

EpiCept Corporation Added to Preliminary List of Companies in Russell Microcap Index

TARRYTOWN, N.Y., Jun 15, 2010 (BUSINESS WIRE) -- Regulatory News:

EpiCept Corporation (Nasdaq and OMX Nordic Exchange: EPCT) announced today that the Company's common stock has been included on a list of preliminary additions to the Russell Microcap(R) Index posted by Russell Investments on June 11, 2010 on www.russell.com. These changes are expected to go into effect after the close of trading on Friday, June 25, 2010.

"Inclusion in this index would represent an important step in EpiCept's evolution, as the equity markets recognize and reflect our growth into a commercial enterprise," said Jack Talley, EpiCept's president and chief executive officer. "We are pleased that EpiCept stock can benefit from the wider exposure offered by its preliminary addition to the index," he added.

The Russell Microcap Index measures the performance of the microcap segment of the U.S. equity market and is comprised of the smallest 1,000 companies in the Russell 3000(R) Index, plus the next smallest 1,000 companies. The Russell indexes are widely used by investment managers and institutional investors for index funds and as benchmarks for passive and active investment strategies. The indexes are reconstituted annually.

About EpiCept Corporation

EpiCept is focused on the development and commercialization of pharmaceutical products for the treatment of cancer and pain. The Company's lead product is Ceplene^(R), which has been granted full marketing authorization by the European Commission for the remission maintenance and prevention of relapse in adult patients with Acute Myeloid Leukemia (AML) in first remission. The Company has two oncology drug candidates currently in clinical development that were discovered using in-house technology and have been shown to act as vascular disruption agents in a variety of solid tumors. The Company's pain portfolio includes EpiCept(TM) NP-1, a prescription topical analgesic cream in late-stage clinical development designed to provide effective long-term relief of pain associated with peripheral neuropathies.

Forward-Looking Statements

This news release and any oral statements made with respect to the information contained in this news release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include statements which express plans, anticipation, intent, contingency, goals, targets, future development and are otherwise not statements of historical fact. These statements are based on our current expectations and are subject to risks and uncertainties that could cause actual results or developments to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Factors that may cause actual results or developments to differ materially include: the risk that Ceplene will not receive regulatory approval or marketing authorization in the United States or Canada, the risk that Ceplene will not achieve significant commercial success, the risk that any required post-approval clinical study for Ceplene will not be successful, the risk that we will not be able to maintain our final regulatory approval or marketing authorization for Ceplene, the risks associated with the adequacy of our existing cash resources and our ability to continue as a going concern, the risks associated with our ability to continue to meet our obligations under our existing debt agreements, the risk that Azixa(TM) will not receive regulatory approval or achieve significant commercial success, the risk that we will not receive any significant payments under our agreement with Myriad, the risk that the development of our other apoptosis product candidates will not be successful, the risk that clinical trials for EpiCept NP-1 or crolibulinTM will not be successful, the risk that EpiCept NP-1 or crolibulin will not receive regulatory approval or achieve significant commercial success, the risk that we will not be able to find a partner to help conduct the Phase III trials for EpiCept NP-1 on attractive terms, a timely basis or at all, the risk that our other product candidates that appeared promising in early research and clinical trials do not demonstrate safety and/or efficacy in larger-scale or later stage clinical trials, the risk that we will not obtain approval to market any of our product candidates, the risks associated with dependence upon key personnel, the risks associated with reliance on collaborative partners and others for further clinical trials, development, manufacturing and commercialization of our product candidates; the cost, delays and uncertainties associated with our scientific research, product development, clinical trials and regulatory approval process; our history of operating losses since our inception; the highly competitive nature of our business; risks associated with litigation; and risks associated with our ability to protect our intellectual property. These factors and other material risks are more fully discussed in our periodic reports, including our reports on Forms 8-K, 10-Q and 10-K and other filings with the U.S. Securities and Exchange Commission. You are urged to carefully review and consider the disclosures found in our filings which are available at www.sec.gov or at www.epicept.com. You are cautioned not to place undue reliance on any forward-looking statements, any of which could turn out to be wrong due to inaccurate assumptions, unknown risks or uncertainties or other risk factors.
