EnteroMedics to Host First Quarter 2017 Conference Call

ST. PAUL, Minn., May 11, 2017 /PRNewswire/ -- EnteroMedics Inc. (NASDAQ: ETRM), the developer of medical devices using neuroblocking technology to treat obesity, metabolic diseases and other gastrointestinal disorders, will host a conference call on Tuesday, May 16, 2017 at 8:30 AM Eastern Time to discuss results for the first quarter ended March 31, 2017 and to provide an update on the commercialization of vBloc[®] Neurometabolic Therapy.

Conference Call Details

The first quarter conference call may be accessed by dialing (877) 280-7473 (U.S. and Canada) or (707) 287-9370 (international), and entering passcode 22425310. A replay of the call will be available from May 16, 2017 at 2:00 PM Eastern Time through May 23, 2017 at 2:00 PM Eastern Time by dialing (855) 859-2056 (U.S. and Canada) or (404) 537-3406 (international) and entering passcode 22425310.

To access the live webcast, visit the events page of the investor relations section of EnteroMedics' website at www.enteromedics.com. A replay of the webcast will be available immediately after the conference call.

About EnteroMedics Inc.

EnteroMedics is a medical device company focused on the development and commercialization of its neuroscience based technology to treat obesity and metabolic diseases. vBloc[®] Neurometabolic Therapy, delivered by a pacemaker-like device called the vBloc[®] System, is designed to intermittently block the vagus nerves using high-frequency, low-energy, electrical impulses. EnteroMedics' vBloc[®] System has received U.S. Food and Drug Administration approval and CE Mark.

Information about the vBloc[®] System and vBloc[®] Neurometabolic Therapy

You should not have an implanted vBloc[®] System if you have cirrhosis of the liver, high blood pressure in the veins of the liver, enlarged veins in your esophagus or a significant hiatal hernia of the stomach; if you need magnetic resonance imaging (MRI); if you have a permanently implanted, electrical medical device; or if you need a diathermy procedure using heat. The most common related adverse events that were experienced during clinical study of the vBloc System included pain, heartburn, nausea, difficulty swallowing, belching, wound redness or irritation, and constipation.

Talk with your doctor about the full risks and benefits of vBloc Therapy and vBloc System. For additional prescribing information, please visit www.enteromedics.com.

If you are interested in learning more about vBloc Neurometabolic Therapy, please visit www.vbloc.com or call 1-800-MY-VBLOC.
