

ERF Wireless Discusses the Rural Broadband Initiative and Recent New Contracts on National Television

Voice and Internet Service Being Provided to Galveston Island and Crystal Beach, Texas

LEAGUE CITY, Texas, Mar 19, 2009 (BUSINESS WIRE) -- ERF Wireless (OTCBB:ERFW), a leading provider of enterprise-class wireless broadband products and services, announced today that Dr. H. Dean Cubley, its CEO, will have the opportunity to discuss its recently announced exclusive Schlumberger contract, the introduction by ERF Wireless of telephone and broadband services in areas devastated by Hurricane Ike, as well as how ERF Wireless views the rural broadband initiative of the new administration on Fox Business News today between 11:00 and 12:00 Eastern time. Please use the following link to find the network station in your area: http://www.foxbusiness.com/channel_finder.html.

Specifically, ERF Wireless will discuss the introduction of their wireless broadband products and services to the homeowners and businesses located on Galveston Island and Crystal Beach, Texas, two of the state's most severely damaged communities that were in the direct path of Hurricane Ike. Even though it has been more than six months since Ike moved across the Texas coast, many residents in the most severely affected areas still do not have basic telephone service or Internet connectivity.

"Internet connectivity and local/long distance landline phone service have been virtually non-existent for the majority of residents in these two storm-damaged communities since Hurricane Ike devastated the Texas Gulf Coast last September," said Gary Busby, Senior Vice President Sales and Marketing for ERF Wireless. "Since the major communications providers haven't restored service, ERF Wireless and their local partners are providing a wireless broadband communications network to provide both secure, high-speed Internet connectivity and VoIP phone service to the area."

About ERF Wireless
