inc. ("Dresser-Rand" or the "Company") (NYSE: DRC) has opened its new Gas Engine Technology Center (GETC). The new center focuses on technologies for reducing emissions and improving automation and reliability among reciprocating engines used in natural gas production and transmission.

Administered by the company's Enginuity business unit, the GETC comprises an engineering and development staff, state-of-the-art catalyst management and support facility, aftermarket support operation, and expanded warehouse capacity.

"The world is waking up to the fact," said Chad Fletcher, general manager, "that reducing emissions such as hazardous air pollutants and greenhouse gas, as well as improving efficiency of machinery and equipment, are simply the right things to do."

Dresser-Rand not only addresses such issues with its controls, automation equipment, and aftermarket services, but also with the design and construction of its new facility. Low volatile organic compound carpeting, energy-saving lighting, and use of recycled materials throughout the center exceed local and national standards.

Dresser-Rand has long been known for its focus on high levels of client service and a consultative approach to meeting client needs. The company also has led the industry in delivering leading emission reduction technologies that recently have achieved recognition for advanced automation and reliability. It is among the largest suppliers of rotating equipment solutions to the worldwide oil, gas, petrochemical, and process industries.

The company operates manufacturing facilities in the United States, France, U.K., Germany, Norway, India, and China, and maintains a network of 35 service and support centers covering more than 140 countries. In 2008, Dresser-Rand acquired the assets of Enginuity LLC, a private, U.S.-based company specializing in reducing exhaust emissions and improving operations through combustion, catalytic and automation based technologies. Following the acquisition, Dresser-Rand formed a new business unit - Enginuity - where staff members focus on bringing energy and the environment into harmony when meeting client needs.

This news release may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, the Company's plans, objectives, goals, strategies, future events, future bookings, revenues, or performance, capital expenditures, financing needs, plans, or intentions relating to acquisitions, business trends, executive compensation, and other information that is not historical information. The words "anticipates", "believes", "expects", "intends", "appears", "outlook", and similar expressions identify such forward-looking statements. Although the Company believes that such statements are based on reasonable assumptions, these forward-looking statements are subject to numerous factors, risks, and uncertainties that could cause actual outcomes and results to be materially different from those projected. These factors, risks and uncertainties include, among others, the following: potential for material weaknesses in its internal controls; economic or industry downturns; the variability of bookings due to volatile market conditions, subjectivity clients exercise in placing orders, and timing of large orders; volatility and disruption of the credit markets; its inability to generate cash and access capital on reasonable terms and conditions; its inability to implement its business strategy to increase aftermarket parts and services revenue; competition in its markets; failure to complete or achieve the expected benefits from any future acquisitions; economic, political, currency and other risks associated with international sales and operations; fluctuations in currencies and volatility in exchange rates; loss of senior management; environmental compliance costs and liabilities; failure to maintain safety performance acceptable to its clients; failure to negotiate new collective bargaining agreements; unexpected product claims and regulations; infringement on its intellectual property or infringement on others' intellectual property; difficulty in implementing an information management system; and the Company's brand name may be confused with others. These and other risks are discussed in detail in the Company's filings with the Securities and Exchange Commission at [www.sec.gov](http://www.sec.gov). Actual results, performance, or achievements could differ materially from those expressed in, or implied by, the forward-looking statements. The Company can give no assurances that any of the events anticipated by the forward-looking statements will occur or, if any of them does, what impact they will have on results of operations and financial condition. The Company undertakes no obligation to update or revise forward-looking statements, which may be made to reflect events or circumstances that arise after the date made or to reflect the occurrence of unanticipated events.
